

THE ALAMANCE GLEANER.

VOL. XVI.

GRAHAM, N. C., THURSDAY, NOVEMBER 20, 1890.

NO. 32.

**NOTHING SUCCEEDS
LIKE SUCCESS.**

CAUSED BY MICROBES,

Radam's Microbe Killer

Eliminates the Microbes and drives them out of the system, and when that is done you cannot have an ache or pain. No matter what the disease, whether a simple case of Malarial Fever or a combination of diseases, we cure them all at the same time, as we treat all diseases constitutionally.

Asthma, Consumption, Catarrh, Bronchitis, Rheumatism, Kidney and Liver Diseases, Menstrual Troubles, in all its forms, and, in fact, every disease known to the Human System.

Beware of Fraudulent Imitations!

See that our Trade-Mark (same as above) appears on each jar. Send for book "History of the Microbe Killer," given away by L. B. HOLT & CO., Merchants, Graham, N. C.

PROFESSIONAL CARDS.

JAS. E. BOYD,

ATTORNEY AT LAW,
Greensboro, N. C.
Will be at Graham on Monday of each week to attend to professional business. [Sep 16]

J. D. KERNODLE,

ATTORNEY AT LAW
GRAHAM, N. C.
Practices in the State and Federal Courts will faithfully and promptly attend to all business entrusted to him.

DR. G. W. WHITSETT,

Surgeon Dentist,
Greensboro, N. C.

Will also visit Alamance. Calls in the country attended. Address me at Greensboro.

JACOB A. LONG,

ATTORNEY AT LAW,
GRAHAM, N. C.

May 17, '88.

E. C. LAIRD, M. D.,

HAW RIVER, N. C.

Feb'y 13, '90.

LEVI M. SCOTT, F. H. WHITAKER, JR.

Greensboro, N. C. Graham, N. C.

SCOTT & WHITAKER,

Attorneys at Law,
GRAHAM, N. C.

ADVERTISEMENTS.

Pomona Hill Nurseries

POMONA N. C.,

Two and a half miles west of Greensboro, N. C. The main line of the R. & D. B. R. passes through the grounds and within 10 feet of the office. Salem trains make regular stops twice daily each way. Those interested in fruit and fruit growing are cordially invited to inspect this largest nursery in the State and one among the largest in the South.

Stock consists of apple, peach, pear cherry, plum, grape, Japanese persimmon, apricot, nectarine, nuthatch, quince, Grosbeak, Fig, raspberry, gooseberry, currant, pie plant, English walnut, pecan, Chestnut Strawberry, roses, evergreens, shade trees, &c.

All the new and rare varieties as well as the old ones which my new catalogue for 1890 will show.

Give your order to my authorized agent or order direct from the nursery. Correspondence solicited. Descriptive catalogues free to applicants.

Address,
J. VAN LINDLEY,

POMONA, N. C.

Reliable salesmen wanted in every county and territory containing will be given.

BILE BEANS

To cure Biliousness, Sick Headache, Constipation, Malaria, Liver Complaints, take the safe and certain remedy.

KISSING

THE GREAT REMEDY FOR ALL THE ILLS OF THE SYSTEM. It is the only medicine that cures all the ailments of the human system.

Higher Prices Follow Higher Duties!

The ACTUAL Effect of the Bill Now Presented for Consideration.

McKinley has succeeded well in eliminating "Cheap Goods" (as he said) from the market.

A comprehensive comparison of the prices of goods one year ago with those of To-DAY shows that the advance in cost corresponds almost exactly with the increase in duties. And yet they say that the Tariff does not AFFECT PRICES. High prices are a natural and inevitable effect of increased DUTIES. Now we bought very heavily before the Bill passed because we knew there was money to be saved for you and for us, and if we had waited we should be compelled to pay about 1-3 more for goods. We have \$7,500 worth of clothing of every variety bought in solid cases because we knew the same goods would be advanced 33 1-3 per cent. Overcoats from \$1.25 up, Boots and Shoes, Dry Goods and Notions, Hardware and Crockery are sold by us now at WHOLESALE PRICES.

We announce the engagement of MRS. KATE FIX THOMPSON, the popular and fashionable milliner of Burlington, who will have charge of our MILLENNY DEPARTMENTS at both stores. Her well established reputation together with our methods of doing business will assure you of the perfection of this department.

WE CANNOT NOW SAY MORE THAN COME AND SEE.

L. B. HOLT & CO.

GRAHAM AND BURLINGTON.

First Principles in Butter Making.

