

THE GLEANER.

GRAHAM, N. C., MAY 4, 1882.

J. D. KERNOLLE, EDITOR.

THE PRESS CONVENTION.

We are in our sanctum again, after a whole week's absence. We boarded the train at this place on the 23rd ult., and to our delight found a number of the brethren of the Press on en route to Elizabeth City.

The Chowan belongs to the Albemarle Steam Navigation Company, of which Capt. J. H. Bigart is president, and a more clever, kind and hospitable gentleman than Capt. Bogart is not to be found.

Half of the party stopped at Avoca and the other half went on to Edenton, the writer of this being of the latter half. Early Tuesday morning it was in order to put off to the fisheries.

The seine is carried out and dropped by two steam tugs used for the purpose. They go out together, and when they are out far enough, a mile or more—they separate a half mile or more and then turn in for the banks.

The first number of the New South, published at Wilmington by Mr. Oldham, has been received. It is neatly printed and well gotten up.

Instructive papers were read at the Press Convention by Colo. Chas. R. Jones, R. B. Creecy and J. D. Cameron.

The municipal elections in the larger towns and cities of the State resulted in Democratic favor.

Now for a very short synopsis of the proceedings of the Association. The members of the Press met at the Opera house at 8 o'clock Wednesday P. M., and were formally welcomed.

On Thursday the Association met and transacted the business claiming attention. G. Sam Bradshaw was elected president, R. B. Creecy, J. W. Goslin and Frank Powell, vice-presidents.

at the Albermarle House was the event of the occasion. Gallant men and lovely maidens "tripped the light fantastic" to soul-stirring strains of sweet music till roses dawn warned them it was time to close their revelry.

The supper must not be passed unnoticed. It was sumptuous and the well laden tables fairly groaned beneath their tempting burden, and we risk nothing in saying that all did it ample justice.

Friday morning the Association held a short session and adjourned to meet at White Sulphur Springs, Haywood County, next year.

Resolutions were passed thanking the railroad and steamboat authorities for the courtesies extended, and the citizens of Avoca, Edenton and Elizabeth City for their kind hospitality.

We left Elizabeth City Friday afternoon en route for home, returning by way of Portsmouth and spending a day in Suffolk.

This trip will long be remembered with pleasant recollections by the members of the Press. North Eastern North Carolina has not long been open to the world by railroad, nevertheless it is a grand glorious part of our commonwealth.

We would like to write more about this section but the lack of space forbids.

At last Mr. Cooper has been confirmed collector of the sixth district. When his name was first voted on the result was adverse to his confirmation, but a motion to reconsider was entertained later.

Mr. Best's financial ability has been fully verified and to a degree that none need longer doubt. He has mortgaged twenty miles of unfinished railroad and ten times as much "Air-line" for \$10,000,000.

Railroad communication is at last established between Tennessee and North Carolina. The railroad from Wolf Creek to Paint Rock, connecting the Western N. C. Railroad with the Tennessee system was completed last Saturday.

The first number of the New South, published at Wilmington by Mr. Oldham, has been received. It is neatly printed and well gotten up.

The municipal elections in the larger towns and cities of the State resulted in Democratic favor.

HOUGHTON FARM, N. Y.

Thinking perhaps some of your readers would like to hear from me through the GLEANER, and knowing that a large majority of the Albemarle people are interested in whatever pertains to agriculture, I will give a brief description of Houghton Farm, and farming. Here, North, farming in its different forms is one of the leading industries, and men of wealth are taking hold of the matter in earnest, and are introducing whatever will add to or promote the cause of agriculture. Houghton Farm is an institution established for this purpose.

ing and saving manures, and the most economical way of handling crops, and so on. Dr. Miles has entire charge of the experimental departments, and gives his whole time and attention to this important work. To be sure many experiments prove to be failures, but farmers are benefited by these failures, as much so, as by knowing the success of the farm. Major Alvord, of Mass., is general superintendent of the farm. It is well to say here that a careful record of all farm expenses is kept, and it is the purpose of Major Alvord to show by his books at the end of the year in what particulars the farm has been successful or failed.

On Houghton Farm the Jersey cow is kept, this being a breed remarkable for the rich milk they give, and as there is a demand for Jersey butter, especially a choice article, the milk is made into butter, which readily sells for fifty or sixty cents per pound.

provided we get good seed to start with, and will manure and cultivate properly. I don't think we have any reason to complain and say that farming is not profitable. Albemarle is well adapted to agriculture as well as suited to manufacturing, and there is no reason why she should not rank among the best counties of the State.

To make Albemarle the garden spot of the world, we have but to give more time and attention to our business. Do the best we can—always with an eye to improvement. Improve our lands by manure, clover, peas, and let our aim always be to make a better yield per acre at the least cost.

Nov. 21, 8-17.

Land Sale!

BY virtue of an order of the Superior Court of Albemarle County, I will sell for cash, at the Court House door in Graham, on

MONDAY, 5th of June, 1882,

a very valuable tract of six acres of land on the waters of Stinking-Quarter Creek in said county, it being a part of the lands allotted to heirs of Joel Shoffner in division of lands of the late Michael Shoffner. It is good land and well timbered.

W. L. SHOFFNER, Adm' of Joel Shoffner.

April 27 '82-14.

Auction Sale!

I will sell at public auction on Tuesday, May 1st, 1882, for cash, my horse and lot in the town of Graham, household and kitchen furniture, farming tools, buggy and harness, a lot of hogs and two milk cows, also a stock of general merchandise at my store.

May 4, 1882-14. J. J. LONG.

TOBACCO, COTTON AND CORN FERTILIZERS!

I AGAIN offer the ANCHOR BRAND FERTILIZER for sale, which can be had at Graham station of Mr. A. T. WHITSETT, agent, and at Mebaneville of the subscriber. I have sold this brand for many years, and since have regularly increased. For reference as to the effects of this Fertilizer, I can point to about 1,000 acres of wheat in Albemarle and Orange Counties, which give evidence of a rich harvest. Prices reduced, but the standard of brand as good as ever.

S. A. WHITE, Mebaneville, N. C.
