Rowan's new court house, which is to cost \$111,000 and may cost more before it is finished, is figboth the present and former boards of commissioners were in-dicted for failure to have the building erected according to the building erected according to specifications. Payments on the contract were held up. Recently three members of the board ordered a payment made. Now the remaining members of the board two—have secured a restaining order from Judge Long requiring the three members of the board to appear in court on the 39th and show cause why further payments should be made.

Despondency

s often caused by indigestion d constipation, and quickly dis-pears when Chamberlain's Tab-es are taken. For sale by all alera.

Thinking a dynamite fuse had urned out John Jameson, a foreman of the double-track construc-tion of the Southern railway north of Lynchburg, Va., started to dig up the explosive. The delayed blast exploded and tore off his left arm and injured both his eyes. It is thought his eyes can be sav-ed. Jameson's home is at Nebo, McDowell county, this State. HE WAS HUNGRY, POOR BOY

ow, Mothers, Do You Think He Deserved Being Called Cousin to an Anaconda?

"Now see here, Percy," said Mrs. Packer to her son of a dozen summers, "when I went out this afternoon I left seven large doughnuts fit the pantry, and now there are only three. What do you know about

"Well, a fellow is always hungry

"I also left half of a good-sized chocolate cake and a dozen cookies in the cake box. Now there are only six cookies and about a third of the cake left. Do you know anything about

"Well, a fellow wants something to eat when he has been pegging away in school all afternoon, doesn't he?"
"I also left eight cranberry tarts and a large wines pid in the pantry. and a large minee pie in the pantry. Now there are five of the tarts and a good quarter of the pie is gone. Have you anything to say about that?"

"Well, I was hungry when I got home from school, and I——" "I had Jane make a nice dessert of lady-fingers and whipped cream for dinner tonight, and about a fourth of it is gone, together with a lot of the white meat of a chicken I had saved for a salad. Of course, you don't know anything about that?"

"There's plenty of the stuff left for dessert, and there wasn't hardly any of the chicken anyhow."
"But there was a lot of honey left when I went away this afternoon, and it isn't here now, and half of the coffee cake I was saving for breakfast; is gone, and someone has opened that far of orange marmalade I was saving.

Jar of orange marmaisage I was saving, for company. Have you anything to say about that?"
"Well, I tell you I was hungry, and I wanted a little something to eat, and:

"And so you opened that glass of nearly a whole package of those little afternoon teas, and drank half a pint-of cream, and most of the pound of raisins and all the nuts I left here at noon are gone. Hungry? My soul and body! Percy Packer, are you first cousin to an anaconda? Hungry? I should say so! I honestly believe that you are hollow clear into the ground!"—Puck.

Boy Scouts Like Knights of Old. When good King Arthur ruled, boys were trained for knighthood, says a writer in the Christian Herald. This began when they were seven or eight years of age. Their first course was years of age. Their first course was when they gave seven or eight years of constant attendance and waiting upon a master and mistress. They were taught religion and morals and love by the chaplain. They were taught to waik as soldiers, and to ride as brave hunters. They were accustomed to military exercises and athletic sports. They voluntarily suffered heat and cold, hunger and thirst, fatigue and sleeplessness in order that fatigue and sleeplessness in order that they might become hardened. When between fifteen and sixteen years of age the "pages" became "squires," and age the "pages" became "squires," and in the ordinary course of chivalrous education "knighthood" was reached in early manhood. There is much in the Boy Scout movement of today that reminds us of the training for knighthood. The solemn promise made by a Boy Scout at his initiation is "I will be a friend to every living creature, man or beast, and a brother to every other scout, fortunate or unfortunate, right or poor. I will be courteous

Heipe Telephone Talk.

