

Telegraphic.

Arrival of the North Star—The Isthmus

Gold Fever Subsiding—Revolution in Carthage.

New York, Aug. 11th.—The steamer North Star, from Aspinwall, has arrived, bringing no news of importance. The excitement on the Isthmus at the Indian mounds and golden images was lying out. The English steamer Pammatte bore reported, was still lying on the reef near St. Thomas. The U. S. ship-of-war St. Mary's sailed from Panama on the 18th, for Realejo. Advice had been received of a revolutionary movement at Cartagena on the 23d ult., when the liberal party pronounced against the authorities, and appointed Ex-Governor Juan Jose Nieto provisional ruler.

Three Days Later from Europe—Arrival of the Steamship City of Baltimore.

The Steamship City of Baltimore arrived off Cape Race yesterday, with Liverpool dates to the 21st inst., and by telegraph via Quebec to the evening of the 4th inst. Her news is unimportant. There is nothing regarding the Peace Conference. France is preparing for her naval armament. Her army on the Rhine is to be dissolved. New York, Aug. 12th 1859.

Later from Havana—The Yellow Fever.

The steamship Quaker City has arrived from Havana, with dates to the 8th inst. The yellow fever at Havana had assumed an epidemic form. Signals were dull and lower. Nothing doing in Molasses.

EUROPEAN MARKETS.

LIVERPOOL, August 3d, 1859. Cotton—Sales of the past three days reached 1,900 bales, closing firm, but dull. Flour very dull, and offered at 10s. 12s. 3d. Wheat dull, and quotations barely maintained. Corn quiet, mixed and yellow 5s. 9d. a 6s. 3d. white 7s. 9d. Rye 3s. 6d. Spirit Turpentine dull at 33s. a 33s. 6d. Rice dull. Consols for money closed at 94 1/2 a 95 1/2.

Three Days Later from Europe.

New York, August 18th, 1859. The Steamship Adm. with Liverpool dates to the 6th inst., arrived here this morning. The Zurich conference was to have met at the 8th inst. The Steamship Great Eastern has been delayed and will arrive on the 19th inst. The Steamship City of Baltimore has been delayed and will arrive on the 19th inst. The Steamship City of Baltimore has been delayed and will arrive on the 19th inst.

EUROPEAN MARKETS.

LONDON, August 10th, 1859. Cotton—State of sale in Liverpool. Sales for the week reached 4,000 bales. At the London market, prices were generally firm, but showed no disposition to rise. Flour—The market is quiet, and prices are steady. Wheat—The market is quiet, and prices are steady. Corn—The market is quiet, and prices are steady. Spirit Turpentine—The market is quiet, and prices are steady. Rice—The market is quiet, and prices are steady. Consols for money—The market is quiet, and prices are steady.

NEW YORK, Aug. 13.

NARROW ESCAPE OF A STEAMER.—The State Reform School at Westboro', containing over five hundred boys, was destroyed by fire last night, except one wing and the tower. Fortunately no lives were lost. SACKVILLE, July 18. Dr. PARSONS' CURE.—There are well founded reports that the potent cure throughout the province of New Brunswick is seriously obstructed by the presence of a certain individual.

WASHINGTON, Aug. 12.

HEAD OF DEPARTMENT.—Hon. Jacob Thompson, Secretary of the Interior, has gone to the White Sulphur Springs, N. H. Hon. John B. Floyd, Secretary of War, is now at the Red Bank Sulphur. The latter's health is improving. There are now only three heads of the Departments here: Mr. Cass, Secretary of State; Mr. Tamm, Secretary of the Navy; and Mr. Holt, Postmaster General. LAWRENCE, Mass., Aug. 12. DESTRUCTIVE FIRE.—A great fire is raging in this place. The United States Hotel, the Church Block, Unitarian church, and new court-house are already destroyed. Three men are reported killed. The city government has just telegraphed to Lowell for all the assistance that can be spared with engines.

SAID ACCIDENT.—We learn, says the Wilson Ledger, from a passenger on the train last night, that a man by the name of Eliza Loring was run over on yesterday (Tuesday), a short distance below Goldsboro'. It is supposed that he was intoxicated and fell asleep on the road. The train passed over his head, crushing it terribly and killing him instantly.

DIFFICULTY SETTLED.—Col. Fremont is said to have settled the Mariposa estate difficulty. We are assured on good authority that all the growing out of them have been withdrawn, and the Colonel is about to erect new additional quartz mills upon the river. Col. Fremont's family and household are encamped upon the top of Mount Bullion, two thousand feet above the Valley, and about forty-five hundred feet above the water, where the air is comfortable in the hottest weather.

