## COIN'S FINANCIAL SCHOOL.

The New York Post, in commenting on the publication called "Coin's Financial School," says: "Our last examination of 'Coin's Financial School,' ended with some remarks on the subject of unlimited demand for an article—that is, an unlimited demand created by government. In the next succeeding lecture (page 74) we are told that Mr. John R. Walsh, president of the Chicago National Bank, occupied a seat near the front and asked the question: 'How can the government by passing a law, add a cent to the value of the commodity?' To which the following reply was made by the lecturer: 'Suppose, said Coin, that Congress should pass a law to mortgage the government of 100,000 cavalry horses of certain sizes and qualities, and the government entered the market to get these horses. Horses would advance in value, not only the kind of horses desired, but also other horses upon which there would be a demand to take the place of the horses sold to the government.' 'Here we are favored with a picture of horses as an aid to the understanding.

"This reply seemed conclusive to the audience, for it was followed by a clapping of hands, and poor Walsh had nothing to say for himself until some time later.

"Now let us test this proposition by a recent event in our own history.

"In the year 1890 the silver men in Congress said to their opponents: 'Give us a law authorizing the purchase by the government of 4,500,000 ounces of silver each month. This will create a demand and cause the price to advance.' Senator Jones, of Nevada, said it would be silver to advance to par, i. e., to \$1.26 per ounce, the price then being \$1.07 per ounce. 'Congress did what the silver men asked it to do. And what was the result? There was a brief speculation in silver. The price rose from \$1.07 to \$1.16 per ounce. The government began in the middle of August buying 500,000 ounces per month, and the price began to fall. And there was a gradual fall of the price from \$1.16 to 73 cents per ounce until October, 1893, when the purchases were stopped by the repeal of the act. This was a fall amounting to 53 cents in thirty-eight months, or a little more than one per cent. per ounce.

"Now this result is exactly opposite of what Coin taught Walsh and his other victims to expect when he spoke of the government buying cavalry horses. Why did the price of silver decline when the government's purchases increased? Because the supply increased also and the public knew that the purchases must stop some time, just as purchases of cavalry horses stop some time."

EUROPEAN wheat prospects are anything but encouraging this year, a condition of much importance to American wheat-growers. The area under wheat and rye in Russia is 30 per cent. less than last year; England, Scotland and France are severe sufferers from the winter, and Hungary and Roumania are in similar trouble. The Department of Agriculture sends out this statement, and the report shows further that European nations are imposing wheat duties that fall heavily on the consumer while protecting the grower for a product his acres fail to return in anything like sufficient quantity to meet the demand. France imposes a duty of 35 cents a bushel, Italy one of 37 cents, Germany 32 and Sweden 22. Russia has wheat to sell, and does not fear the importation of grain, but protects its flour manufacturers with a duty of 33 cents. The heaviest wheat duty is that of Spain, which country collects 55 cents a bushel, the present selling price of American wheat; but Spain must buy 15,000,000 bushels an-

ually, as the home grain growers are just that much deficient in their harvests. American grain growers have the European markets before them this year in a way that can derive a wealth of advantage from notwithstanding the heavy duties.

## Silver Monometallist Leaders.

The Journal has suggested several times that the mine owners of the west have a legitimate interest in the fight for the unlimited coinage of silver. They are seeking a market for their product. They realize that by an increase in the market they will put their silver mines all at work, boom the silver states, draw the money from the east again to the west for investment, and increase the tide of emigration to the west. They will stop the emigration which has commenced from the west to the south, and check the emigration from the middle and eastern states to the south which is setting in.

Now let us see who are most active men in this fight.

First, Joseph C. Sibley, of Pennsylvania, is their candidate for president. It is well known that he is immensely interested in western silver mines, if not personally, through his partner, Senator Stewart, of Nevada, has made his millions out of silver mines, and his chief holdings are still in them.

Senator Jones of Nevada, has long been known as the silver millionaire from silver mining.

General Warner of Ohio, can well give his time to this fight for it will add to his fortune invested in silver.

