WASHINGTON, June 25, 1910.

With the departure of Congress, the President, the Cabinet, the Supreme Court, the diplomatic corps and the fashionable throng that is ever here when Congress is in session, it would be an exaggeration to say that Washington is deserted, for there are still here the government clerks who to the capital city. are the bone and sinew of the Civil Service and whose hands and eyes are so thoroughly educated that the routine of government in all its labyrinths is carried on by them, even when the made great progress, when their heads of departments are absent. A BYRON STATUE.

Made For Westminster Abbey, but Dean Lincoln Refused It.

Many years ago some admirers of Lord Byron raised a subscription for a monument to the poet to be placed in Westminster abbey. Chantrey was requested to execute it, but on account of the smallness of the sum subscribed he declined, and Thorwaldsen was then applied to and cheerfully under-

In about 1833 the finished statue arrived at the customs house in London, but to the astonishment of the subscribers the dean of Westminster, Dr. Ireland, declined to give permission to have it set up in the abbey, and owing to this difficulty, which proved insurmountable, for Dr. Ireland's successo was of the same opinion, it remained for upward of twelve years in the customs house, when (1846) it was removed to the library of Trinity coliege, Cambridge.

The poet is represented in the statue high sense of duty provides his of the size of life, seated on a ruin, only motive for official action and with his left foot resting on the fragment of a column. A LAD OF MYSTERY.

"That Awful Boy Jones," Who Tormented Queen Victoria. a little while about the middle of the pineteenth century "that awful boy Jones" was the torment of Queen Victoria's life, and his short career in public contains a mystery which would try the mettle of Sherlock

Holmes. He was a barber's apprentice who in some unexplained way discovered a passage into Buckingham palace, with which he alone was acquainted. When he was first found trespassing he was gently admonished and sent home. Soon after he was encountered again in the palace. He would not tell how be obtained access. Again he was sent nome, and again he reappeared.

Once be calmly admitted that he had been lodging in the palace for a fortnight. He had laid anug during the day, sleeping in the royal apartments, and at night had wandered from room o room, helping himself to the food left over from royal repasts. He had seen the queen repeatedly and indeed had never been for from her.

The matter was considered so ous that the boy was summoned before a special meeting of the privy council. He refused to give any account of his secret. Soon after be disappeared, and it is supposed that be vas removed under state protection.-London Globe.

The Kaffire Thought It a Joke. I once took some Kaffirs from their desolate homes in the more desolate gorges beyond the mountain ranges to the more civilized south. Like most savages, they looked with stupid indifference at the marvels about them. and once only were they excited by an incident which opened their eyes to what they considered a most extraordinary and unnatural state of things.

"Certainly." "What a country!" cried the man in amazement. Then, after pondering while he continued doubtfully: "Suppose a man had no money in this country. He might starve."

"It is quite possible."
The Kaffir shook with uncontrollable laughter. It was the best joke he had ever heard. He then explained the ridiculous system to his companions, and they roared in chorus "Where Three Empires Meet."

Literary Censorship In Russia.

In an article on the literary censor ship in Russia a writer in the Frank furter Zeltung says that some of the queer examples of this work on the part of the czar's government are worthy of note. In a poem the line "Under strange skies we may be happy" was canceled, with the remark that "no sky can be more conducive to happiness than that which spreads over Russia." A biography of Sumarokow mentions the novel "Korew" as his first "creation." The sentence was blotted out because "God alone creates. Man may write, work, compose, etc., but he does not 'create.' " When the names of the gods of Greek mythology are written capital letters must not be used "except in the case of Mars. Our gracious czar has had so many wars that he owes Mars this compliment." A poem was suppressed because it contained the line, "To solitude devoted. I despise the world." The censor said: "Despising so generally includes also the czar. Thank me, writer, for saving you from Sibe

Ancient Table Courtesies. In the Ambrosian library at Milan there is a thirteen century manuscript entitled "Fifty Courtesies of the Tu ble." Its author is Fra Bonvesin of Rive and it throws an interesting light on the table manners of those times. "Do not," writes this rigorous censor, "fill your mouth too full. The glutton who fills his mouth will not be able to reply when spoken to." The perfect diner is adjured not to sonk his bread in his wine, "for," adds the writer, "if any one should dine with me and thus fish up his victuals I should not like it." But of the fifty "courtesies" mentioned by the ecclesi astic the prize most certainly must be The one reni record that he made for awarded to the following: "Let the hands be clean, and, above all, do not at table scratch your head, nor, indeed at the final mounted exercises of his any portion of your body." It is a lonely little fishing bay in corner of the Cornish coast, but it coasts a lighthouse on its queer old quay and also a story concerning it and its ancient keeper. The light was noted to be a little erratic, and so one day to the ancient keeper thereof came an officer of the coast guard. "What is this I hear?" he demanded. Nature as a Healer. A great, broad, couseling and fundapental fact remains that in a large majority of diseases which attack hu manity under 90 per cent of the unfavorable influences which affect us nature will effect a cure if not too much interfered with. A Singular Marriage Custom. The Kurd have a very curious and somewhat dangerous marriage custom which one would think would be mor honored in the breach than in the ob servance. The husband, surrounded by a bodyguard of twenty or thirty vonne men carries his wife home on his tack in a scarlet cloth and is des perately assaulted the whole way by a number of girts. It may be that among the lady pursuers are some of the bridegroom's former "flames," who turn the mock attack into downright earnest to avenge slighted love.

A Question of Usage.

The choir began the hymn. When they came to the line, "Neither are they afraid," the composer of the music had so written it that it had to be repeated first by the soprano, then by the alto and finally by the bass. The soprano seemed to be cf conservative taste and sang the line, "Nee-ther are they afraid." Apparently the alto had departed from the usage of her forefathers, for when she brought out the words they became "Ni-ther are they afraid," and it became a serious question which side the bass would take. The bass was an Irishman. Out rolled his rich voice, "Nay-ther are they afraid."

So the question of usage still remained unset led .- London Stand-

The Roots of Altruism. The three eternal roots of altruistic energy are these: First, the principle of justice-that there is a moral law before which all men are equal, so that I ought to help my neighbor to his rights; second, the principle of charity -that I owe infinite tenderness to any shape or kind of man, however unworthy or useless to the same; third, the principle of free will-that I can really decide to help my neighbor and am truly disgraced if I do not do so. To this may be added the idea of a definite judgment-that is, that the action will at some time terribly matter to the helper and the helped.-G. K. Chesterton.

Flowers as Food. The old time epicurean was as enthusiastic over flowers and herbs as is the modern vegetarian over s cabbage. He mixed all kinds of buds, leaves and flowers with loving care and gave them all the common name of "sallets." Violets and cowslips he put into custards. Elder tops, burdock roots, broom buds and marshmallows he used for pickling. For concecting coloring strups all day a cooked flower is a curiosity.