THE MILKY WAY.—The milky way forms the greatest feature of the firmament. It completely encircles the whole fabric of the sky, and is seen in light down upon us, according to the best observations from less than eighteen millions of miles. These are pointed out in the accompanying illustration. It is more than feebly understood; but their light, the medium of measurement, requires for its transit to our earth periods ranging from ten to thousands of years. Such is the sum of the great truths revealed to us by the two Herschels, who, with their great telescope, could do but have explored every part of the prodigious circle. Sir William Herschel, after accomplishing his famous section, believed that he had gazed the milky way to its lowest depth, affirming that he could follow a cluster of stars with his telescope, constructed expressly for the investigation, as far back as would require three hundred and thirty thousand years for the transmission of its light. But, presumptuous as it may seem, we must be permitted to doubt this assertion, as the same telescope, in the same manner used, was not sufficiently powerful to resolve even the nebula in Orion. Nor must we forget that light, or only elude to those inaccessible regions, expands and decomposes in its progress, and coming from a point so remote, its radiant waves are dispersed in space. Thus, the reflection is forced upon us that new clusters and systems, whose beams light will never reach our earth, still baffle us; and that, though it is permitted to man to behold the immensity, he shall never see the bounds of creation.—Marsell's Science.

STATE FAIRS.—The following are the times appointed for the meeting of several State Fairs for the year 1859:

Table with 3 columns: State, Location, and Date. Includes entries for Illinois, U.S. Agricultural Society, Kentucky, Vermont, Western Virginia, Maine, California, Sacramento, Nebraska, Wisconsin, Pennsylvania, Canada West, Michigan, New York, New Hampshire, Georgia, Maryland, and Alabama.

HENRY WARD BEECHER ON NEWSPAPERS.—Consider how universal newspapers in America. They penetrate every nook and corner of society. No other element of power has such a sphere. The pulpit, the court, the lecture, compared with the newspaper, touch society in but few places. The newspaper in America has increased in number and circulation without limit. It reaches everywhere, is bought by everybody, read by all classes, and is wholly and generally the only reading of more than half our population. Its service to good morals and to intelligence among the people is incalculable. All the Kingdom of Europe are not so much service to the nations of Europe as the newspaper is to the American nation. Its power is growing! Who would, twenty years ago, have dreamed of such growth and power as has been developed? But the next twenty years will witness a further growth. The editor is to be the schoolmaster. The best talent will find its highest sphere in the editorial room. Already his chair is more influential than that of the bench of the platform. No fair can act so much as a daily paper. Its influence is spreading over the whole of our country. Its voice is heard in the veins of the nation.

UNPARALLELED PASSAGE OF THE LOUISIANA FALLS.—A convict of the Jeffersonville Penitentiary performed a feat of no ordinary magnitude yesterday. He was working with others near the Lowell Mills, and tired of convict life, he made a bold dash for liberty. He ran for the river, and plunging in made his way over the breakers of the falls, and reached the deep water of the Kentucky shore, landing at the foot of Sixth street. One of the guard followed in pursuit in a skiff, and another crossed on horseback. Hundreds of persons witnessed the exciting spectacle, and although the gallant exploit of the rebel demanded their admiration, justice required his person. So they apprehended him when he came out of the water, and detained him and handed him over to his pursuers. They put him on the horse, tying his legs for security, and thus in ignominy conveyed him back to the penitentiary, and the story of a party which, according to the rules of that institution, was due. The fellow's bold strike for freedom almost entitled him to win the querdon of success.—Louisville Courier, 29th.

THE ATLANTIC TELEGRAPH COMPANY AND A NEW CABLE.—The Atlantic Telegraph Company have decided to make the conductor of the next cable consist of six wires, twisted about six times the size of the old cable. There will be no outside covering of iron wire, except a few hundred miles on each end. The new cable is to be laid down, as guaranteed in all respects, and expected to be in order for early next summer.

CYRUS W. FIELD, Esq., occupies two columns of some of the New York evening papers with a full statement of the affairs of the Company. We understand that the American public will have an opportunity to subscribe to the new stock, which is guaranteed by the British Government.

WHAT BIRMINGHAM FLEET HAS DONE.—Mr. E. Meriam, of Brooklyn, states that he has kept a record of deaths, injuries, and conflagrations resulting from the use of camphene and other burning fluids used for the purpose of illumination, since July 22, 1850. Since that date he has recorded the deaths of three hundred and seventy persons and the injuries of four hundred and seventy persons. Many of the latter of whom the accounts, stated were not expected to survive the injuries they had received. The losses by fire from the fluid he estimated at upwards of one million of dollars.