They can afford not only to give their time but to furnish money, hire committeemen, and circulate literature for the purpose of misleading the honest farmers and the people of the south, for the movement if successful will help their silver mines.

These are the men who are running what they call the bimetallic league, but what really is an organization fighting for silver monometallism.

Before this campaign is over the fact will be well understood that the man interested in the south who votes with the free silver people, will be voting for silver monometallism, voting to stop the flow of money from east and from Europe which is turning towards the south, and to send it again to the western silver states which have received it in such immense quantities for the past years; to stop the emigration from the west and from the east, which has started towards the south, and to turn it again into the western silver states.

If the fight for the unlimited coinage of silver should succeed it would then be perfectly clear that his chief result would be to add to the enormous wealth of the great silver mine owners of the west, and to build up that section by artificial means at the expense of the south as well as of all the other sections of the country.—Atlanta Journal.

## Mrs. Parnell May Die.

BORDENTOWN, N. J., April 21.—Mrs. Parnell's condition showed no improvement to-day, but, if anything, she was worse than at any time since the assault upon her. She is still only semi-conscious, and her death seems probable. There is no clew as yet to her assailant.

Rocky Mount Phoenix: Lucky finds of gold nuggets are reported from the Nash, Franklin and Warren county mines.

Warrenton Gazette: Much of the magistrates was taken from them by the late legislature and more given to the commissioners. This is a funny kind of reform.

Winston Sentinel: Messrs. A. B. Gorrell and M. A. Walker, water committee, advertise in another column for sealed bids from parties who desire to furnish a pair of the whole of 1,200,000 brick, wanted by the city.

Mount Airy News: The prospects now are that Surry county will this year have an enormous fruit crop.—The wheat is very small in size for so late in the season, but this is not a disadvantage. The stands are good, and the outlook for a large harvest has not been better for years.

Asheville Citizen: Reports regarding the '95 tobacco crop say that the conditions for planting are unusually good and that planters are busy with the work of getting the crop in. From the amount of new ground being prepared it is believed that there will be a greatly increased acreage over last year.

Last Saturday Mr. J. E. Heaver, section master on the Carolina Railroad near Wadesboro, fell from his hand car, while it was in motion, and was dangerously hurt. One of the wheels passed over his head, breaking and dislocating his jaw bone and terribly bruising his face.

Sanford Express: While in conversation with a farmer the other day, the Express was informed that some of the farmers of his community who raised from fifteen to twenty bales last year would not plant any cotton at all this year. Much of their last year's cotton land will be planted in corn.

## GLEANINGS.

### Items of Interest Clipped from our State Exchanges.

A negro straight Republican paper is to be published in Raleigh.

A colored child, born last week in Raleigh, has twelve fingers, six on each hand.

Raleigh News and Observer: The case of W. S. Barnes, Secretary of the State Alliance, who has sued ex-Congressman Crawford for five thousand dollars for libel, comes up in court here this week.

Smithfield Herald: We learn from good authority that the Legislature appointed as a magistrate for one of the townships of Bladen county a negro who died in the penitentiary two years ago.

Newbern Journal: A negro boy about fourteen years old was accidentally killed at the Blades mill, opposite Newbern, by having a long coat which he had on caught in the shafting. He was whirled around rapidly, killed almost instantly and badly mangled. The boy was named David McNeal; he belonged in James City.

Monroe Journal: The little son of Mr. A. W. Funderbuck suffered from a painful accident which occurred last Monday at the school at Altan. The child was burning some trash in the yard and a spark flew into the boy's eye. It is feared that the sight will be entirely lost.

Lincolnton Courier: Mr. J. C. Hope, of Long Shoals, tells us of a hen in his neighborhood that is 15 years old and continues to lay eggs and hatch a brood of chickens every year.

Wilson Mirror: Mrs. Boling Branch, who was stricken with paralysis about two weeks ago, died yesterday morning.

Asheville Citizen: Inquiries about Asheville continue to come in. Maj. H. C. Hunt has received a letter from Fred Ayder of Howard Lake, Minn., in which the writer asks full information about this section with a view to bringing a number of Minnesota settlers here. Maj. Hunt will send such information and advise Mr. Ayder to come and see for himself the many attractions of Western North Carolina.