What is halled as a great improvement in telephony is an improved transmitter which has been recently

devised by a French physician and which was recently described by Prof. d'Arsoncal before the French Acad-emy of Sciences. The inventor is Dr.

emy of Sciences. The inventor is Dr. Jules Glover, and is based on his ob-

servation that many of the sounds es-caping from the larynx are divided in

the throat and a large portion of them are emitted through the nose. With the type of receiver now made use of these are lost, but he has de-signed a receiver with two diaphragms, one much more sensitive than the

other, and the nasal sounds are trans-

mitted through this auxiliary diaph-ragm. This improvement is said to completely remove some of the diffi-culties to conversation which have hitherto existed, and makes it possi-

"Fall in love and keep constantly falling in love if you wish to remain young," said Dr. Josiah Oldfield, in the

course of one of his lectures on the "Secret of Perpetual Youth." "There is nothing more important

than this to prevent men and women

from growing old.
"If you are married, all you have to
do is to fall in love all over again

Added to the Language.
"Mamma," said little Edna one day,
"I'm getting tired of this pug nose. It's
getting pugger and pugger every day."

Relief in Six Hours

POSSIBLE REMEDY FOR ROUP Disease is Difficult to Cure and Af-fected Birds Should Be Removed to Roomy Coop. rich or poor. I will be courteou to all."

Roup may be known from an offen-Noup may be known from an offen-sive discharge from the nostrils and swelling below the eyes. The swell-ing in some cases entirely closes the eyes. This disease is known as roup, and is difficult to cure. Remove all the healthy fowls. Put the affected ones in a warm, dry shed or roomy coop.

Has New Device.

and Cheap-Can Be Attached

to Any Incubator.

mercial success when electrical pow

er is abundant and cheap in the dis

The inventor describes his device as follows: "For several years in our

1/1 1/19 11/1

experimental rooms and at poultry

California state fair.

"The regulator controls the flow of the current so nicely that the temperature is almost perfectly even. Of

course the device is practical only in

places where a twenty-four hour service is maintained by the power companies and where the price of the

current is not excessive. To use elec-

tricity for our incubators it is not necessary to purchase special complete outflits. The device is simple and can be attached to any of our incubators at a trifling expense. It is

connected by simply screwing an or-dinary electric plug into the lamp socket of any standard electric light fixture and turning on the key."

Wash out the nostrils and mouth were hastened to maturity as much by Wash out the water, using a small good care and syrings to do so; then put a piece of camphor the size of a hickory nut into one quart of boiling water and hold the fowl's head over it for ten gathered and marketed at fancy prices, some of the other growers that beginning their harvest and minutes; repeat three times a day.

Also give one teaspoonful of cod liver
oil at a dose twice a day. If the swelling closes the eyes, open them and syringe out the yellow matter and wash with warm water into which a drop of carbolic acid has been

thoroughly stirred.

Fowls that are badly diseased should be killed and buried. Clean out the house, dust with fresh air-slaked lime, fork up the yard and spread over it a thick coat of fresh air-slacked lime. Add a few drops of bromide of potassium to the drinking water. Give no other water. This is the best method to use.

Best Poultry Tonics Fresh air, sunshine and exercise are the best poultry tonics. But fresh air does not mean drafts in the houses, nor does sunshine call for exposure to do is to fall in love all over again with your husband or your wife. If you do this you will never find time to adopt the nagging habit, and nothing ages like matrimonial nagging."
Dr. Oldfield is strong in his denunciation of the loveless individual.
"If you do not know how to fall in love," he says, "you must practice until you learn, and when you have learned, then you are young again.
"A person who has never been in love and never wants to be ought to be drowned," is the conviction of Dr. Oldfield. hot suns during the summ houses should be so constru-

The sunshine should be able to reach every corner to destroy any germs that might be lurking in dampness. The fowls should exercise by scratching that a good circulation of the blood may be stimulated. The above are the three best medicines in

Follow Directions.

It is better to follow closely the directions that accompany each incu-

Don't suffer longer with weak kidneys. You can get prompt relief by taking Electric Bitters, that wonderful remedy, praised everywhere by women. Start with a bottle to-day, you will soon feel like a new woman with ambition to work without fear of pain. Mr. John Dowling of San Francisco, writes,—Gratitude for the wonderful effect of Electric Bitters prompts me to write. It cured my Distressing Kidney and Blad-ner Disease relieved in six hours by the "New Great South American Kidney Cure." It is a great surprise on account of its exceeding promptness in relieving pain in bladder, kidneys and back, in male or female. Relieves retention of water almost immediatly. If you want quick relief and cure this is the remedy. Sold by Graham Drug Company. adv

NOT DIFFICULT MATTER TO GROW CELERY

An Ideal Field of Celery at Kalamazoo, Mich., Where the Soil is Peculiarly Adapted to This Vegetable.

