Saved Girl's Life

"I want to tell you what wonderful benefit I have received from the use of Thedford's Black-Draught," writes Mrs. Sylvania Woods, of Clifton Mills, Ky.

"It certainly has no equal for la grippe, bad colds, liver and stomach troubles. I firmly believe Black-Draught saved my little girl's life. When she had the measles, they went in on her, but one good dose of Thedford's Black-Draught made them break out, and she has had no more trouble. I shall never be without

THEDFORD'S
BLACK-DRAUGHT

in my home." For constipation, indigestion, headache, dizziness, malaria, chills and fever, biliousness, and all similar ailments, Thedford's Black-Draught has proved itself a safe, reliable, gentle and valuable remedy.

If you suffer from any of these complaints, try Black-Draught. It is a medicine of known merit. Seventy-five years of splendid success proves its value. Good for young and old. For sale everywhere. Price 25 cents. [J-63]

WHAT CAUSES COLDS AND HOW TO AVOID THEM.

(avoiding whiskey).

What is a cold? It is the general name for inflammation of the tissues of the nose, throat trachea, and bronchial tubes.

What inflames the tissues? The germs which are the cause of diphtheria, pneumonia, bronchitis, catarrh, influenza, etc., lodge in the membranes and their poisons produce the irritation.

Are these germs definite things? Yes. If you were to look through a magnifying glass at them you would see the pneumonia bacillus looking like a section of a string of beads, that of influenza like a short rod, while that which is present in catarrh looks somewhat like a small berry.

If colds are germ diseases, why is it that getting chilled will sometimes give one a cold? These bacteria are devoured by the white corpuscles of the blood. Sudden chilling will drive the blood from the surface and the bacteria can gain entrance without a struggle.

What is the nature of these bacteria? They live in the tissues, reproducing very rapidly—sometimes as often as every four minutes. The poisons or toxins they give forth cause the illness. These germs are easily communicated when damp but do not live long when dry.

HOW MAY WE AVOID COLDS.?

Keep up the bodily health that the blood may have many white corpuscles ready for the defense. Alcohol, indigestion, shock—such as getting the feet wet all lower the vitality.

2. Avoid getting the germs by using the same hadkerchief, towel, cup, pillow, pencil,, or spoon as one who has a cold. Do not go near him that he may cough or sneeze in the air which you inhale. Always place your handkerchief over your own mouth if coughing or clearing your throat.

3. Keep your mouth shut. This sounds rude, but really it is not because if you do so, the bacteria cannot get to the chilled surfaces of the throat and mouth but must pass through the winding passages of the nasal cavities where the unchilled surface with its defenders stands ready charged with warm blood to recieve it.

4. Breathe fresh air at night Avoid close rooms and crowds by day.

5. Beware the friend who prescribes for you remedies that are simple or patent.

6. Take a good bath that the tiny scales may be washed off the skin, leaving the sweat glands free to excrete the poisons, thereby giving the kidneys one-fifth less the work to do.

7. Go to bed, keep quiet, eat only some simple thing like cream soup, drink plenty of hot drinks Progressive Farmer.

Southern Farmer, Atlanta, Ga.

I have as yet failed to find any light equal to acetylene gas; in fact, we are better pleased with it than electric light. I fill the carbide tank according to the amount of light used every evening, which is about an ounce every three weeks, three lights being used every evening. The gas tips require no care whatever; all that I have to do is to fill the carbide and water tank, and the plant is ready and there is no dirt connected with it in the house, writes J. W. Meyer in Southern Farmer, Atlanta, Ga.

Since installing this system I am so well pleased with it that I would certainly not do without it. I wish to make special mention of the igniter. A number of firms do not agitate or advise their use, yet I have these in my barn and find that the possibility of setting fire is greatly reduced. This does not necessitate the use of matshes at all, since all that is necessary is to pull the cord or chain after the gas is turned on and it is ignited by an electric spark.

For Frost Bites and Chapped Skin.

For frost bitten ears, fingers and toes; chapped hands and lips, chilblains, cold sores, red and rough skins, there is nothing to equal Bucklen's Arnica Salve. Stops the pain at once and heals quickly. In every home there should be a box handy all the time. Best remedy for all skin diseases, itching eczema, tetter, piles, etc. 25 cents. All druggists or by mail. H. E. Bucklen & Co., Philadelphia, or St. Louis. adv.