Butter is finished in the dairy, but not made there. The stamp of the dairy-woman puts in the gold in market form; but the work must be commenced in the field or in the feeding stables; and this leads at once to the consideration of feeding for butter. During the early, sunny summer months, when nature is profuse of favors, there is little to be done beyond accepting her bounty. The tender grasses are full of the needed nutrition, and they afford the constant supply of moisture without which the secretion of milk is greatly lessened. Yet, at this season, as well as all others, a pure supply of water is absolutely necessary. It does not meet the requirement if cattle have a wet hole full of surface drainage in the pasture, or frog pond. While it is probable that the tadpoles and wrigglers sometimes found in city milk have been drunk by thirsty cows, many infusions do exist in such pools that are hardly eliminated or rendered entirely harmless by the wonderful milk-secretions of the animal. The cattle should drink from spring fed boxes; and as often as these, under the hot sun, are seen to produce green growth or floating scum a pail of coarse salt may be put in, and the current checked until the fresh-water growths are killed; the salt water is then drawn off, and for a long time the trough will remain pure and the water bright.

How to Save Oats in Feeding.

A saying may be affected in the consumption of oats for horses by simply soaking them in tepid water. Practical experiments which have been made show that by this method the ration for each animal may be reduced by a third. Horses whose teeth have seen their best days masticate the grain in its ordinary condition insufficiently, and younger animals often eat so greedily that the greater proportion of it is swallowed whole. This waste may be obviated by the simple method recommended, which so far softens the grain that is more completely masticated and digested, and consequently yields more nutriment. Three hours is a sufficient length of time to soak the grain, provided the water is not too cold.

Mr. Ingalls must act with promptness if he is going to drive the force bill through the Senate. He will have less than 100 days of his Senatorial career remaining to him when Congress reassembles in December.

Great Industrial Activity.

The Manufacturers' Record of November 8, says: Notwithstanding the political excitement of the week there has been no let up in the wonderful industrial activity that is so rapidly changing the South an agricultural to a great manufacturing country. In fact, the week has been marked by the organization of many great enterprises, covering almost every line of industry. At Middleborough, Ky., a \$1,000,000 company, just organized, has leased large coal property for development, with the intention of building 1,000 coke ovens. Six new companies with an aggregate capital stock of over \$500,000 have arranged to build ice factories in different places in the South. In North Carolina \$40,000 and \$175,000 cotton mill companies and a \$100,000 lumber company have been organized. At Winston, in that State, a furnace is to be built, and a \$200,000 manufacturing company has been incorporated. A furniture factory, sewing machine factory and agricultural implement works, each to have a stock of \$100,000, are to be built in Tennessee. Florida has organized three phosphate companies with capital stock of \$100,000, \$200,000 and \$600,000 respectively. In Georgia a \$50,000 lumber company and a \$300,000 general manufacturing company have been organized. Virginia shows among other enterprises for the week a \$1,000,000 electric company, \$1,000,000 development company, a \$5,000,000 iron and coal development co. based on 100,000 acres of land lately purchased; a \$250,000 cement manufacturing company, a \$500,000 industrial aid company and a \$50,000 agricultural implement company, while West Virginia shows a \$500,000 coal, mining and development company, a \$200,000 manufacturing company and a \$25,000 electric company.

These are but a few of the many enterprises reported for the week, but they are enough to indicate how great is the activity in progress. From all sections come the most enthusiastic reports as to the development that is going on throughout the South while the leading capitalists of the North, many of whom have heretofore taken no part in the Southern movement, are now turning their attention and their money to this, the finest field in the world for investment.

Self denial, not self gratification, brings soul satisfaction.

Value of Oysters for Food.

Speaking rough a quart of oysters contains on the average about the same quantity of active nutritive substance as a quart of milk, or a pound of very lean beef, or a pound and a half of fresh codfish, or two-thirds of a pound of bread. But while the weight of actual nutriment in the different qualities of food named is very nearly the same the quality is widely different. That of the very lean meat or codfish consists mostly of what are called in chemical language protein compounds or "flesh formers"—the substance which makes blood, muscle, tendon, bone, brain and other nitrogenous tissues. That of the bread contains but little of these, and consists chiefly of starch, with a little fat and other compounds which serve the body as fuel, and supply it with heat and muscular power. The nutritive substance of oysters contains considerable of both the flesh forming and the more especially heat and force giving ingredients. Oysters come nearer to milk than about any other common food; their values for supplying the body with material to build up its parts, repair its wastes and furnish it with heat and energy would be pretty nearly the same.—Century Magazine.