(By L. M. BENNINGTON.) semi-arid regions this must be sur plied by artificial irrigation. The land best adapted to celery, however, is muck or heavy soil of a cold nature. The best manure to use is hog manure. When the plants are two inches o more high, or about—the list to the 20th of June in the latitude of the middle states, they should be trans-

planted to the row where they are to We are learning that celery can be stand. These rows should be four feet grown in almost any locality. It reapart in the row. The old method of making a deep trench is practiced little now, and the plants are set in a slight depression made by furrowing out with a single shovel plow. This leaves the plants a little below the level, and the dirt may be worked to them the first few times they are cul-

PEACHES FROM TEXAS

Large Shipments of Luscious Fruit Bring Big Prices.

experimental rooms and at poultry shows and fairs we have used the electric current for hatching and brooding and many dealers have made use of a single globe in their show windows to keep the chicks warm when exhibited there. Our company was the first to use electricity for artificial brooding and hatching, and as far back as .1906 we hatched chicks in this way at the California state fair. Five Thousand Cars of Elberta Va riety, Worth \$1,500,000, Marketed Last Season-Largest Crop in History.

(By J. C. SMALL.) Texas, last season, marketed 5,000 cars of Elberta peaches worth \$1,500, 00. It was the largest crop in the history of the fruit industry of that The crop was handled in an admirable way, both in the orchard and on the cars, and by careful dis-tribution found the best markets. tribution found the best markets. Good prices prevailed throughout the

Bullard, Texas.

starting with \$1.05 a bushel on July 5, and closing with 65 cents on July 25. The first full car ship ment came from Bullard, and sold at the season's top price in Philadelphia. The forwardness of this district in fruit production is attributed to the high elevation and the warm charac ter of the rich, red soil of the section.

There is no doubt that these influences have their effects. High lands are earlier and red soils are warmer

were content with lower prices.

Besides being early with their Elerta crop, the enterprising orchard-

ists of this section are able to con mand a premium price because of the high color of their fruit. It is no more trouble to raise a peach that ripens July 5 than it is to raise one that ripens two weeks later, and it is fus ripens two weeks later, and it is just as easy to raise the big red and yellow ones as it is to raise the small coloriess fruit. Texas orchardists claim that there is a good profit in peaches at fifty cents a bushel. The price of one dollar, with ten to fifteen cents a bushel added for quality, is something attractive and these is something attractive and the prices are sought by the red-land

Both commercial orchards and farm orchards have proven very successful in Texas. While the big orchards under careful management have yield under careful management have yield-ed large profits in years of good crops and good prices, the small or-chards, closely attended, well culti-vated and sprayed, have paid the largest profits and have proven the most successful. The returns from most successful. The returns from the small orchards, acre for acre, are as large in the years of big crops as from the big orchards, and in short years the loss does not fall so heavily upon the man with the small acreage, because he has other crops to depend on and other sources of income. He can raise tomatoes and Irish potatoes. He can raise a crop of cabbage, gath-er them in early May and plant the

Diarrhoea Quickly Cured.

"I was taken with Diarrhoea and Mr .York, the merchant here, perderful effect of Electric Bitters prompts me to write. It cured my to," writes M. E. Gebhardt. Oriole, write when all else failed. Good for Pa. That is not at all unusual. An ordinary attack of diarrhoea can for indigestion or biliousness. Price 50c and \$1 at Graham Drug Co.'s.