A SOUTHERNER GOING NORTH TO LECTURE.—We learn that John R. Thompson, Esq., editor of the Southern Literary Messenger, has determined upon giving a course of lectures at the North during the approaching lecture season. Mr. Thompson is well known as one of the most elegant and pleasing writers of the South, is a fine and captivating speaker, a gentleman of excellent character and varied accomplishments. He will bring fresh themes and vigorous thought to a profession that needs an infusion of new life.

MATHEMATICAL IDEA OF HONOR.—A graduate of a certain college gave another the lie, and a challenge followed. The mathematical tutor of the college heard of the matter, and sent for the youth who told him he was fighting. "Why?" inquired the mathematician. "He gave me the lie." "Very well—let him prove it. He proves if you did lie; and if he does not prove it, he lies. Will you do it?" "If you did lie, will you make people believe that you did not? If you prove himself a liar, not being able to prove you one, why shoot him?" "I do not sufficiently punished? He has done you no harm; why shoot him?"

NEW PATENTS.—Among the patents issued during the last month, we notice one to a "Down East" for a pocket book that will open when it is presented. We judge it has become very popular among some of our subscribers.—Daily Delt.

LAURENCE, Aug. 16.

LATER FROM PIER'S BEAR.—The Dover city express of the 8th, arrived here this morning with a large quantity of fish. It was taken from the pier at Dover, and is said to be the best ever taken there. The fish are of a fine quality, and are much appreciated by the public. The fish are of a fine quality, and are much appreciated by the public. The fish are of a fine quality, and are much appreciated by the public.

WASHINGTON, Aug. 16.

DESTRUCTIVE CONFLAGRATION.—The extensive machine work, were burnt at 2 o'clock this morning. The origin of the fire is unascertained, but it is supposed to have been accidental. The buildings were comparatively valueless, but the machinery was very expensive, including a lathe for turning immense stone columns for the public buildings, and a large number of tools and costly machinery. The loss is variously estimated at from \$50,000 to \$80,000. No insurance.

ATTENDED ABDUCTION OF A SLAVE.—Yesterday morning Rev. M. Robbins missed from his shipyard his negro boy, about 18 years of age, and from some circumstances, not now necessary to state, he was led to suppose that the boy was on board the schooner Geo. Harris, cleared the previous day for New York. About 11 o'clock Messrs J. M. Stevenson and J. H. Plummer, with some other gentlemen went down the river in a boat. They came across the schooner about ten miles down the river. After casting the net, a thorough search was made, and the boy was found secreted under the floor of the cabin, where he had got by going through the door of the boiler.

THE BOY STATES THAT TWO NEGRO MEN came aboard the schooner, named Bill and Tom, had prevailed upon him by sundry promises to go North, and that he went aboard on Monday night about 7 o'clock. The boy together with the two negro men referred to, were brought to town by Messrs. F. S. and are now lodged in jail.

THE OFFICE OF ABDUCTING A SLAVE is a capital felony by the laws of this State. These men will get a fair trial. If they are found guilty, they will be allowed to divert the law from its due course, for the evil has grown intolerable, and patience has indeed ceased to be a virtue. W. Journal.

BLONDE OMBRE.—According to the Rochester Union, one Mr. DeLave, who lately offered to fight Blondin, a la Heenan and Morris, on the tight rope over the river, is making arrangements to beat the Niagara man all hollow. He announces that he will cross the Genesee River and Falls on a tight rope, on Tuesday next, the 15th. The Union says: "Last evening the main rope and the smaller ones for the guys were taken to the Falls. This morning the work of putting them in place commenced. The main rope is about one hundred feet long and only one thick and three quarters in diameter. It is, therefore, nearly as long as the one used by Blondin, while it is much smaller in diameter. Mr. DeLave would have preferred a rope still smaller in diameter, if one could be had of sufficient strength to make it safe. He has confidence in his ability to walk any wire on a horizontal line that will support his weight, and he says that, those who know him best, have as much confidence as he has in himself."

A CONTEST.—On Friday last Deputy Marshal Sawyer of Buncombe delivered to Mr. Jones, U. S. Marshal, the body of Jackson Stewart, formerly of Vance County, who was lately held to bail in South Carolina on a charge of counterfeiting. It appears that Stewart forfeited his bail, and was taken to this State and arrested. The Marshal and him before Judge Briggs, at Williamston, who has no doubt ordered him to jail in South Carolina to answer the charge.—Standard.