NEWSPAPER MAN MADE CRURENCY BILL.

Commending the men who had the making of the currency bill recently enacted into law, Dr. Lyman abbott says in the Outlook:

"But the one man of all who should have the statue, if statue were ever to be raised to commemorate the new financial epoch which it is hoped and believed the bill introduces into this country, is Carter Glass of Virginia. Repre-Representative Glass was, until the introduction into Congress of the new currency bill unknown outside of his own state, and was certainly not the widest known man in his own state. He is not a banker; he is not even a lawyer. He learned the printing trade and became a newspaper man, and is now the owner of a daily paper in Lynchburg. But he has studied night and day both the scientific and the practical bases of currency reform. He learned both the theory and practice of banking, and he was able in debate to meet the strongest bankers on their own ground. He ha been frank, sincere and open-minded, and he has been actuated by his own almost passionate belief that, not the Democratic party, or the bankers or the borrowers or the lenders should be considered in framing the bill, but that the United States of America should be considered. He has won the confidence of his colleagues and the respect of his opponents, and by his course has contributed to the reputation of his native State of Virginia, as a "mother of statesmen"."

Relief in Six Hours

Distressing Kidney and Bladder Disease relieved in six hours by the "NEW GREAT SOUTH AMERICAN KIDNEY CURE." It is a great surprise on account of its exceeding promptness in relieving pain in bladder, kidneys and back, in male or female. Relieves retention of water almost immediately. If you want quick relief and cure this is the remedy. Sold by Graham Drug Co. adv.

In the Seaboard Airline railroad yards in Raleigh, a few nights ago, Rafe Williams, a negro fireman, asleep in the cab of his engine awakened suddenly with the idea that he was in a head-on collission, leapedlision, leaped through the big glass window of his cab, severed the main artery in his left arm, and inflicted other severe wounds. He said he was dreaming that he was in a collision and saw the headlight of a shifter as it approached his engine as he waked with a start.

GRAY HAIR MADE ITS ORIGINAL COLOR.

Clip This Notice—Worth 50 Cents

If your hair is gray, streaked with gray, white, brittle, falling out, itching scalp or dandruff, apply Q-Ban hair color restorer to gray hair and scalp. Complete directions for home-treatment of the hair with each bottle. 50c by parcels post, or return this notice and $1.00 and we will deliver you three botties. If not satisfied by its use we give you back $1.50. Address Hessig-Ellis Drug Co., Memphis, Tenn. 13novly. adv.

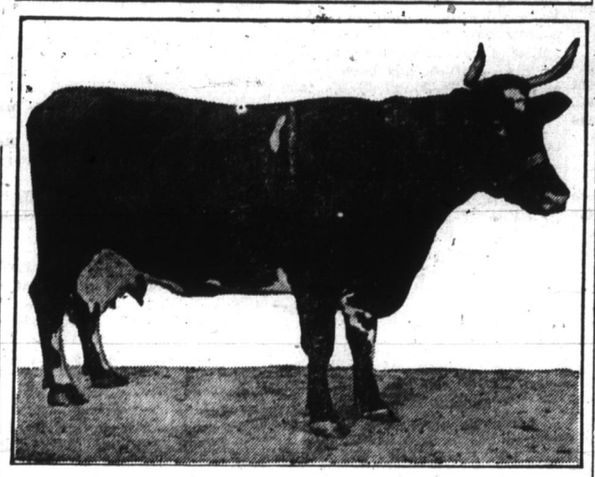
The Lenoir News says that on account of snow drifts in the vicinity of Blowing Rock, the mail did not come from that place to Lenoir, Monday of last week. A message from there says that the carrier did not get to Blowing Rock Saturday night until one o'clock.

To Cure a Cold in One Day.

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25 cents. adv.

Paul A. Hubbell, now teahing school in Marshall, Madison county gets the 1914 Rhodes scholarship from North Carolina to Oxford University, England. The holders of these scholarships get $1,500 annually for their maintenance at the University.

