THE FLOATING BALLS OR KNUCKLE WASHING MACHINE.

The subscriber having purchased the Right of the above Machine for the Counties of Cumberland and Harnett, is now ready to furnish such as may be desirous of obtaining a Right. The machine is simple, both in its structure and operations, and should any portion of it fail, can be easily and speedily repaired by any person having the use of tools. I do not claim for this machine more than what it is able to perform with the ordinary duties. In the first place a child 12 or 15 years of age can perform all the labor, after having seen it operate a few times, and if the directions are adhered to, will do as much work in one day as three or four women in the ordinary way, and the work will be much better done. Below will be found a certificate from those who have purchased and now

It washes very rapidly, and the work is much better done than is usually done n the old way, and with less wear to the Ciothing, It far exceeds our expectations, and has only to be seen in operation to satisfy the most skeptical of its atility and economy. We have no doubt of its being generally used wherever introduced.

THAT DAM ROARING.

A young buck went to see the daughter of a Presbyterian elder lately, whose house was near a milldam. It being the spring of the year the waters made a considerable of a roar as they tumbled over the dam. The modest young gentleman tapped lightly at the door, but at first received no asswer. He tapped again at it no answer. Again and again he repeated his knock, but still be was unheard. Mustering up courage, he proceeded to inflict some

severe thumps on the door, which brought the staid old gentleman out. "I suppose," said the youngster, who had by this time become slightly savage, from being compelled to wait so long, "I suppose you could not hear me knocking for the dam roaring." "The dam roaring! What do you mean, sir? How dare you speak in that way," said 20-Hay & straw the divine, somewhat angered at hearing the

young man swear in his presence. "I mean to say sir, that I suppose you could hot hear my knocking on account of the dam roaring." "Dam roaring again! You joung scoun-

drel! Have you the impudence to insult me with a repetition of those words? Begone sir!" "My dear sir, quoth the now bewildered youth, "I intended to say that I presumed I could not be heard on account of the 'dam roaring," laying particular emphasis on the last two words.

"Insult on insult!" shouted the infuriated man, and he ran at the poor fellow with the evident intention of ejecting him, but was restrained by the voice of his daughter exclaimhose, &c. ing: "Papa, I suppose the young man intended to say that he could not be heard on account composition of the roaring of the dam."

"Oh! I beg your pardon, sir-I beg your pardon-walk in, walk in, really-ah! well! I declare! The dam roufing! Capital! Come

American of vesterday morning says: "This wonderful invention has attracted the attention of the scientific world to a degree sponsibility certified to by a navy-agent, collector, scarcely equalled by any other device of modern district attorney, or some other person satisfactorily ingenuity. Its plan may be pretty well commovable, metal figures, on which are engraved the different numerals, and which are drawn in row of eight small, square, metal faces, with a number engraved on it, and capable of changing in obedience to the movements of the machinery cellaneous" in the schedule twenty-five per cent. In obedience to the movements of the machinery Persons whose offers shall be accepted will be noti- within, so that any figure from 0 to 9 may be fied by letter through the post office, which notice presented by each; these faces serving to indicate the reaction, if any, in the answer. Below these faces are four small dials, like ordinary watch faces, surrounded with figures and furnished with hands, which indicate the figues serving to express the answer. This is obtained by drawing out the stops corresponding to the orders contained in the sum to be worked, until the furthest figure visible on each stop expresses the required units of each order; the som being thas expressed, the buttons attached to each dial are screwed as in winding ip a watch, stopping when the mechanism is telt to resist a further movement. The hands move during the screwing, and the figures to which they point, when the operation is through, give the answer to the question propounded on

> ***************** A BEAUTIFUL THOUGHT .- Some one has said of those who die young, that "they are like the lambs which the Alpine shepherds bear in their arms to higher, greener pastures, that the flocks may follow."