KILLED.—We regret to learn that Mr. Duncan King, senior, of Bladen County, was killed yesterday by being thrown from his buggy, in which he was driving from his residence in the lower part of said county to a Depot on the Wilmington and Manchester Railroad. His son who was with him when the horse ran away, was striking the buggy against a tree, was thrown out with such violence as to cause his death by 9 o'clock in the evening. Mr. King was 61 years of age.—Journal.

PUBLIC TAXES.—We learn that Sheriff Austin, of Union, and Sheriff Cline, of Catawba, settled with the Comptroller on Saturday, and Sheriff Flint, of Forsyth, on Monday last. The increase of receipts we learn to be about 25 per cent, on the returns last year.—N. C. Standard.

ANOTHER CASE.—The British bark Florence says the W. Herald arrived this morning from Bristol, Eng., with another cargo of iron for the Wilmington, Charlotte and Rutherford Railroad.

FROM WASHINGTON.—It is utterly untrue as stated by the London Herald that our government has abandoned the principle of free trade, on the contrary the Administration strictly adheres to its former position on the subject.

MINISTER APPOINTED.—Professor Dimitry has been appointed Minister to Costa Rica and Nicaragua.

THE EMPEROR OF RUSSIA kissed the Captain who commanded the "General Admiral" when His Majesty went aboard. Captain Comstock looked on and was spared a salute.

THE ACADEMY FIREBARRACKS.—The ceremony of laying the corner stone of the Barracks for the Hillsborough Military Academy, was performed in dueasonic order, on Saturday last, in accordance to the notice given.

QUITE A MENACE.—A witty exchange serves up the following queer hash to its numerous readers, viz: "Unbustled ladies, pure and unadorned Christians, disinterested friends, common honesty, sound potatoes, first-rate butters, unwatereed milk, and rich printers—adieu!"

MORE BALLOONRY.—The Hon. Thaddeus Stevens has offered Mr. Wise sufficient pecuniary aid to buy a balloon for crossing the Atlantic, on condition that Mr. Wise will pay no attention to M. La Montagne's challenge to race from San Francisco to the Atlantic sea-board, but turn his immediate attention towards the great European voyage.

JOHN R. DOWLING, convicted at the last term of the United States District Court at Apalachicola, for embezzling and purloining a letter from the mail, has been sentenced to two years' hard labor in the U. S. Penitentiary.

USE OF A COMMA.—A clergyman was lately depicting before a deeply interested audience the alarming increase of intemperance, when he astounded his hearers by saying: "A young man in my neighborhood died very suddenly last Sabbath, while I was preaching the gospel in a state of beastly intoxication!"

The latest and most wonderful cure effected by a patent medicine is said to be the following: "A boy had swallowed a silver dollar. An hour afterwards the boy threw up the dollar, and in all changes, principally in five cent pieces.

CENTENNIAL CELEBRATION OF THE SURRENDER OF COLONEL HENRY BURDETT.—We learn that the 100th anniversary of the taking of Colonel Henry Burdett, September 17, 1759, was celebrated at the meeting of the Maine Historical Society, held in Brunswick last week, and that the Society thought so favorably of the proposition as to appoint a committee to consider and act upon the subject.

The correspondence between the French and English in 1759, was certainly interesting to the veterans of Maine. With the fall of Quebec in the conflict for the possession of which both commanded Wolfe and Montcalm, were slain—the war vitally closed, and the people of Maine were restored to the enjoyment of the blessings of peace.

A century has since passed. What a change it has wrought! How striking the contrast! The 13th of September, 1759, witnessed one of the most brilliant and important achievements of arms; the 13th of September, 1859, will witness the virtual accomplishment of one of the greatest triumphs of the arts of peace—the completion of the Victoria Bridge and extended lines of railway, of which it is the crowning link.

The opportunity for a celebration strikes us favorably. Portland is just the place for it, and circumstances seem singularly to combine to give it interest and significance.—Portland Argus, Aug. 6.

The Cincinnati Gazette gives an account of a giant in strength, named Frank Buffalo, a colored man, who lived in that city in 1840. He was a man of medium height, with powerful shoulders, and his arms reached, when he was standing erect, several inches below his knees. This man once carried twenty-three feet a load of 1,500 pounds. At another time he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House. At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.

At another time, he carried a load of 1,100 pounds, weighing 710 pounds, he carried an anchor, weighing 100 feet below the bridge. Sam Colwell, and laid it in the Space House.
