GOLDSBORO, N. C., THURSDAY SEPT. 10, 1896

NO 108

### LOCAL BRIEFS

The Democratic campaign will be in full swing by September 10.

Mr. Lionel Welf has gone to attend the next session of the University at Chapel Hill.

Mrs. G. S. Prechard and the children have returned from a visit to relatives at Henderson.

A stroke of lightning killed two horses and badly shocked two boys near Morganton Sunday evening.

Mr. and Mrs. A. A. Joseph and family have returned from spending some weeks at Carolina Beach.

CAPT. and Mrs. J. C. Selow returned from spending some weeks at Waynesboro, W. Va.

The Weber piano and organ tuning company have arrived in the city again and are ready to do work in this line at short notice. Every where they go they get excellent testimonials for their work they do.

COTTON was steady and unchanged in this city to-day. Northern quotations were a few points off, but had no perceptible effect on this market. The ruling price was 7.50@7.65. The receipts were 132 bales.

AS the season advances the number of bales of cotton sold on this market increase daily, but still the receipts are far from what they will be in a few days. There were only 127 bales sold here to-day and the price was 7.50@7.65.

Dr. R. A. Smith, who has been on a visit to his family who are spending the seasons at Haywood White Sulphur Springs, near Waynesville, has returned to his home in this city. Dr. Smith's family will remain at the springs until October 1st.

Governor Carr grants thirty days respite to Frank Howard, who was under sentence to be hanged a Saturday last Friday for arson. Howard in his petition says the evidence showed only partial burning of the dwelling as the result of setting on fire of a barn 144 feet distant.

SEPT. J. I. Foust requested us to announce that he has at his disposal two scholarships offered to graduates of our graded school. One of them is offered to girls only and the other to either a boy or girl. If any one should be interested in these scholarships they are requested to see Supt. Foust in regard to them.

It is rumored that the American Tobacco Company, one of the most grinding trusts in the United States, will give \$200,000 to elect Guthrie Governor of North Carolina. This company wants Cy Watson defeated. Watson is down on trusts and they know it. He got an anti trust bill through the House in the legislature of 1893 but the Senate killed it. With Watson in the Governor's chair, things might not be pleasant for this trust.

THE people of Goldsboro have witnessed scenes recently on the floors of our tobacco warehouses that they never dreamed of two years ago. The floors have been literally covered from day to day with the "golden leaf" and large crowds of people for miles distant have been present at the sale. Those who were doubtful of the success of a tobacco market in Goldsboro have had such doubts dispelled by recent observations and are now claiming that Goldsboro is destined to lead all other markets in the State.

THE act on sales of unclaimed freight at the W. & W. freight depot in this city to-day was attended by a great many people and the bidding in a great many instances was right spirited. In some cases it was buying goods "blindfolded." There were wooden boxes that no one knew what they contained and no one was allowed to open them. In "taking a chance" at one of these boxes Mayor Hill purchased a lot of Dr. D. Jayne's medical appliances of an old date, for which he paid the sum of one dollar.

AS an evidence of the good wages paid by the Wayne Cotton Mill it may be cited that some of the loom operatives can make over \$10.00 per week. To substantiate this Mr. S. M. Waring exhibited the pay roll to-day to an ARGUS reporter and there were amounts opposite the names of some of the weavers exceeding \$10.00, which was for the current week. The mill has not yet reached its capacity on account of inexperienced help, but as soon as the operatives are educated in their work the full capacity will be turned out.

### HON. F. A. WOODARD

#### ADDRESSES THE DEMOCRATIC CLUB AT THE OPERA HOUSE.

The Tariff, Income Tax and the Financial Questions Are His Subjects for Discussion.

Daily Argus last Saturday.

The Goldsboro Democratic Campaign Club held a called meeting in the Messenger Opera House last night. A great many members were present, beside a number of visitors. After the secretaries had recorded several names that were handed in, Mr. H. B. Parker, Jr., president of the club, appeared on the stage and in a few well chosen words eloquently introduced Hon. F. A. Woodard, the Democratic nominee for Congress from this district, as the speaker of the evening.

