We have incul-table proofs in our possession that Consumption in all its stages can be cured! in the first, by tubercular ab-conting in the second by the first. sorption; in the second, by the trension mations of the tubercule into chalky and calcareous concretions, in the opinions of the past may assert, that even now, consumption is incurable, such are behind the age. To all, this great truth must be apparent. viz: that the medicines inhaled in the form of vapor or Powder di-rectly into the Lungs, must be much more effective than that taken into the Stomach, where the disease than that taken into the Stomach, where the disease does not exist. The advantage of Inhalation in Con-sumption and Throat diseases is, that medicine in the form of Vapor is applied directly to the Lungs, where the disease exists; the stomach is thus left free to aid in restoring health by administering to it a healthy. lifegiving food.—There is no case so hopeless that In-haudiou will not reach! The means too and healthy. hardfiou will not reach! The means, too, are brought within the reach of all, the manner of administering the Vapors being so simple that the invalid is never required to leave home, where the hand of friendship and affection tends so much to aid the physician's effortt. The Inhalation method is soothing, safe and ready