SOME ADVANTAGES OF WINTER SEPARATOR



A Good Type of Dairy Cow.

(By BESSIE L. PUTNAM.)

Many who grant that the separator is useful in the summer, do not fully realize that it is just as useful in the winter time.

In fact where there is a quantity of milk to handle, it is in some respects even more of a necessity.

Milk has, of course, many points which require especial attention during the cold weather, and to adjust these seems to be the special mission of the separator.

Almost everyone who complains during the cold weather that the cream does not rise properly, has seen directions to obviate this by heating on the range almost to the scalding point when the milk is first strained.

Some have tried this with success, and well know that it means more hard work, and butter money under such conditions is surely earned. Yet, where the milk is obtained in large quantities this method would be out of the question without special facilities.

The separator asks no special favors, and the cream must separate when it gets to work. The process is equally thorough and easy in zero weather, or when the mercury is traveling around among the nineties.

Also, the cream will be of the same uniform quality day after day. There is on danger of being compelled to churn for hours just because the butter refuses to come, which is usually the result of slow gathering of the condition lessened when all the cream is bound to come, and that at the proper time.

The mixing of too much milk with the cream, the cream-gauge arranges perfectly.

Butter made from a separated cream is uniform in quality. There is no need of an apology because the cream was a little this or that, for where only the cream and not the milk must be kept at a certain temperature, the work is easily done.

To keep the milk for hours at the most favorable temperature might mean great inconvenience in the household, but the smaller cream jar may be placed near the kitchen range and thus easily kept at the desired temperature, without being very much in the way.

While it goes without saying that more butter is obtained because all the cream is taken from the milk and kept in the best condition, it is equally true that the product is uniformly good. There is no variation.

In this way, if you can please a customer one day, you can please him the next, and this he soon discovers and asks for your butter. Then, the dealer who handles your butter soon learns to guarantee it. He can sell it for better price than the ordinary butter, and since the last bit of gain is all gain, the profits are thus very materially increased.

If you still wish to send the products away to be manufactured, the load to be hauled over bad roads is very greatly lessened. Usually it is not necessarily delivered so often; and in the colder weather, when there is danger of freezing in transit, the small can is again more easily managed.

The advantage of having the farm skim milk to feed to the stock is of two fold value. The chilled milk which is sure to come back from the creamery being in no way equal in feeding value to the fresh milk, which even if reheated, still lacks in value, while it is increased in cost of production.

At every turn there is an independence gained, and this is one of the great things to the farmer. The more he can plan to do his work, independent of others and the weather, the less will be the friction, the more complete the satisfaction.

It is at the last end of the process, however, that the real profit stands out. There are expenses connected with dairying, heavy ones, and after these are met, the rest is gain. There is not a fixed percentage of profit on the whole.

Legitimate cost must come out, no matter what the receipts, and the more we can save at the last end of the process, the greater will be the pure gain.

FEEDING PEANUTS TO SWINE

Hay Will Run From One-Half to One Ton Per Acre and Is Almost Equal to Alfalfa in Value.

Dry weather and hot winds will have no terror for the Oklahoma farmer who adopts the motto of "Pigs and Peanuts."

The drought this season has demonstrated, says the Duncan Eagle, that peanuts will thrive better during the dry, hot season than even kafir corn, and the peanuts have a still further advantage in having far greater food value than either corn or kafir.

The highest priced pork on the market, says the Oklahoma Farmer, is from the peanut-fed hogs, and the ham from peanut-fed hogs brings from 10 to 15 cents a pound more than the ham from corn-fed hogs.

The peanut hay will run from one-half to one ton to the acre, and is almost the equal of alfalfa in feed value. Farmers who raise peanuts and hogs can have the hogs harvest the crop if they desire to turn them into the peanut field, or they can put the peanuts, vine and all, with a little corn or kafir into a silo, which makes a richer silage than either alone. Thousands of farmers in Oklahoma need to adopt the motto of "Pigs and Peanuts."

The time to plan a pig and peanut campaign is now. Splendid seed peanuts will be offered for sale soon, and the farmer of Oklahoma who selects high-class nuts for seed will be ready in the spring to plant a crop that never fails in Oklahoma.

