IMPROVED VARIETIES OF WHEAT FROM FRANCE -There have lately been imported from France three varieties of wheat-the Neapolitan white wheat, well suited for the southern States, but too tender for the northern; the Saumur wheat, and the early Noe wheat. As the two latter have the property of ripening some days before our common varieties of wheat, if they otherwise succeed in this climate, a great point will be accomplished. A single week gained in the ripening will often secure the crop from the injury of the rust or the fly, independent of the advantages to be gained in the market. The Saumur wheat is originally from the valleys of Anjou, a southeastern province of France, and is a very remarkable variety of winter wheat. The ear is strong and full, of a reddish color, and very much esteemed by farmers. The straw is very white, higher than that of ordinary wheat, and also larger and sweeter. The Noe wheat was introduced by Mr De Noe, zontal or Oscillating Steam Engines. A KNOW-NOTHING VICTORY .- The other day the Whig papers were rejoicing over the success of "Sam," in the Whig city of Cleveland, Chio. That the people of the South may know who "Sam's" -friends were in Cleveland, on what principles he was successful, and by whom elected, we copy the following statement from the Cleveland Express, the Know-Nothing organ in that city. Speaking of the election, it says:

"The colored population generally voted for the American ticket day before vesterday. In this they showed good judgment, and will have no occasion to regret their action.
