REDUCTION IN TELEGRAPHIC RATES.

On and after the 1st October, says

the Raleigh STANDARD, the rates of te-

legraphic dispatches will be materially re-

duced. The telegraph has become an

indispensable institution, and the cor-

rectness and promptness with which it

transacts all business entrusted to its

care, is highly commendable.

From Raleigh to New York, the pres-

ent rates are, for first 10 words \$1.75,

and 25 cents for each additional word.

The new rates will be, \$1.50 and 9. To

Boston, \$2.35 and 15—new, \$1.85 and 12. To Baltimore, \$1.30 and 9—new

\$1.05 and 7. To Washington \$1.25

and 8—new \$1.05 and 7. To Char-

lotte \$1.25 and 8—new 75 and 5. To

Wilmington 75 and 5—new 65 and 4.

BUSINESS.—Within the past two weeks Goldsboro has had somewhat the appearance of a business town. Wagon and cart loads of cotton are constantly brought to market; also, other produce are coming in more freely, and our merchants—especially those who advertise in the columns of the MESSENGER—are busy as a "bee." A word to our country friends: a glance over our advertising columns will be to your advantage in disposing of your cotton, &c.

The very latest styles of Ladies' and Misses' Hats can be found at Mrs. Einstein's Millinery Emporium.

LOVE, says an exchange, has a thousand modes and forms, all of which may be consistent with reality and truth.—It may come like the morning light, kindling the whole soul into life and radiance; it may grow insensibly and unknown, until its roots are found to be through and through the heart, entwined with its every fibre; it is unreal and false only when it is a name for some form of selfishness.

DEMESTRE'S YOUNG AMERICA.—This bright little Magazine is as full of good things, and as great a favorite with the children as ever. One of the causes of its popularity is because it enters right into the children's occupations and amusements, and makes itself a part of them. We recommend it to all parents who wish to procure a juvenile periodical which combines much and varied instruction with amusement and great originality. \$1.50 per annum with premium. Address 838 Broadway, N. Y.

Messrs. Powell & Co. are selling dry goods, clothing, shoes, groceries, hardware, &c., at the lowest prices in the corner store recently occupied by Mr. Garry Edmundson.

A QUESTION ANSWERED.—It has often been asked whether it would be possible for a man to swim in oil. The question, says an exchange, was practically solved, the other day, by a workman employed in an oil manufacture of New Jersey, who flung a tank of olive oil nine feet deep. He was an expert swimmer, but he went to the bottom like a plummet, and was only saved from drowning by the timely aid of a comrade. Oil is too light to swim in; it is not sufficiently buoyant, and does not offer the resistance necessary to keep a man afloat.

Messrs. Powell & Co. are now DAILY receiving new goods, especially selected for this market, which they sell at fabulously low prices. Call and convince yourself.

DRIVING A YOUNG HORSE.—In teaching a young horse to drive well, do not hurry to see how fast he can trot.—Keep each pace clear and distinct from the other; that is, in walking make him walk and do not allow him to trot. While trotting, be equally careful that he keeps steady at his pace, and do not allow him to slack into a walk. The reins, while driving, should be kept snug; and when pushed to the top of his speed, keep him well in hand that he may learn to bear well upon the bit, so that when going at a high rate of speed he can be held at his place, but do not allow him to pull too hard, for it is not only unpleasant, but makes it often difficult to manage him.

All who are in want of clothing, hats, boots and shoes, should call at H. Weil & Bros. and examine their stock and prices before purchasing elsewhere.

FINDING A NEW HOME.—An exchange has the following allegory, which we commend to careful consideration: "A certain man hit his toe against a pebble, and fell headlong to the ground. He was vexed, and under the influence of anger and self-sufficiency, he kicked mother earth right saucily. With imperturbable gravity, he looked to see the earth itself dissolve at once to naught. But the earth remained, and only his poor foot was injured in the encounter. This is the way of man. An article in a newspaper touches him in a weak spot, and forthwith he sends to stop his paper. With great complacency he looks to see the crash, when he finds he only hits his own toe against a world that does not perceptibly feel the shock, and injures no one but himself."

PAPER CLOTHING.—Some ingenious individual has invented a new textile for manufacturing wristbands, cravats, vests and even pants and coats for summer wear. It is nothing more nor less than common paper, strengthened and made of any color, shade or figure, by means of a chemical preparation. The sagacious inventor is confident that by an-

other summer he will have our whole population dressed in paper outfits; that not only will our ladies be sporting paper dresses, but gentlemen will be rigged out from tip to toe with paper garments. The English papers state that a similar invention has just been brought out in that country. It will certainly be comfortable, not to say amusing, when we shall be able to go about the streets done up in newspaper, and nothing else. Verily, the millennial summer draweth nigh.

A FULL LINE OF FALL AND WINTER DRESS-GOODS—beautiful styles—for sale at low figures at H. Weil & Bros., in the Carrington building.

THE HASWELL CASE.—The case of Henry Haswell, charged with the murder of O. R. Colgrave, in May last, was disposed of at the term of Jones County Superior Court, last week. The counsel for the State entered a NOLLE PROSS, and Mr. Haswell was discharged. The arrest of Mr. Haswell was a farce from beginning to end and we have no doubt that all who took part in it are heartily ashamed of themselves.

Would it not be well if some of the loyal officials of Jones county, would now make an effort to arrest the negro fiends who burned this poor man's house, while he was lying in jail under a false and trumped-up charge? While every honest man will say it should be done, yet we are convinced that no steps looking to such a result, will be taken. Were Mr. Haswell a radical the case would be entirely different.

SINGULAR SIGHT.—In a circuit locality of this city, there has been considerable complaint of late that cows have been milked by persons who had no right to milk them. Those who thought themselves imposed upon thereby began to look suspiciously upon certain of their neighbors, who ereputations consequently underwent a rapid decline.—But a diversity was made this morning by one of the losers, which placed the characters of the suspected parties in a more favorable light. Soon after leaving home for his place of business, about four o'clock, his attention was attracted by a cow sucking a large, fat hog engaged in sucking a cow, which was lying down. The bovine seemed to think the matter all right, and remained perfectly passive. The porcine soon transferred its propulsive to another cow, which did not seem to relish the operation quite so much, and manifested its displeasure by getting up and moving off. The hog then returned to cow No. 1, and resumed business with a grant of evidence satisfaction, only to be driven away, however, by the proprietor.—MU CATINE JOURNAL.