Use of Fertilizers.

The use of commercial fertilizers is becoming more general among fruit growers, due largely to the fact that stable manure is somewhat scarce in many fruit growing districts. In order to get the best results from the use of fertilizers, the grower must study his soil, and by observing the results obtained from experimental application he will soon know the requirements of his soil. Commercial fertilizers are expensive, and require intelligent handling. Many growers have, without sufficient cause, condemned their use, while others, after studying their soil conditions, are securing excellent returns for the money invested.

Tuesday night a week the store of the Smyre Hardware Company at Newton was robbed of a lot of rifles, cartridges, pistols, watches, etc., and $25 or $30 in cash. The loss is about $200.

Louisburg township, Franklin county last week voted $40,000 of bonds for road work. about two years ago the township voted $40,000 for this purfpose and the $40,000 additional is to complete the roads.

At Wilmington last week a British steamer being towed by a up Northeast river bumped into the railroad bridge of the Atlantic Coast Line and Seaboard roads and knocked it askew, delaying traffic and causing a loss of $25,000.

While J. S. Leverette, an Asheville policeman was taking a colored prisoner to the police station he was attacked from behind by two unknown negroes and the three got the officer down and beat him so badly that he was disabled for a few days.

COTTON PICKERS SAVE TIME

Pneumatic Machine, Invented by Ohio Man, Separates Boll From Pod—Much Labor Saved.

Now it is cotton picking toward which the vacuum principle has been directed. An Ohio man has invented a pneumatic machine which seems to be entirely practical and a great time-saver. An apparatus to create suction is mounted on the rear of a truck and in front is a wire cage to hold the cotton. A tube leading from

New Cotton Picker.

the suction apparatus has a set of teeth in its bell-shaped mouth, so that after the boll has entered the mouth it will not withdraw, but will be sucked into the tube and through the latter into the cage. It is a much swifter and neater operation than picking cotton by hand, and two or three men can pick a field quicker with it than a small army of negroes could do the work unaided.

Alfalfa Hay for Cows.

Because of the high protein content, alfalfa is especially valuable as a feed for dairy cows, for breeding animals and for growing young stock. It is of considerable economic value when grown and fed on the farm, as it takes the place of high-priced protein-rich concentrates, such as bran and cottonseed meal. It is more economically under most conditions at least, to feed it as a part ration either with corn or some carbohydrate roughage, as corn stover or grass hay, rather than to feed it alone.

J. D. Croom, 69 years old, 42 years a practicing physician, died at Maxton Monday night a week.

A dispatch from New York says 10 survivors have been accounted for out of 18 men aboard the tank steamer Oklahoma when the vessel broke it two Sunday a week in a storm.

Five persons were killed and six six injured, two fatally, when fire at Newark, N. J., early Tuesday morning a week destroyed the Gus Kern hotel. Not one of the eleven persons in the building when the fire was discovered escaped death or injury.

Jack Tars of the navy after sampling 45 different kinds of tobacco, have approved the navy plug of a Southern manufacturer for smoking and chewing, and Secretary Daniels awarded a contract for 50,000 pounds of the favorite brand. A chemical test supported the choice of the sailors.

FARM POULTRY

POULTRY FENCE IS PORTABLE

Problem of Keeping Fowls on Same Soil for Years and Maintaining Sweetness Is Solved.

I built a fence last summer that has proved very successful. It has long been a problem how to keep our fowls year after year on the same soil and yet have it fresh and sweet. We planted different crops in our yards after we were through with the breeding season. This we found very beneficial, but as the yards had to be dug up by hand it required much labor if there were many of them. I found the solution by using portable fences, writes A. E. Van Natta of Indiana in the Farm and Home.

The fences were built of 2x3-inch hemlock joists and 12-inch hemlock boards, 5-foot wire and iron shelf braces. All the lumber was 16 feet long. I cut the joists into two 6 and one 4 foot lengths and nailed a 4-foot piece on the bottom of a 6-foot length with two 20-penny nails, making a T shape.

