New York, Oct. 9.—Jefferson P. Raplee, once a wealthy banker and business associate of Jay Gould, Commodore Vanderbilt and John P. Blair, went to the poor house here today.

Washington, Oct. 9.—The census bureau has issued a bulletin showing the production and distribution of the cotton of the United States available between September 1, 1904, and September 1, 1905, to be 14,457,994 bales. Of this about 61 percent was exported, 39 percent was used in domestic consumption, leaving a surplus of 50 percent.

Norfolk, Va., Oct. 9.—Mrs. Elizabeth C. Daniel of Barbours, N. C., died at the Sarah Legh hospital yesterday and her remains were this morning forwarded to her home for interment. She was 55 years of age and a widow. She had been in Baltimore for treatment and returning home, having been relieved of the trouble for which she went to that city. Just before the time for the train to leave here last evening, four days ago, she was taken ill with another trouble and was carried to the hospital, where she died of bronchial pneumonia.

New York, Oct. 9.—In the second lecture for the Fall of 1905 today only three names were chosen to receive tablets in the new building in which the canvassing was done. Those of John Greenleaf Whittier and James Russell Lowell in the case of authors and that of General William T. Sherman in the case of soldiers. Among the defeated were Oliver Wendell Holmes, Elgar Allan Poe and James Fenimore Cooper, William Cullen Bryant, Francis Parkman and John L. Motley, Horace Greeley and George Bancroft.

Washington, Oct. 9.—A climax was reported today in the case of former internal revenue employees, which are pending before the United States district court at Greensboro. In response to a request from government officials at Greensboro, the department of justice decided to send counsel to Greensboro to assist District Attorney Kaiton in a prosecution of these cases, if after investigation, such a course at this time should be deemed both desirable and necessary. Arthur B. Hays, solicitor general in the internal revenue department, was selected for the assignment and left tonight for Greensboro. He will confer with District Attorney Kaiton, and he is also authorized to make a special investigation of the entire situation, so that the department here may determine what course shall be pursued with reference to these cases.

It begins to appear that the New York Life Insurance company will be debarred from Texas after December, when the permit of the company to do business in the state will expire. While Texas feels especially aggrieved over the fact that Mr. McCall, a democrat, contributed so liberally to the republican slush fund, of other people's money, the Houston Post scores a point against him that is destined to make Texans even more wrathful than they are at present. The Post points out that on the occasion of the Galveston disaster in 1900, during the year of Colonel Bryan's last candidacy for the presidency, Mr. McCall was asked to help the storm sufferers. That worthy magnate forthwith pulled a sanctimonious mask and stated with "regret" that the money of the New York Life was a trust fund, to be administered for the benefit of widows and orphans, and he had no right to give any of it away for a charitable purpose. Wouldn't that a wake policyholder red-headed?

OSMAN STOCK COMPANY.

The Popular Favorites Opened
Week's Engagement at The
Messenger Opera House
Last night.

"Down Mobile" was presented at the Messenger Opera House last night by the Osman Stock Co., in a manner entirely satisfactory to the large audience present. There was almost a continuous performance from the rising of the curtain to its fall on the thrilling and exciting scenes of last act. So closely were the specialties interwoven with the play, and such a string of orchestra accompanied sweet and inspiring music during the short intermissions; and so there was not a dull moment nor one which did not find the audience rejoiced in some pleasing manner during the hours that ticked by so quickly.

Every member of the company has unusual talent and the thrilling melodrama was highly enjoyed as evidenced by repeated encores.

Helene Reicha was greeted with enthusiastic applause when she first appeared and was recognized by her many admirers present. She has grown more graceful and charming, if possible, since her last appearance here, and in her difficult role last night won new laurels and admirers.

The specialties were unusually interesting and a decided novelty to the patrons of the Messenger Opera House. Judging from the creditable performance last night, the Osman company will no doubt be greeted by large audiences throughout the week, and surely they deserve a liberal patronage at the hands of our people, for no cleverer or refined repertoire company has ever visited our city.

HANDS CRACKED AND PEELLED

Suffered for One Year—Water
Caused Agony, Heat Under Pain—
Grew Worse Under Doctors—
Could Not Do Any Housework.

ANOTHER WONDERFUL CURE BY CUTICURA

"About a year ago my hands began to crack and peel. I tried many remedies, but they grew worse all the time. At last they came so sore that it was impossible for me to do my housework. I put my hands in water, I was in agony for hours, and if I tried to cook over the stove, the heat caused intense pain. I consulted a doctor, but his prescriptions were entirely useless. I gave him up and tried another, but without the least satisfaction. About six weeks ago I got my first relief when I purchased Cuticura Soap and Ointment. After using them for a week, I found my hands entirely well, and my hands were becoming to feel much better. The deep cracks began to heal up and stop itching, and today my hands are entirely well, and I can do my housework. I feel like a new man. (Signed) Mrs. Minnie Drew, 18 Dan. St., Roxbury, Mass."

