WASHING MACHINE. The subscriber having purchased the Right of the above Machine for the Counties of Cumberland and Harnett, is now ready to furnish such as may be desirons of obtaining a Right. The machine is simple, both in its structure and operations, and should any portion of it fail, can be easily and speedily repaired by any person having the use of tools. I do not claim or this machine more than what it is able to perform with that description of labor which almost every family is able to supply, without at all interfering with the ordinary duties. In the first place a child 12 or 15 years of age can perform all the labor, after having seen it operate a few times, and if the direc tions are adhered to, will do as much work in one day as three or four women in the ordinary way, and the work will be much better done. Below will be found a certificate from those who have purchased and now | 23,436 do

FAYETTEVILLE, N. C., April 9, 1856. We, the undersigned, having purchased of Mr Isham Blake one of the above machines, cordially recommend it to the favor of the Public. It washes very rapidly, and the work it much better done than is usually the old way, and with less wear to the Clothing. It far exceeds our expectations, and bas only to be een in operation to satisfy the most skeptical of its utility and economy. We have no doubt of its being generally used wherever introduced.

there is truth in the principle involved. Dr S. made a skillful dissection of the eye and succeeded in bringing the retina, one of the most delicate of human organs, being an expansion of the optic nerve, under the view of a microscope. There was nothing on the reting examined which would lead to the detection of the upon it which sufficiently establishes the fact that "What part of the fowl will you be helped the retina retains the last impression made upon it. What-we saw ourself, we do not feel disposed to make an affidavit of, and therefore "Ah! you're disposed to walk into the thing's prefer not to state; but we will say that an examination of the retina of an eye, with a common microscope, reveals a most wonderful sight and that in this instance we discovered, as upon a dagurreotype-plate, plainly marked impressions at once interesting and startling to behold."

Another statement says: Drs. Bellamy and Sandford made this experiment in the case of Beadle, the printer, who was so foully murdered in Auburn, a few days since, with the following astonishing result: They distinctly saw impressed upon the eye the rude figure of a man dresscd in a light coat, holding a stone suspended in the air. The examination of Beadle's body. after death, showed that he had been murdered

by a blow from a stone. THE MENAGERIE,-"Mr Showman, what is

"That, my dear, is the Rhynocecrow. He is consin German or Dutch relative to the Unicorn. He was born in the Desert of Sarv Ann, and fed on Lamboo and missionaries. He is very conrageous, and never leaves home unless he moves, in which case he goes somewhere else unless he is overtaken by the dark. He was brought to this country much against his own will, which accounts for his low spirits, when he is melancholy or dejected. He is now somewhat aged, although he has seen the day when he was the youngest specimen of animated taken from Adam in Paradise." (This drew a Providence, as displayed in the ring-tailed monsmile from a lady opposite, on whom the speak- key, a hanimal that can stand hanging like a feller-critter, only its reversed.
