

THE KNIGHTS OF LABOR.

The Color Line Causes Trouble at Richmond.

(New York Sun, Sept 27th.) Sixty delegates of District Assembly 49, will attend the General Assembly of the Knights of Labor in Richmond, Va. "Every Knight of Labor," said one of these delegates yesterday, "when he enters the Order knows that his obligation makes him disregard the color, creed, and nationality of his fellow members."

DISEASED CATTLE.

What Veterinary Surgeons Think About the Matter.

CHICAGO, Sept. 28.—The opinion among veterinarians and distillers becomes stronger daily that the disease now affecting some of the quarantined cattle has been prevailing to a greater or less degree for at least two years. The distillers say that the cattle more have attributed the disease condition of the lungs to the hot slops on which the cattle are fed.

The members of the commission and the state veterinarian were telegraphed for last night to go to Pekin, where they have been summoned to appear as witnesses in a civil suit brought against the state, and to-day's proposed meeting to settle the question of disposing of the quarantined cattle was indefinitely postponed.

The state veterinarian yesterday killed two glandered horses in this city by order of the live stock commission.

MANHAN, D. T., Sept. 28.—Pleuronia pneumonia has broken out in a herd of cattle belonging to W. J. Etherington, twenty-five miles north of here. Ten have died and forty more are affected. It is said that a carload of cattle was brought there from Chicago two weeks ago. The local board of health is preparing to quarantine.

WASHINGTON, Sept. 28.—Commissioner Colman, of the bureau of agriculture, has received a letter from Dr. Salmon, dated Chicago, Sept. 25, in which he says, in reference to the outbreak of pleuro-pneumonia at that city: "Since telegraphing you I have had the watch strengthened at the infected stables to prevent animals from being removed."

PREPARING FOR THE KNIGHTS.

A Tent Camp to be Set on Capitol Square.

RICHMOND, Va., Sept. 29.—The committee to prepare for the reception of delegates to the general assembly of the Knights of Labor here on October 4th are doing their best to furnish accommodations. Large excursion parties will come from Baltimore, Washington and other points, which will swell the crowd and make it difficult to entertain all at the Richmond Knights would desire.

Real Estate Mortgages and Deeds for sale at the MESSENGER office.

A HEAVY RAIN FALL.

A Fall of Twenty-Six Inches of Rain in Five Days.

BROWNSVILLE, Tex., Sept. 28.—On the 21st and 22d of September, this section was visited by heavy and destructive rains, followed by a severe hurricane, which flooded the whole country and did much damage. The rainfall was, unprecedented, twenty-six inches of water falling in the five days up to noon on the 23d.

COUNTY GOVERNMENT.

(Hickory Press.)

What is the objection to the present system? Are not the affairs of the counties east and west well managed under it? We believe that the general verdict is that they are better managed than they were under the system introduced by the Republican party, which was based on suffrage.

To put the power of fixing the tax levy, of taking care of the paupers and of the public buildings, of purging the courts, and of making out contracts of making allowances to the public officials outside of the specific allowance made by law, of opening public roads, of determining on the goodness of official bonds, are functions requiring men of business tact, of financial skill, of probity, and of great general intelligence.

RIOTING ABROAD.

Serious Disturbance in Paris and an Anarchist Outbreak in Leipzig.

PARIS, Sept. 28.—A riot took place today during the unveiling and dedication of the statue of Armand Blanc at Caroussoum in the department of Aude. The committee having the ceremonies in charge were nearly all Moderates. The revolutionists became provoked at this predominance in case of such a conspirator as Barbes, whom they regarded as one of their creed, and attempted to control the demonstration themselves.

SERIOUS DANGER.

Threatens every man, woman or child living in a region where fever and ague is prevalent.

Physicians say that there is no remedy for consumption. In some cases this may be correct. We know however of many cures made by Dr. Ball's Cough Syrup, and we will guarantee relief.

A sensible woman will not fail to keep a bottle of Salvation Oil on hand for men's cuts and bruises.

SUMMER GOODS.—Refrigerators, Ice Cream Freezers, (White Mountain) will be sold cheap at FUCHS & KERN'S.

MAKING BIG GUNS.

Important Changes in the Navy Ordnance Department.

WASHINGTON, Sept. 27.—On Friday of this week an important event in the history of the American navy will occur in the transformation of the navy yard in this city into a naval gun factory. The full realization of the plans of the Secretary of the Navy will of course take years, but on the 1st of October the formal transfer of the yard to the ordnance department will be made, and a long step will be taken in the direction of the establishment of a first-class gun factory, about which boards have been reporting and secretaries recommending and Congressmen wrangling for years.

On the other hand, the ordnance department of the army is supposed to consist of professional experts. It is a permanent corps, filled by details of selected line officers, who, once in the corps, never leave it. Growing out of the permanent character of the army ordnance corps there have been for years rumors of a clique in the corps that controls it, that refuses to have anything to do with outside inventors, and that by an inordinate opinion of its own skill and the value of its own inventions keeps the corps from making any progress.

In the late session of the Congress Mr. Randall successfully opposed the grant of a large appropriation for any ordnance, because his proposition to have the money expended by a commission or board, instead of by the ordnance corps, was ruled out on a point of order, and he declared that there was a ring in the ordnance corps that he would not trust with the expenditure of money in making guns.

This while the army ordnance corps has made no progress since the war, the navy has succeeded in starting a very respectable gun factory, and the secretary has money enough at his command to add largely to its plant and facilities, and as a preliminary step all the bureau staffs of that ordnance will this week leave the Washington yard. In past years a good deal has been done at this yard in the way of sinking anchors, chains, and other metal articles of equipment. The plant for this work will be removed to the Boston yard, where there are already large equipment shops. The boiler works will probably be removed to Brooklyn, though they may go to Norfolk. The secretary's policy is to have all repairing done at these two yards.

WIGGINS DENIES AND EXPLAINS.

OTTAWA, Ont., Sept. 28.—Wiggins to-day issued the following address: To the People of the United States:

The prediction published in the New York press, and asserted to be mine, that a great earthquake will devastate New Orleans, Galveston, and other Southern cities along and south of the thirtieth parallel, on Wednesday, the 29th inst., is a falsehood. It was originated here by their own correspondents and for their own purpose. I never received any reward except ungranted thanks for my weather or other predictions, my sole object being to protect public property and save human life, and in this I have treated the United States, the home of my ancestors, the same as my own country. Two years ago I foresaw that a great storm would occur in the North and South Atlantic from September 23 to October 1, 1886, and that an earthquake would occur in America from August 25 to September 15, the greatest strain being on September 29, south of the thirtieth parallel of north latitude, and so made my report to the Canadian Government. This is the sum and substance of my prediction and of my knowledge on the subject, and the newspaper talk of devastation of States, swallowing up of cities, and of ruin generally has originated with the New York press, for their own advantage and to frighten religious and other lunatics throughout the United States, at the same time abusing me personally. After having saved the lives and vessels of the Gloucester fishing fleet in March, 1883, when the Hull fishing fleet, which I thought you would not see, lost, I think you will say I am deserving of better treatment. But this will not again occur. Only one newspaper in New York, which I will select, will in future publish my predictions, and then only over my own signature. The New York Herald gibes at my name, but it should remember that it was a Governor of Massachusetts, a Wiggins, and my own ancestor, who first raised the standard of American freedom.
