The grass floor matting you put on the floor of our factory exhibit in the Maunfacturers' Building, has proven perfectly satisfactory in every way. We had ten girls working on sewing machines in the exhibit for five months, and where their chairs were pushed back and forth over the matting it shows no perceptable wear. It also held its color well, and after five months wear seems as good as new. We cheerfully recommend your matting as the best we have ever used.
