NECESSITY OF ORGANIC MATTER IN THE SOIL.

J. L. Burgess, N. C. Dept. Agriculture.

We do not advise the use of any leguminous crop in the treatment of these poor lands the first season. You will do well to get a good growth of rye on the land in order to do this you may have to use one or two hundred pounds of some good grade of commercial fertilizer. Begin in the fall. If the land is rather heavy, break it up as deeply as your teams can pull it but do not sub-soil.

In the spring, if the season is good and the rye is growing off nicely, it might be wise to clip it when it first comes into head, in order to let it make a second growth. Your main object now is to secure a large amount of vegetable matter to be plowed under.

King Off \$1,000,000 Grant.

For thirty years Congress, at the close of each session, has voted one month's "extra-pay" to its employees. Most of them have "easy jobs," with short hours. If they consider the work too exacting, there are 785,000 American citizens ready to take their places and sacrifice themselves on the altar of their country at so much per diem.

The voting of a month's "extra pay" involves an expenditure of \$140,000, and is merely a gift of so much money to favorites. If the congressmen themselves wish to reward their political proteges by donating this sum out of their own pockets, there will be no objection. But they take the money out of the United States treasury. The senate this year, as usual, voted the honorarium. But when the appropriations committee of the house espied this item it was promptly amended. In line with their policy of economy, the Democrats refused to allow this gratuity.

Thus another "grat" that has flourished for a generation is cut off, and the beneficiaries fear that no succeeding Congress will dare revive it. These are lean days for the gentry who fatten off the public purse.
