SCARLET FEVER .- As the scarlet fever is very prevalent at present, it may be of great benefit to many persons to publish two simple methods of treatment of the disease, in its earlier stages. The one iskto rub the entire body of the sick with a soft lubricating substance-a peice of fat pork has been used for this purpose. It is said that it softens the skin, opens the pores,

and produces a soothing influence on the patient. The other plan is to dissolve some salaratus in warm water (about one-fourth of an ounce to the quart,) and bathe the patient's body with this, at a milk heat. A soft sponge is employed in bathing the body, and a soft towel used for drying. This operation should be done rapidly in a comfortably warm apartment, and the patient placed in bed as soon as possi-

ble afterwards.

A tax collector on Long Island involuntarily robbed a lady of her valise last week. He was riding along in a buggy when he overtook, and acceded to a request to take her as a passenger. Not liking her appearance, which was decidedly masculine, he dropped a glove and when she got out for it drove off rapidly. "Sir,' said the ass, rising from his chair, and The lady fired a pistol at him twice, and the making use of his most sarcastic manner, 'how valise was found to contain a pair of pistols and a bowie knife!