Mr. Woodard wended his way through the large audience and finally appeared before the footlights. His appearance was the signal for an outburst of applause. He prefaced his remarks with a tribute to the Democracy of Wayne county. He then went into a detailed description of the present depressed condition of business in this country. He addressed himself first to the tariff and showed the baneful effects of the past high tariff laws of the Republican party on the country. He said that the present Republican campaign was being run on money contributed by protected manufacturers, and that a leading Republican had made that charge on the floor of the American Senate. To all those not familiar with the tariff laws and their effects on the wage-earner as well as the heavy additional cost to the consumer, the remarks of Mr. Woodard along this line were a liberal education. He showed himself thoroughly conversant with the minutest details of this question of national politics. He interspersed his remarks on the tariff with references to the income tax. This he showed to be a just tax, inasmuch as it made the man of millions bear his proportional part of the expenses of the government. With the present condition, he said, the laboring man contributed as much to the support of the Government as did the millionaire.

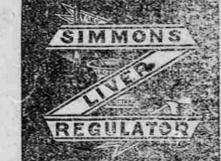

The financial question, which he discussed at length, was of greatest interest to the large audience present, and his remarks along this line were full of instruction. He spoke eloquently of the leader of the Democratic hosts, J. W. Bryan. He said that for years the platforms of the National Democratic party had demanded for the free and unlimited coinage of both gold and silver in no equivalent terms. He commended Mr. Cleveland's action in recognizing the South in the appointment of his honored sons to the Supreme court bench and other high positions in the Federal Government, but he condemned him for departing from the faith of the Democratic party in regard to the financial question.

Mr. Woodard spoke for an hour and fifteen minutes and his able utterances met with the approval of the large audience present, some of whom had heretofore claimed membership in other parties.

DIED.  
Died, in Goldsboro, N. C., Sept. 5th, Eliza Gantier, wife of Henry C. Shannon, and daughter of A. J. Galloway. "Blessed are the pure in heart, for they shall see God."

The Fire at Syracuse.  
Syracuse, N. Y., September 3.—Fire was discovered at 2:15 this morning in the Wisting Opera House. The flames spread rapidly and when they were finally controlled only the bare walls of the opera-house were left standing. Surrounding property was also damaged to a serious extent. The loss at present is estimated at about \$100,000. This is the third time that the Wisting Opera House has been burned. The property is owned by Mrs. J. M. Waring, who is insured for \$75,000 on the opera-house, and \$150,000 on the block.

Richmond, Va., September 4.—The Democratic convention for the third congressional district, completed its work this afternoon by nominating Captain John Lamb, of Henrico county.

### GOOD FOR EVERYBODY

and everyone needs it at all times of the year. Malaria is always about, and the only preventive and relief is to keep the Liver active. You must keep the Liver fit, and the best helper is the Old Friend, SIMMONS LIVER REGULATOR, the RED Z.

Mr. C. Himrod, of Lancaster, Ohio, says: "SIMMONS LIVER REGULATOR broke a case of Malarial Fever of three years' standing for me, and less than one bottle did the business. I shall use it when in need, and recommend it."

Be sure that you get it. Always look for the RED Z on the package. And don't forget the word REGULATOR. It is SIMMONS LIVER REGULATOR, and there is only one, and every one who takes it is sure to be benefited. THE BENEFIT IS ALL IN THE REMEDY. Take it also for Biliousness and Sick Headache; both are caused by a sluggish Liver.

J. H. Zeilin & Co., Philadelphia

### WATSON AND BUTLER.

#### Populist Leaders Agree on Plans of Campaign.

Atlanta, Ga., September 3.—Thomas E. Watson, the Populist nominee for Vice President, and Senator Marion Butler, manager of the Populists campaign, held a conference here to-day. They discussed plans of campaign and the situation generally. Butler wanted to get Mr. Watson's record on some points and the nominee supplied the missing links.

It was decided that Mr. Watson should go to Texas and then West on a stump tour. He will give his assistance to the Texas Populists in the movement looking to fusion. Mr. Watson also wants fusion in Georgia, on the basis of a division of the electoral vote and the withdrawal of Mr. Sewall so far as Georgia is concerned.

Speaking of the Palmer-Banker ticket, Senator Butler said that it was meant "to catch suckers who might otherwise vote for Bryan." The men who are in the Indianapolis convention will not vote the ticket, but will cast their ballots for McKinley. I think that if the press and the speakers will unmask the scheme, the ticket will draw very little support from Bryan."

Senator Butler left to-night for Washington. Mr. Watson leaves in the morning for Texas.

It is understood it has been decided that both Watson and Bryan shall be notified before September 15th, by letter or committee, as each may choose.

