Inhalation in Consumption.

BRONCHITIS, LARYNGITIS, and other Dired by the Inhalation of Medicated Vapors and Powders, by absorption and constitutional treatment. : s practised at the Stuyvesant Medical Institute, New York City.

The unprecedented success which has attended this method of treating diseases of the Lungs and Throat has induced us to depart from our usual course, and ourselves of the columns of the press, in order to bring it to the knowledge of such as may be laboring tion having at length passed away. We have indubi its stages can be cured! in the first, by Inbercular absorption; in the second, by the treusformations of the tubercule into chalky and calcareous concretions, in consumption is incurable, such are behind the age.

To all, this great truth must be apparent, viz: that the medicines inhaled in the form of vapor or Powder directly into the Lungs, must be much more effective than that taken into the Stomach, where the disease does not exist. The advantage of Inhalation in Consumption and Throat diseases is, that medicine in the form of Vapor is applied directly to the Lungs, where the disease exists; the stomach is thus left free to aid in restoring health, by administering to it a healthy. lifegiving food .- There is no case so hopeless that Inbaration will not reach! The means, too, are brought within the reach of all, the manner of administering the Vapors being so simple that the invalid is never required to leave home, where the hand of friendship Critiques, and Papers on the Army, Navy and and affection tends so much to aid the physician's effort

The Inhalation method is soothing, safe and ready and consists in the administration of need.cine in such manner, that they are conveyed into the Lungs in the form of vapor and produce their action at the sest of the disease Its practical success is destined to revolutionize the opinions of the medical world and establish the entire curability of Consumption.

I earnestly appeal to the common sense of all afflicted with Lung diseases, to embrace at once the advantage of Inhalation, and no longer apply medicine to the unoff-ading stomach. I claim for Inhalation a place amongst the priceless gifts that nature and art hath given as, that "our day may be long in the and." and as the only ark of safety for the consumptive; a method not only rational, but simple and efficacious. Such of the profession that have adopted Inhalation have found it efficacious in the highest degree. arresting the progress of the disease and working wonders in many desperate cases. in verdity, a signal triumph of our art over this fell destroyer of our species.
