Thompson's Glove-Fitting Corset!

IS SO SIMPLE IN DESIGN AND CONSTRUCTION, FUCKERS' STORE, besides being so well known, that it requires but a word of description. The secret of it all lies in substituting for gores, TRANSVERSE seams, in graceful curves, which adapt themselves to all figures, thus securing the most perfect and comfortable fit.

It is made in three or more pieces and being cut on correct geometrical principles, with transverse seams running round the body, instead of up and down, evades all strain, thus avoiding the objections urged against every other corset. The fit is perfect, for it is automatic, or self-adjusting, yielding so easily to every movement that the wearer is unconscious of any feeling of constraint:

That accounts for the fact that the "glove-fitting" corset has become a universal favorite. In the whole realm of costume no one perfected article of dress ever gained so wide a popularity so quickly and retained it so long as the "GLOVE-FITTING" CORSET. It is made in an almost unlimited variety of shapes-Children's Fine Lawn Caps at prices to suit. Ladies' Umbrellas. The Featherbone Corsets—the best on the market. Her Watch Wouldn't Go.

I peeped into her watch when she said "the old thing wouldn't go." After a hasty glance, I didn't wonder. Pasted against the inner side of the case were: 1. A portrait of her first love and a lock of his hair. 2. Some dead forget me-nots. 3. A newspaper clipping announcing her recent engagement. 4. A four-leaf clover. Between the inner cover and the works were two pictures and a receipe for cold cream. And still the obstinate thing refused to go. How is your watch running? A little slow? A little fast? Is it out of repair? If so, bring it to me and have it fixed right.