#### Sewall Does Not Care.

Chicago, September 3.—Chairman Jones, of the national committee has made public a letter to Wm. J. Bryan from Arthur Sewall, apparently dated July 25, at which time the Populist convention was in session. The letter, which is exciting a great deal of comment, reads as follows:

MY DEAR MR. BRYAN:—In view of the action of the St. Louis convention to-day, I cannot refrain from giving you my thoughts on the situation.

"My advice is that you have been nominated as candidate for President and Mr. Watson for Vice President. I also learn through press dispatches that you are somewhat undecided whether you ought to accept or decline. Now, I desire to say to you with the utmost frankness and good feeling that you must not allow any personal consideration for me to influence you in your action.

"I desire you will do just what you believe is best for the success of the head of our ticket. The principles we are fighting for are so paramount to any personal considerations that the latter should not have any weight or influence whatever with your action. I cannot for a moment allow myself to be a factor in any action on your part that would in the slightest degree hazard an electoral vote for you.

"With kind regards to Mrs. Bryan, believe me, your sincere friend,

"ARTHUR SEWALL  
"BATH, ME., July 25."

Tarboro Southerner: Joe Morris, a colored man, Tuesday morning while driving a wagon for J. E. Chaney fell from it at Nobles Mill. The vehicle passed over him and he died in a few minutes. He only gasped "Lord have mercy and expired."

### THE WIRE COTTON TIE

#### The Compress Association in Atlanta Refuses to Test It. But Says It Won't Do—It Would Hurt the Trust.

The Atlanta Constitution of September 3rd, says:

It seems that Colonel R. T. Nesbitt, state commissioner of agriculture, is experiencing much difficulty in exhibiting to advantage the new wire cotton tie, which his trusts can be used in place of the old flat steel tie, on which a trust has placed an extortionate price this year.

Colonel Nesbitt has worked incessantly to secure a flat tie substitute and to save the farmers thousands of dollars, but just as he decided that the proper thing had been found another serious obstacle confronts him. The trust is apparently indifferent to the cotton compress companies to the new wire tie and their disinclination to even make a test of it. So far Colonel Nesbitt has not been able to get any of the compress companies to test the tie, although he sent a half dozen of the wire ties to a compress Tuesday to be experimented with.

The ties were returned with the message that the compress company did not care to test them. It seems that the compress companies have decided that the new wire tie is not the proper substitute for the old flat steel tie, and they say that the wire tie is not acceptable. It is claimed that the tie will cut the bagging around cotton and that it will not take the place of the flat tie for several other reasons. The principal one of which is that the tie cannot be handled conveniently.

Colonel Nesbitt thinks that the tie he has now will work successfully and he has asked the compress companies to experiment with it but without success. The commissioner thinks that the tie will not be used as claimed, and that it can be handled even more conveniently than the old flat tie, to say nothing of the saving. He says that if the compress company would test the tie he thinks they would find it acceptable and entirely a fit substitute for the flat tie. He opens that the bagging of the farmers and merchants of the state demand that a fair trial be given the wire tie before it is condemned, because if it proves a success many thousand dollars will be saved to the people of the state.

Colonel Nesbitt says that the tie of large size and that it can be easily handled in being fastened around the cotton. He thinks that the compresses could use the tie with advantage and save the farmers many dollars. Many cotton growers have written Colonel Nesbitt to the effect that they are not yet buying ties, but are holding out to see what is done about the new wire tie. It was the intention of Colonel Nesbitt to have a test made of the tie, and if it is successful he would then recommend to the farmers that they buy the tie trust of Pennsylvania to extort money from them.

Dr. J. D. Turner, president of the compress association, said last night that the compress people have no prejudice against the wire tie, simply believing that it is not the proper thing to place the flat steel tie. He says that the old tie can be put on at the compresses much easier than could a round tie, which he thinks would cut the bagging and be hard to fasten.

Colonel Nesbitt has not decided just what to do in the matter. He has striven in every way possible to secure a tie which will work and result in a defeat for the tie trust, but the last obstacle thrown in his way seems to be an almost insuperable one. In the meantime the trust is making the farmers pay double price for ties over last year's prices.

### CONDENSED NEWS.

#### Happenings of Interest all Over the Continent.

Neponese, Ill., September 3.—The dead bodies of Lon Wilson, a farmer, his wife and a daughter were found on their farm last night. All were shot through the temple, and Wilson held a revolver in his hand. No cause for the tragedy is known.