ONE NIGHT TREATMENT For Sore Hands and Feet with Cuticura

Soak the hands or feet on retiring in a strong, hot, creamy lather of Cuticura Soap. Dry and anoint freely with Cuticura Ointment. The result is a relief that is permanent. The night's rest is a blessing. (Signed) Mrs. Minnie Drew, 18 Dan. St., Roxbury, Mass.

Elizabeth City Goes Dry Again.
Elizabeth City, N. C., Oct. 9.—Election for or against saloons held here today and city went dry by 16 majority. Two years ago city went dry by larger majority, but 126 saloon men were disfranchised at that time and they voted in full force this time. Prohibitionists claim great victory.

NEW YORK REPUBLICANS WANT A CANDIDATE FOR MAYOR.

Senator Elburg and Page Have
Both Declined Offers, But One
of Them May Yet Be "Draft-
ed" and Compelled to Run.

New York, Oct. 9.—Following the declination of Charles E. Hughes to run for mayor on the Republican ticket, Mr. Young, who was nominated for comptroller, has also declined to run. Mr. Young formally and openly declined the nomination for comptroller, and informally, and privately and emphatically told the members of the notification committee that he would not run for mayor, either.

Senator Elsburg, who also was asked today to make the run for mayor, told Mr. Halpin that for many family reasons he could not do so. Mr. Elsburg's friends said tonight they could not figure out what these family reasons could be. He is a bachelor.

The report was circulated tonight that Senator Page was to be drafted. Late this afternoon Mr. Page and Mr. Halpin had a long talk. At the close of confab Mr. Page said he had not been asked to head the Republican ticket, but one of his friends, who is also a Republican district leader, told a reporter that not only had Mr. Page been sounded, but that he had excused himself on the plea that he was not fitted to serve the public in city hall. The belief was held to-night that either Senator Elsburg or Page would be drafted, and made to run.

MR. ROOT AND CHINA'S BOYCOTT.

Secretary of State, Elihu Root has taken active charge of the department to which the President appointed him soon after the death of Mr. Hay. His vacation is ended, and he is not doubt ready to get down to hard work. He is an untiring worker.

He will find an accumulation of matters of importance, including the Castro friction, the recognition of Norway, the situation created by the Russo-Japanese war, and other problems that have arisen or are about to arise in our dealings with the outside world. But no subject that will come before Mr. Root will outrank in importance to this country the Chinese boycott on American goods. Let us hope Mr. Root will give that subject prompt and ample attention. It needs it, and the interests of the country call for a solution of the problem.

Ture, Fall River is not so deeply interested as are the southern mills in the Chinese demand for American cottons. But there is nothing sectional in the question. The national exports are involved, and if coarse cottons made in the South are boycotted, our exports of cotton goods will show a discrepancy. Some plan is needed that will satisfy the reasonable desires of the Chinese as well as their high-cost travelers, and that will lift a retaliatory boycott from the products of the southern mills.

COTTON INSURANCE.

Forty-three strong fire insurance companies, the best in the business, have combined for the purpose of insuring cotton in transit or in warehouses while en route to destination. Risks will be written from the interior point of shipment to the destination, thus antagonizing the marine insurance companies. Risks will be written, too, without limit on cotton placed in warehouses near the farm. No offered risk will be too large for the forty-three associated companies to take.

It is believed this change will lead to the building of many more warehouses at interior points, for cotton can hereafter be well insured when placed in such warehouses. By building a warehouse the producer can take advantage of insurance to as full an extent as they could in the case of cotton in a port warehouse.

When the farmers see that they can secure a large sum of money while holding their product, they will club together and build warehouses. The cotton business is, in fact, being rejuvenated in many ways this year perhaps after a while all the advantages of commerce will be brought to the very door of his own property.

NEW ALLIANCES IN EUROPE.

The Anglo-Japanese alliance is very distasteful to Germany, and it is considered by Russia, against which country it may be said to be directed. It is also levelled at the Shantung peninsula. The anti-Chinese of both Russia and Germany have been nipped in the bud, so to speak, and both are irate.