The Cotton Stalk.

Cotton stalk bagging is a settled success, says the Agricultural Journal. Not an atom of the plant goes to waste. The lint, the seed, the hulls and the stalks are all valuable and can be turned into money. It is a wonderful plant, and its lint already clothes the world's millions in every land and clime. The demand for cotton goods is increasing everywhere, and there is no likelihood of a decline in the price of raw material.

LOUISVILLE, KY., April 15, 1890.

Radam's Microbe Killer Co.,

Nashville, Tenn.:

Gentlemen—I have been troubled for some time with an acute form of kidney disease, for the relief of which I have consulted several of the best physicians in this city, but with no appreciable benefits resulting from the faithful use of the medicines ordered. I had lost thirty or forty pounds in weight, was naturally greatly reduced in strength and had frequent rigors, which possibly may have resulted from uremic poison. Several weeks ago I concluded to give the Microbe Killer a trial, and the result of its use has been gratifying to me and a surprise to my friends. I have fully regained my strength and weight, suffer but little or no pain, have no recurrence of the rigors, appetite good, and have the fullest confidence in a complete restoration to health. I willingly recommend the Microbe Killer as a remedy of great value. Very Respectfully,
WM. H. MEYER.

The People's Verdict in Thirty-Nine States.

Herold. A thousand thanks to the Republicans of the Fifty-first Congress. They passed the McKinley bill just in time. If they had had the reckless audacity to pass the force bill also they would probably have been entirely wiped out in this election. In the political history of this country no party ever received a sterner rebuke at the polls. The people never before so fully vindicated their claim to practical common sense or their ability to pass judgment on the policy which will afford the greatest good to the greatest number. Thirty-nine States expressed an opinion, and their vote is a thunderous protest against McKinley prices for the necessities of life, against a restricted market for American products, and against starvation wages for the laboring classes.

When the Fifty-first Congress convened it was composed of one hundred and sixty-one Democrats and one hundred and sixty-nine Republicans.

The majority of eight was afterward increased to twenty-four by the trick and device of unseating Democrats in closely contested districts.

The patent fact that a man was honestly elected counted for nothing. Without ceremony, or a decent regard for evidence, he was summarily ousted and his place given to a claimant whose vote would be serviceable in a pinch.

A Good Bargain.

A school boy defined strong drink as "the stuff that causes the most human happiness—by letting it alone." Here Patrick seems to give credit to the rum-seller by a similar backhanded process of reasoning.

At a temperance meeting where several related their experience, a humorous Irishman was called to be the chief speaker.

He had on a pair of new boots. Said he: "A week after I signed the pledge I met an old friend and he says, 'them's a fine pair of boots you have on.' They are, says I, and by the same token the saloon-keeper who gave them to me."

"That was generous of him," says he. It was, says I, but I made a bargain with him. He was to keep his drink and I was to keep my money. My money bought these fine boots. I got the best of the bargain and I am going to stick to it."—Temperance Bazaar.

Yours respectfully,
JOHN KREDDY & Co.

Manners of Men.

If a man gets everything else he wants he can't get any younger.

With no water in sight, any man will boast of his skill in fishing.

It is some men's ambition to be great men before they learn to be men.

With most men life is made up of going into debt and then struggling to get out.

The man who keeps his word has no trouble in keeping his countenance.

The genius of a man is admitted more readily after he is rich than when he is poor.

Men seem ashamed of everything natural in their instincts. Perhaps they have reason to be.

The average man takes up so much of his time talking about his ambition that he never has time to realize it.

As long as men are created so that they cannot be satisfied with a cup of tea and a rocking chair, some women will be dissatisfied with them.

How natural it is to hate the man who, when he hears that you have sworn to reform, reminds you that he has heard you take that same oath before.

You can usually calculate a man's worthlessness by the number of wives he has had; the more worthless a man is the more often he has been married.

—Athenian Globe.

Risky.

Trying to get to heaven on your wife's church membership.

Letting the devil select the reading matter for your children.

Reading in the Sunday paper before breakfast and praying for spiritual blessings the rest of the day.

Signing to-day and intending to repent to-morrow.

Taking the children to the procession and whipping them because they cry to go to the circus.

Calling your wife (or husband) "dear" to public and "beast" in private.

Being one thing to your neighbor's face and another behind his back.

Being a prominent Christian at home and "most anything" a hundred miles away.—The Ram's Horn.

LIXCOLNSTON, N. C., March 23, 1890.

