### The Brightest Spot on Earth.

A happy home is the brightest spot on earth that the eye of God salary of \$1,650 per annum. looks down upon says a writer. Love and peace in his home sends sunshine around theman wherever he goes; but let there be disorder and trouble, and there is misery who can shake himself free from the skeleton in the closet, from the worry of the household, a blister on the heart! A day will tell how many a man carried that with him without winding down to the grave. When husband and wife are helpmate to each other in the best sense; when order and love and goodness prevail in the house, then the man who has a hard battle in life to fight can leave his struggles behind him when he enters there. With all our faults we are the most home loving of people, and that is the reason why we are the greatest of people. Whatever helps home life is a national blessing: whatever hurts home life is a national curse and the greatest curse that can touch these blessings is what would tamper with the peace and blessedness of these our homes.