So both have formed or are trying to form, an alliance in opposition to that of the two insular powers. They propose to ask Italy and Austria to join the new combine. France and England have practically become allies, and France will not therefore join the Russo-German scheme. The control of the sea is conceded to the two insular countries, but the new combine hopes to control of even the land will be doubtful if France and England join hands, and they certainly will if they are left out of the scheme that the Kaiser and M. Witte are concocting.

There is really no harm in the Russo-German alliance, and not much good, whereas the Anglo-Japanese alliance preserves China, and opens that country to the trade of the world.

The war that Japan fought out is changing the relations of the world. All of the recent alliances are products of that war, and effects of that remarkable struggle will be felt to the end of the century.

Letter to Goldsboro Furniture Company.

Goldsboro, N. C.
Dear Sir: The way to reckon the cost of paint is to put both costs together: the cost of the paint and the cost of putting it on.

It would save this country hundreds of millions of dollars a year; it would save you alone (if you happen to be a victim) several dollars a year.

See how it works. It costs as much to put-on one paint as another, don't it? Yes, if you use the same number of gallons.

Well, don't it? No, you'll use twice as many gallons of adulterated paint as of Devco; and you've got to pay twice as much for putting it on.

Mr. N. Avery, Delhi, N. Y., has two houses alike and in same condition. Painted one house with Devco; 6 gallons. Painted the other house with a paint that was half adulteration; 12 gallons. Same painter, Geo. Gilbert, did both jobs. One cost \$27; the other \$24.

Better go by the name.
Yours truly,
F. W. Devco & Co.
P. S. Smith & Yelverton, sell our paint.

EXTENDING THE MONROE DOCTRINE.

President Monroe's doctrine of 1823 was directed solely against territorial aggression in the Americas. It was aimed more particularly at the Holy Alliance, which particularly detested republics or popular rule of any sort. The Spanish-American countries were at the time engaged in throwing off the rule of Spain, and the Holy Alliance preferred Spain in the contest. President Monroe fired his famous doctrine at the coalition that grew out of the Napoleonic wars, and England seconded the shot and the Americas became free and independent.

Down to the present century the doctrine that bears President Monroe's name was understood to mean that no European country would be permitted by this country to acquire additional territory in the Americas. It meant this, and nothing more, and no party has in a national platform given it a wider meaning.

It is now proposed, however, to widen it so that this country will assume a practical protectorate over all the territory from the Rio Grande to the Horn, making us directly responsible for their finances and their police administration.

One trouble with the new doctrine consists in the opposition of the republics to the south of us to the acceptance of any such control on our part. They are wholly willing to have their political independence guaranteed by Uncle Sam, but they are not willing to accept dictation or dictation in their internal affairs.

The new doctrine has endless complications shut up in it, of which Santo Domingo is but a small example. Congress will be asked this winter to consider the problem extended by Santo Domingo, and no doubt the scope of the proposed extension of the doctrine of 1823 will be discussed.

It certainly should be. If we are to take over the countries to the south of us, the business should be done openly and above board, and the polls be ratified by the people at the polls by first becoming a leading national issue.

OLD SORES OFFENSIVE-DANGEROUS

Nothing is more offensive than an old sore that refuses to heal. Patiently, day after day, it is treated and nursed, every salve, powder, etc., that is heard of is tried, but does no good, until the very sight of it grows offensive to the sufferer and he becomes disgusted and morbid. They are not only offensive, but dangerous, because the same germs that produces cancerous ulcers is back of every old sore. The cause is in the blood and as long as it remains the sore will be there and continue to grow worse and more destructive. The fact that thousands of old sores have been cut out and even the bones scraped, and yet they returned, is indisputable evidence that the blood is diseased and responsible for the sore or ulcer.

Some years ago my blood became poisoned, and the doctor told me I would have running sores for the rest of my life, and that if they were closed up the result would be fatal. Under this discouraging report I left off their treatment and resorted to the use of S. S. S. Its effects were prompt and gratifying. It took only a short while for the medicine to entirely cure up the sores, and I am not dead as the doctors intimated I would be, neither have sores ever broken out again. JOHN W. FORDIS, Wheeling, W. Va., May 26, 1903.

Valuable time is lost in experimenting with external treatments, such as salves, powders, washes, etc., because the germs and poisons in the blood must be removed before a cure can be effected. S. S. S. cleanses and purifies the circulation so that it carries rich, new blood to the parts and the sore or ulcer heals permanently. S. S. S. not only removes the germs and poisons, but strengthens the blood and builds up the entire system by stimulating the organs, increasing the appetite and giving energy to the weak, wasted constitution. It is an exhilarating tonic, aids the digestion and puts every part of the body in good healthy condition. Book on the blood, with medical advice, without charge.
