Newbern Journal: Mr. J. V. Williams, whose wife, by the way, is a relative of Gov. Jarvis, has received a letter from the Governor, bearing date January 29th, in which he writes that it is mid-summer in Brazil, and that the corn and cotton are in full bloom. It is a pleasure to behold trusty officials, and in this connection we take this opportunity to compliment Col. Geo. W. Collier upon the efficient manner in which he has overhauled so-called insolvent tax-payers who are able to pay their taxes, but never do so. He has already increased the school fund this season by more than \$200, and there is more to come yet. The Colonel is always prompt and conscientious in discharge of his duties. Other justices might emulate him in the discharge of their official duties.

Prof. Lewis Boss, of the Dudley Observatory at Albany, N. Y., has made the discovery that the comet seen at Paris on the first of December is slowly increasing in brightness. The increase will continue slow until April 1, when it will begin to match the rapid, and by the middle of the month will become visible to the naked eye. Two weeks later it will reach its maximum of brightness, when its appearance will be much like that of 1882, and be visible all night. It will also, as that of 1881, be seen in the Western sky. When nearest the earth it will only be 12,000,000 miles distant. It will retain its brightness until May 15, when it will gradually fade from the vision to appear later to the people South of the equator. The Barnard comet is also discovered to be increasing in brightness but will not become visible to the naked eye.