Seattle, Wash., September 3.—Commander John Clark Maxwell, of the United States cruiser Detroit, at present on the China station, is dying in this city. Captain Maxwell arrived here five weeks ago on his way to Washington, and made a report on the central China missionary massacres, and was taken ill a few days after his arrival.

York, September 3.—Early this morning the shoe store of H. W. Stralis was broken into and robbed. The safe was blown open with powder. Coal oil was then used to fire the building and cover the thieves' tracks. There were about \$25 in money in the safe at the time. The damage will probably reach \$1,500. There is no clue to the guilty parties.

Harrisburg, September 3.—Frank Wolf, who resides on Colonel John Motter's farm, near Highspire, was attacked by three highwaymen last night while driving towards his home. He was pulled out of his buggy, his wife and child were taken away into an adjacent field. He had three of his ribs broken with a club. While he was concealed from the footpads in the corn field the horse he had been driving, worth \$1,000, ran away and had its neck broken. Mr. Wolf was reported in a critical condition to-day.

Washington September 4.—The Treasury gold reserve at the close of business to-day, stood at \$103,034,153. The day's withdrawals at New York were \$61,900. The Treasury circulation statement shows that on September 1st all kinds of money in the United States, outside of what is held in the Treasury, aggregated \$1,539,109,634, or \$21.48 per capita on an estimated population of 71,645,000. As compared with September 1, 1895, the circulation shows a decrease of \$64,413,634. During the month of August, however, the circulation shows an increase of \$24,266,492, made up largely from the Treasury loss of gold.

### Tutt's Pills

Cure All Liver Ills. A Strong Fortification. Fortify the body against disease by Tutt's Liver Pills, an absolute cure for sick headache, dyspepsia, sour stomach, malaria, constipation, jaundice, biliousness and all kindred troubles. "The Fly-Wheel of Life"

Dr. Tutt; Your Liver Pills are the fly-wheel of life. I shall ever be grateful for the accident that brought them to my notice. I feel as if I had a new lease of life.

### Consumption

AND ITS CURE  
To the Editor:—I have an absolute remedy for Consumption. By its timely use thousands of hopeless cases have been permanently cured. So proof-positive am I of its power that I consider it my duty to send you bottles free of charge to you, readers who have Consumption, Throat, Bronchial or Lung Trouble, if they will write me their express and postage address. Sincerely,  
V. A. SIZEMORE, 123 Pearl St., New York.  
The Editorial and Business Management of this Paper Guarantee the generous Proposition.

Richard Brown, the old reliable Carriage and Boggy Painter would be pleased to have you call to see him if you are interested in the welfare of your vehicle. Situated in rear of Sumner's Repair Shop, on John street.

Did you ever wonder what that heavy weight on one side of a locomotive wheel was there for? Anyone who understands mechanics knows a most of a counter-balance to equalize power and keep the machinery going with a steady even motion. Without it the machinery would wobble and heat out of shape. It is the same way with the machinery of the human body; it needs to go on steadily and regularly to be in good health—not by its and starts. The sudden wrenching medicines which people sometimes take to overcome constipation, give a violent strain to the intestines which weakens them, so that the goodliness is afterwards worse than before.

What constive people need is a natural laxative like Dr. Pierce's Pleasant Pellets which are powerful without being violent. They move the bowels gradually and comfortably but surely. You can regulate the dose—once, two or three times a day—exactly as you need. They strengthen the intestines to do their own work, so that after their movements have become regular they keep on naturally of themselves.

The "Pleasant Pellets" gently stimulate and invigorate the liver to that of biliousness; and tone up the stomach to secrete the digestive juices, and overcome dyspepsia. The entire digestive system is put into normal motion in the regular steady way of nature and health. This is what makes the "Pleasant Pellets" so immensely superior to the numerous purging pills which wrench and weaken the system. Druggists may get more profit out of those other pills but—*you don't!*

The "Pleasant Pellets" are tiny sugar-coated granules—40 or more in a little one-inch tightly corked, hence, always fresh and reliable.

Sent at one-cent stamps to cover cost of mailing only, under the protection of the People's Committee on Dispensary Medicine Association, No. 635 Main Street, Buffalo, N. Y.