JELLY FOR THE WINTER TO BE SEEN IN A CEMETERY

GOOD ADVICE ON PUTTING UP OF SOME DELICIOUS DAINTIES.

undamental Rules, of Course, Every Housekeeper Knows, But Hints Here May Be Welcome to the

The general rule for making jelly calls for fruit boiled in just enough water to cover it until it is tender, and then strained for several hours through a cheesecloth jelly bag. The clearest jelly is made of the juice which simply drips through the bag; just as good but not quite so clear is the jelly made of the juice which is pressed through the bag. To each pint of juice a pint of sugar should be allowed. Put the juice in a sauce-pan over the fire and the sugar on flat dishes in the oven at the same time. Be careful not to let the sugar scorch. il the juice for twenty minutes, then add the sugar, and as soon as it is dis-

solved boil it up once, stirring it carefully so that it does not burn. As soon as it is made the jelly should be poured into glasses or jars which have been sterilized by placing them in cold water, bringing it to the boiling point over the fire and leav-ing them there for half an hour, or ntil the jelly is ready to pour into them. They must then be handled carefully with a towel to prevent burned fingers and the jelly must be immediately poured into them. If they are put to boll in a wire strainer near by may be seen the grave of the man who tried to whip the editor .-Pike County Post. or rack of some kind which can be easily removed, burned fingers will be more easily avoided.

When the jelly is cold melt paraf

fin, taking care not to burn it, and pour it over the tops of the jars of jelly. A layer of paraffin an eighth of an inch thick is sufficient to protect the jelly. Old paraffin from last year's jars can be used. It should be washed in bolling hot water for a min-ute to remove all dust and stickiness, should be dried and then should be melted over the fire; any impurities which the water does not remove will sink to the bottom when it is melted

farmer, who is often much more successful than the large grower, because he is able to give personal attention to his crops and help them when they need help.

Some one work the small shall see the solution of the jelly jars with a cloth wrung out of hot water and then dry them. Then mark each with a little label on which the name of the jelly appears. These labels are the jelly appears. After the paraffin is in place when they need help.

Some one must continue to raise early peaches and early tomatoes and early garden truck for the hungry cities. Nowhere can these crops more easily or more economically be an early peaches and early tomatoes and early garden truck for the hungry can be squares of gummed passepartout picture binding or the squares of gummed passepartout pictures binding or the squares of gummed passepartout pictures binding or the squares of gummed passepartout pictures or the squares of gummed passepartout pictures

production will fall upon the small grower and the large interests will when they are dry and bathed in sungive him the field. There is a tendency in this direction. No effort is being stems and put them in an earthen jar set in a big kettle of boiling water. Leave them in the jar for three hours, chards, which a few years ago were the vogue, but there are just as many bearing trees and the fruit produccurrants through a jelly bag. Add sugar in the proportion of a pound to a pint, and add fresh, stemmed currants; boil twenty minutes or until the mass jellies, and put

glasses.
Raspberry jelly is delicious. Boil a gar to a thick strup and add a pint of raspberries. Boll slowly and gradually add a cupful of currant juice. When it will jelly skim off all seeds and pour it into glasses.

Sorrel Cream. One-quarter pound of butter, one bay leaf, three pounds sorrel, one lettuce, one quart milk, one ounce flour, squeeze of lemon juice, pepper and salt to taste. Melt the butter in a stewpan, add one pound sorrel and let with tobacco dips in the dipping of scabby sheep in order to effect a cure. The addition of sulphur increases the cost. Therefore, if the sulphur the stove, pass through a fine sieve and serve with crotons

Fudge Frosting.
One and one-half tablespoons butter, one-half cup of unsweetene pocoa, 1% cup co inch of salt, one-fourth cup of milk, ne-half cup chopped walnuts, onehalf teaspoon vanilla. Heat to boiling point. Boil about eight minutes; re-move from stove, add to vanilla and heat till creamy. Pour over cake to depth of one-quarter inch.

To Cover the Glass Doo If you have tired of the white cur-tain at the front door, cover the glass with a paper covering that can be pasted to the glass, and which reflects the same lights as a genuine glass door. Deep ruby, green and yellow pa-pers are best for the purpose.

Braized Beef. Cut the meat in pleces about three inches square, placing them in the spider; then slice up three carrots, three parsnips and four onlons on top of the meat, cover all with water and cook three hours in the stirring often.

To Clean the Coffee Pot. soda into the pot, fill it nearly full of water, and let it boil for a little while f pigs.