Radam's Microbe Killer Co.,

Nashville, Tenn.:

Gentlemen—We have handled the Microbe Killer for some time. Its sales have given us satisfaction, and all our customers that have used it are pleased with it.

Yours respectfully,
JOHN KREDDY & Co.

ALL SORTS.

Pope Leo speaks French fluently, but knows no English.

Mr. Edwin Booth will be fifty-seven years old to-day. He was born near Belair, Harford county, Md.

The heirs of John Ericsson have presented the inventor's models to the Metropolitan Museum in New York.

Brete Harte has forewarned social pleasure for the present, while finishing his literary engagements.

The new baby hippopotamus born in the Central Park in New York City has a mouth seventeen inches wide.

There is a building near Vienna that contains 1,500 rooms, and is occupied by 2,100 people. It is the largest building in the world.

Gladstone's defense of the Pentateuch, now running in a London magazine, is attracting great attention in the theological world.

Reason requires culture to expand it. It resembles the fire concealed in the flint, which only shows itself when struck with the steel.

Cannon Liddon, who died recently in England, once in a sermon addressed Queen Victoria as "madam," and thereby lost a bishoprick.

The young managing editor of the Atlanta Constitution, Clark Howell, is elected to the House of Delegates and is in the lead for the Speakership.

A Radical in Florida by the name of Harrison Reed was running for the U. S. House and was badly defeated. No wonder! His name was enough.

The season's sensation at Cadillac, Mich., is a 76-pound squash. Last year it had a horse which climbed up stairs each morning and kissed the chambermaid.

A Jackson, Miss., shoe-maker is trying to buy a pair of shoes belonging to a Georgia negro. The leathers are No. 15, and weigh four pounds and five ounces.

Miss Isabella Thoburn, a sister of Bishop Thoburn, of the Methodist Episcopal Church, will return to India next month to resume her missionary work there.

How about Clear Reed in the next House of Representatives? Think of it! 96 Republicans, 230 Democrats and 9 Farmers' Alliance. Wou'd he have a poor showin' tho'?

We derive from nature no fault that may not become a virtue, no virtue that may not degenerate into a fault. Faults of the latter kind are the most difficult to cure.—Goethe.

Justice Field, Democrat, U. S. Supreme Court, is the oldest of the Judges as to term of office. He was born in Connecticut in 1816, and appointed by Lincoln in 1863.

Mrs. Jefferson Davis and her daughter will spend the winter in Mexico. It is gratifying to know that she has over 40,000 subscribers to the Life and Letters of her venerated husband.

Col. Owens, a civil engineer from Washington, is at Old Point Comfort, Va., looking after additional ground in which to bury the deceased inmates of the National Home at Hampton.

A young girl rode her horse into a store doorway at Lynchburg, Va., the other afternoon, made her purchase, said good-bye and backed gracefully out.

There is a colored man living at Arkansas City, Kan., who is the father of thirty-six children. He has been married twice, and each wife bore twins six times.—Kansas City Star.

Keep your view of men and things extensive, and depend upon it that a mixed knowledge is not a superficial one. As far as it goes, the views that it gives are true.

The largest cotton planter in J. S. Richardson, of New Orleans, born in North Carolina. He owns over 40,000 acres of rich land and cultivates 20,000 acres in cotton.

Jerome K. Jerome, the young Englishman who is now enjoying a reputation as a humorist and dramatist, is about to publish a volume of stories under the title, Toad After Supper.

Dom Pedro, the ex Emperor of Brazil, has arrived at Cologne. He is described as looking very unhappy and broken down, and is continually accompanied by an attendant owing to his feeble condition. At intervals in conversation he is heard to mutter "Brazil, oh dear Brazil!" It is feared his mind is weakened by his misfortunes.

Miss North, the English traveler, has recently died. Unattended by even a servant she visited Teneriffe, Brazil, California, India, Java, Japan, Ceylon, Borneo, Australia, and the Seychelles, making a collection in oil and water colors, which she afterward presented to Gardens, of scenery, flora and fauna, which she studied in their various habitats.

Irish Potatoes—When to Plant.

Irish potatoes may be, and some times are, planted in November, the sets being put in ground deep enough to escape the frosts. But there is little or nothing to be gained over planting in February. To secure a crop of early potatoes, it is best to plant the last of February, putting sets in a tolerably deep trench, and cover lightly, as we do not fill up the trench entirely. Being covered shallow, the plants will come up promptly; and if frost threatens, they can easily be thrown on them by filling the trench some more.