IN NORTH DAKOTA.  
A Family that is Favored with a Well of Ice Water.  
It is very refreshing in hot weather to have an abundance of clear, cold water. Many have wells which have these characteristics, but not all can boast of such a well as described by a Hartford lawyer in the Hartford Courant. He was stopping with a family in North Dakota. It was in July, and clear, cold water—a luxury he did not frequently find—was most acceptable. The water on the table was so very sweet and so very cold that he was led to remark on his exclamation: "Yes, our well has always satisfied us, and we think we have a good thing when we can draw ice water in midsummer."  
"It certainly is as cold as ice water," said the visitor, not believing the remark was meant exactly literally.  
"No, but it's actually ice water; we'll show it to you after dinner."  
And after dinner out they went and the New England man was asked to look down. It was a small, round, brick shaft, much like the old wells seen hereabouts, and went down to an extraordinary depth. But there was a beautiful sight at the bottom. It was, sure enough, a natural ice water tank. Pieces of clear ice floated in the water, and a close look showed a thick coating of ice all around the sides for quite a distance above the water. The melting was surely slow enough down there, and the prospect was good for plenty of ice water, at least till the hot weather wassover.  
The explanation was simple enough. When the bucket is drawn a little of the water always spills or drips, and often strikes the sides of the well as it falls. In the winter—and Dakota winters are cold—this water at once freezes, and soon the entire length of the shaft is lined with ice. This thickens with an increasing rate, and it is frequently necessary to cut it away with an ax to make room in which the bucket can slide up and down. In the spring this begins to melt, and the ice falls to the bottom. The farther down, the slower is the process of melting.

### FRIDAY IN AMERICA.

#### Precedent Makes it the Luckiest Day in the Week.

Friday should be the lucky day for all Americans, for upon that day Christopher Columbus sailed from the port of Palos on his voyage of discovery. All his plans were made upon that day, and the substantial details of the long voyage were arranged on Friday. He saw the first indications of the new land on Friday, when birds visited his ships, and on Friday, October 12, 1492, he discovered land. On Friday he planted the cross on the soil of the new world. On Friday, October 19, he sent his official announcement of his return in the month of April. He entered Barcelona in triumph on Friday. On Friday, November 16, he found a cross planted by an unknown hand on a deserted island in the sea of Notre Dame. On Friday, November 20, he planted a cross in Puerto-Santo, and on Friday, January 4, he set sail for Spain. It was on Friday his fleet caught a phenomenal stock of fish. On Friday, February 16, he successfully passed through a fearful hurricane. On Friday, March 8, he received an invitation from a former enemy, the king of Portugal, to dine with him. On Friday, March 16, he entered Palos like a conqueror. Fourteen successive Fridays of such distinguishing note should make the day a lucky one.

### A Soldier's Bible.

A singular incident, which, if we remember rightly, has had several parallels in the past, was told by Capt. Macfarlane, Twenty-fifth K. O. S. Borderers, on his return to Pindi the other day. The gallant officer, who is now suffering from wounds received during the storming of the Mahalaba pass, says that while the borderers were forcing their way under a storm of shot, a man near him was hit heavily in the chest and fell to the ground. Macfarlane ran to his assistance, and on opening his belts, which were half cut away by the shot, discovered the bullet buried in a Bible, which the soldier had carried in his bosom and had thus saved his life. The man had been ill in a hospital at Pindi some time before, and one of the nursing sisters had given him the Bible—which, it would seem, is occasionally useful in carnal, as well as always in spiritual, warfare.—Westminster Gazette.

### Discouraging to a Preacher.

"Do you find your religious work to your liking?" a Montana minister was asked.  
"Well," returned the divine, slowly, "I can't say that I do. For instance, last Sunday a newly converted member of the church who sits near the door said he'd fill me full of holes if I didn't speak louder."

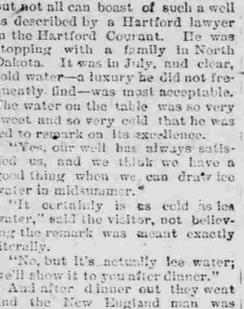

Harlem Life.

### NEW MARKET.

We have opened a market at the corner of John and Boundary streets where can be found fresh pork, beef and sausage at all times.  
W. E. Cox & Outlaw.

### Farmers' Warehouse.

COURT HOUSE SQUARE, GOLDSBORO, N. C.

### FOR SALE OF LEAF TOBACCO:

This house, recently opened for the sale of Leaf Tobacco, is now ready to handle your tobacco, having all conveniences for the planter who wishes to market his crop. We have a large grading room with a full corps of competent and experienced graders and ample stable room in the rear of the Warehouse for the use of our patrons who have to spend the night in town.

The Goldsboro Tobacco market is new an established fact with a corps of buyers representing the largest concern in the business.

### COAL AND WOOD