In washing dairy utensils, use salThen rinse very thoroughly with hot

All Kinds and Descriptions of Misguided Persons There in Their Last Resting Place.

Take a walk through the cemetery alone and you will pass the resting place of a man who blew into the muzzle of a gun to see if it was loaded. A little farther down the slope is a crank who tried to show how close he could stand to a moving train while it passed. In strolling about you see the monument of the hired girl who tried to start the fire with kerosene, and a grass-covered knoll that covers the boy who put a cob under the mule's tail. That tall shaft over a man who blew out the gas casts a shadow over the boy who tried to get on a moving train. Side by side the pretty creature who always had her corset laced on the last hole and the intelligent idiot who rode a bicycle nine miles in ten mir utes sleep unmolested. At repose is a doctor who took a dose of his own medicine. There with a top of a shoe box driven over his head is a rich old man who married a young wife. Away over there reposes a boy who went fishing on Sunday, and the woman who kept strychnine powders in the cupboard. The man who stood in front of the mowing machine to oil the sickle is quiet now and rests be-side the careless brakeman who fed himself to the seventy-ton engine, and

DAINTIEST OF BIRD'S NESTS Maple Leaf of Ordinary Size Will Con ceal the Home of the Humming Bird.

The most exquisitely dainty home built by the bill and feet of birds is that of the ruby throated humming bird, says a writer in the Craftsman. When completed it is scarcely larger than an English walnut and is usually saddled on a small horizontal limb of a tree or shrub frequently many feet from the ground. It is composed al-most entirely of soft plant fibers, fragments of spiders' webs sometimes being used to hold them in shape. The sides are thickly studded with bits of lichen, and practiced indeed is the eye of the man who can distinguish it from a knot on the limb. The eggs

are the size of quinine pills. Although the humming bird's nest is exceedingly frail, there appears to be nothing on record to show that any great numbers of them come grief during the summer rains. It is, however, not called upon for a long tenure of occupancy. Within three weeks after the two little white eggs are laid the young have departed on their tiny pinions.

Advice to Consumptives.

The only safe course for a person suffering from consumption is to se lect a good physician, and be guided in all things by that physician's ad

If a new cure is discovered during your filness your doctor will know it.

If the cure is genuine he will know that and be the first to insist on applying the new remedy to your case.

If the so-called cure is a fake his caution will save you from wasting valuable time and strength pursuing will

o'-the-wisps. Meantime, while waiting on new discoveries, he will keep you on the commonplace, but effective prescription of rests, plentiful diet, and all the fresh air there is. This regime has cured tens of thousands of cases of tuberculosis, and will cure hun dreds of thousands more.

Jenny Lind's California Debut. At Monterey, Cal., formerly a part of Mexico, and ceded to the United States during the Mexican war, is the first public building built in California

and now a broken-down, weather racked ruin of adobe, relates the Health Magazine. In this building Jenny Lind made her first California debut, and when the gold the enthusiastic miners had thrown upon the stage after her performance was gathered up it was found to fill two five-gallon oil cans—about twenty pounds gallon oil cans—about twenty pounds of gold, and equal in value to about \$5,000. Another curious building is a police station which is built within the braces of an oil derrick, and for unique buildings certainly establishes

Abducted in Her School Days The mistress was a leading member of the village woman's club, and was particularly interested in the courses reading and literary criticism, hich were the subjects of written essays.

One day she had occasion to remind her maid-of-all-work of some short-coming. This led to a week's notice from the latter, accompanied by the remark: "Sure, and I won't take that from the likes of you, who hasn't fin-ished her eddycation yet."—New York

Found His Titles Costly.

The Duke of Wellington was Prince of Waterloo, though he never called himself so, and had many other ti-tles, for which he once had to pay dear. He told a man to order dinner for him at a particular hotel, and the man did so, mentioning all the duke's titles. Presently the duke came and waited a long time. "Is the dinner not coming?" he asked; "why don't you bring the dinner?" "We are waiting," replied the waiter, "for the rest of the party." They had pre-pared dinner for about twenty people.