Wadesboro Messenger: That the cotton acreage in this section will be reduced this year is now certain. The inability of planters to get their lands prepared, on account of too much rain, settles the question.—The farmers are further behind than we ever knew them before at this season. Cause: Too much rain and not enough sunshine. The situation is really getting serious.

Weldon News: Bass has a young set of this pullet took a notion to set. He began to cluck about the yard. Mr. Bass, in order to see what she would do, made a nest for her and put some duck eggs in it. The young hen took possession and patiently continued on the nest until she had hatched out a full nest of young ducks. She now goes about the yard with her little brood and is apparently very happy and proud of them.

Wilmington Review: Mr. W. M. Collins, manager of Mr. J. F. Garrell's Sans Souci truck farm, sent in to us to-day a bunch of Irish potatoes, to show the growth of this vegetable. There are 12 potatoes on the bunch, the largest being about the size of a hickory nut, and they are developing rapidly. With good seasons these potatoes will be ready for shipment in about three weeks from to-day say May 13th, and perhaps earlier. Mr. Garrell shipped the first potatoes last year from this section and it was on May 27th. This crop is therefore earlier than usual. It is a note-worthy fact that these potatoes were fertilized with Mr. Garrell's own manure, "Potato Special," and their growth has indeed been rapid. They are worth in New York from \$5 to \$7 per barrel, only the Bermuda crop having as yet got into market there.

### Orinoco Tobacco Guano—No More Five Cent Cotton

There is no farming on earth so profitable as raising fine tobacco manured with Orinoco Guano.

I give below a partial list of prominent farmers who used this brand, and prices obtained for the tobacco:

W. J. Jackson, Winterville, N. C.; 229 pounds, \$95 per hundred.

R. L. Daniel, Rocky Mount, 218 pounds, \$8.88 per hundred.

Geo. M. Tucker, Greenville, 200 pounds, \$98.10 per hundred.

J. O. Bryan, Battleboro, 500 pounds, \$73.50 per hundred.

200 pounds, \$83.67 per hundred.

Howard & Smithson, Battleboro, 210 pounds, \$61.56 per hundred.

M. F. Parham, Rocky Mount, 500 pounds, \$86 per hundred.

200 pounds, \$62 per hundred.

Bisco Pittman, Epworth, 531 pounds, \$39.09 per hundred.

G. A. Williams, Ringwood, 800 pounds, \$59 per hundred.

700 pounds, \$55 per hundred.

100 pounds, \$75 per hundred.

From 23 acres received \$6,000 worth of tobacco, and \$5 to the Drummond's Lightning Remedy.

I want a good live agent in every town to handle Orinoco Guano.

Also Farmers' Bone and my other brands all of which are well established. Farmers all want them: write for prices. Manufactured by

# CASTORIA

for Infants and Children.

## MOTHERS, Do You Know

that Castoria, Besterman's Drops, Godfrey's Cordial, many so-called Soothing Syrups, and most remedies for children are composed of opium or morphine?

Do You Know that opium and morphine are stupefying narcotic poisons?

Do You Know that in most countries druggists are not permitted to sell narcotics without labeling them poisons?

Do You Know that you should not permit any medicine to be given your child unless you or your physician know of what it is composed?

Do You Know that Castoria is a purely vegetable preparation, and that a list of its ingredients is published with every bottle?

Do You Know that Castoria is the prescription of the famous Dr. Samuel Fitch. That it has been in use for nearly thirty years, and that more Castoria is now sold than all other remedies for children combined?

Do You Know that the Patent Office Department of the United States, and of other countries, have issued exclusive right to Dr. Fitch and his assigns to use the word "Castoria" and its formula, and that to imitate them is a state prison offense?

Do You Know that one of the reasons for granting this government protection was because Castoria had been proven to be absolutely harmless!

Do You Know that 35 average doses of Castoria are furnished for 35 cents, or one cent a dose?

Do You Know that when possessed of this perfect preparation, your children may be kept well, and that you may have unbroken rest?

Well, these things are worth knowing. They are facts.
