TO LAND BUYERS.
THE undersigned owns a tract of LAND which he wishes to sell. It is situated 15 miles above Fayetteville, on the west side of Cape Fear, on Tanhams Creek, and joins the lands of Susan L. Conoly, and others, containing Two Hundred and Fifty-eight (258) acres. About Fifty acres is cleared, and the balance well timbered. Some fine swamp lands, easily drained, are also included, and persons wishing to purchase may call on me at the store of E. F. Moore & Co.
JAMES BELL, Fayetteville, Nov. 6, 1858. tf

LAND FOR SALE.
JOHN T. GILMORE, now offers for sale a portion of his swamp lands in the county of Cumberland, about 14 miles below Fayetteville, and about 13 miles east of the Cape Fear River. The entire swamp has been successfully drained of the large body of water which it was heretofore covered. The land is apparently level, being free from ridges (which are so common to swamp lands generally) whilst there is an abundance of fall, by which the rain water can be carried off by ordinary ditches. A small portion of the land has been in cultivation about 7 years and those persons who have seen the crops, regard the land as equal in fertility to any they have seen in this state or elsewhere. The location is healthy, the neighborhood good, and the access to Fayetteville and Wilmington easy by means of a good road 13 miles in length leading directly to the river. Besides this, it is within 3 miles of a beautiful little village, upon a high and healthy bluff, at the river, with a Store, Ware-house and first rate landing. All which afford many conveniences to the neighborhood. As several persons have spoken of purchasing, this is deemed a proper time to call their attention to the subject, in as much as there is a crop now growing upon a small portion of the land, which can be judged of its production. Reasonable terms will be given to the purchaser.
Sept. 10, 1858. tf

It will be sold all together or in small tracts, to suit purchasers; also on the same day I will offer for sale my stock of Horses, Cattle, Sheep, &c., one Timber Wagon, two Carriages, one Carriage, farming utensils, and other things too tedious to mention. The subscriber will take pleasure in exhibiting the land to any persons who may wish to visit them. Terms made known on day of sale.

Materials for Paper.
(From the New York Scientific American.)
When reading and writing became common and paper was demanded in such large quantities, the consequent increased intelligence of the people taught them more and more the value of economy, and it was feared that in time rags would become so scarce that the price of paper would rise enormously. This actually happened three years ago, and the price of paper rose from two to three cents a pound all over the world. The London Times offered a very large premium for any substitute which will make the same quality of paper at a less price; this set fresh men at work and stimulated those who were already in the field of discovery, and this newspaper is now printed on paper made from cotton and beet residue, but we are not aware that they have been so fully satisfied as to pay the premium. Dr. Collyer, at London, discovered that the refuse of the beet sugar manufactories mixed with cotton could be made into excellent paper; and we believe that the general impression is that paper has been made from the refuse alone. There is an abundance of this material in Europe.

In France, Belgium and Germany there are 3000 beet sugar manufactories, which give an annual refuse of 300,000 tons, and there is about 100,000 more obtained from the refuse of distilleries, so that the supply may be regarded for the present as almost inexhaustible. Very little change is required in the machinery for manufacturing paper from it, and it obviates the use of size. It is said to contain about 56 per cent. of fibre, 30 parts of albumen and cellulose, and 10 parts of fixed salts. We are inclined to think, however, that in estimating
