KILLING BABIES.

The National Association of State Dairy and Food Departments recently met in Chicago, and papers read betore it relative to the effects of the adulteration of foods went to show that 450,000 babies are each year killed by the millonaire concoctors of poisoned foods. Boric acid, formalin, salicylic acid and a dozen other poisons are employed in the factories that prepare canned and other foods, Mr. Geo. Hooks and Miss Effle and the infant digestive organs are Swinson spent Sunday at Pikeville, not equal to the tasks imposed upon them-imposed up on them for the

sake of gain. It is not possible to state just what truck is badly damaged. Most all proportion of infant deaths in this country are due to adulterated food prepartions, but it is known that 450-Mr. B. F. Sugg, of Washington, 000 babies died each year on account of intestinal and stomach complaints. any community to become accustom- his way to Chadbourne. We were Be the number killed by adulterated foods more or less, it is due the public Miss Bessie Swinson goes to your that no infantshall be murdered in an bar rooms to prohibition that, for a city next week, where she is to take open manner in that way. In the a position with the Southern Bell countries of Europe the consumer is less of posed to prohibition, and con- Telephone Company. Our commun- protected against hidden poisons in food preparations. The laws are strict, and they are enforced. We need pure food laws. Congress

> attempted to pass one at the last regular session, but the interests assailed readily defeated it. And yet the consumer in this country has a right to know when the canned tomatoes he buys are colored with aniline dyes, when copper is used in his canned peas, when the milk he purchases for his babies' use has been treated with formalin or boric acid. The poison trade runs all through the list of foods, and it is well nigh impossible in this country to buy pure foods. All the people ask is that the names profitably at 7 cents, with \$200.00 and quantiteis of poisons used be mules, and everything else high in plainly printed on the package, but this is just what the manufacturers We see an effort is being made to will not permit, because it might lesid the State of ticks. If this is done, sen their profits. They prefer to go