In one angle the T was placed a 10x12-inch japanned shelf bracket fastened by six 1¼-inch screws. A 12-inch 16-foot board was then put in by cutting a notch in the ends and center one inch deep and three inches

Portable Poultry Fence.

long. Stand up three of the T's eight feet apart and place the cut board on them, letting the 4-foot pieces rest in the inch notches in the board; square the uprights with the edge of the board and nail. We now have one 16-foot section complete, except the wire.

The 12-inch board at the bottom is sufficient to prevent the cocks from fighting. This fence is very sightly, and two men can easily shift it wherever desired. If you wish to stack it out of the way the screws can be removed from the brackets and the 4-foot bases knocked off and replaced, when setting the fence, without much trouble.

SKIM MILK GOOD FOR HENS

Casein Largely Supplies Protein Necessary for Eggs—Also Excellent for Use in Fattening.

Skim milk is one of the very best feeds for both young chickens and laying hens. The casein, or curdy part of the milk, largely supplies the protein necessary for laying hens, while for fattening fowls there is nothing superior to milk for making white, juicy, delicate flesh. The milk may be fed either sweet or sour and may be given as a drink or mixed with wheat bran and oatmeal or both.

Sour skim milk, or buttermilk, fed to hens confined in yard or small rangs keeps them in health. The acid of the milk supplies the lack of vegetable acid they would pick up in on grass pasture—the buttermilk aids digestion.

Poultrymen near the wholesale city milkmen and creameries can often buy the sour milk for ten cents per gallon. At this price it is a cheap food.

POULTRY NOTES

During inclement weather fowls are better indoors than out.

* * *

If the hens are not laying the chances are that the fault is with their keeper.

* * *

In an egg of 1,000 grains, 600 belongs to the white, 300 to the yolk and 100 to the shell.

* * *

Let the children have a pen of bantams. Look up the different breeds at the fairs, and buy a pair that attracts you.

* * *

The pullet or hen which begins to lay in November will usually lay all winter if properly fed, housed and cared for.

* * *

Don't allow your chickens to have scaly legs. Clean and apply a good disinfectant, then rub in plenty of good grease.

* * *

That good layers are great eaters. A bird must have capacity to eat and digest a great amount of food if she is to lay a great number of eggs.

* * *

Cut out all small chickens and keep the largest and most vigorous ones for winter layers. The long hot summer has retarded the growth of the late ones.

An Ideal Woman's Laxative.

Who wants to take salts or castor oil, when there is nothing better than Dr. King's New Life Pills for all bowel trouble. They act gently and naturally on the stomach and liver, stimulate and regulate your bowels and tone up the entire system. Price 25 cents. All Druggists. adv.

Wake county Commissioners have let to an Alabama construction company the contract to build a court house to cost $300,000.

Herbert Spaugh, the 15-year-old boy, who was accidentally shot by his brother-in-law, R. H. Fichel, in Winston-Salem, a few days ago died.

The Wadesboro Messenger records the death of Wash McLendon, a colored citizen of Anson, who was the reputed father of 37 children and to all of whom he gave biblical names.

McCALL'S is a large, artistic, handsomely illustrated 100-page monthly Magazine that is adding to the happiness and efficiency of 1,100,000 women each month.

Each issue is brimful of fashions, fancy-work, interesting short stories, and scores of labor-saving and money-saving ideas for women. There are more than 50 of the newest designs of the celebrated McCALL PATTERNS in each issue.

McCALL PATTERNS are famous for style, fit, simplicity and economy. Only 10 and 15 cents each.

The publishers of McCALL'S will spend thousands of dollars extra in the coming months in order to keep McCALL'S head and shoulders above all other women's magazines at any price. However, McCALL'S is only 50c a year; positively worth $1.00.

You May Select Any One McCall Pattern Free from your first copy of McCALL'S, if you subscribe quickly.

THE McCALL COMPANY, 236 West 37th St., New York

NOTE—Ask for a free copy of McCALL'S wonderful new premium catalogue. Sample copy and pattern catalogue also free on request.

Very Serious

It is a very serious matter to ask for one medicine and have the wrong one given you. For this reason we urge you in buying to be careful to get the genuine—

THEDFORD'S
BLACK-DRAUGHT
Liver Medicine

The reputation of this old, reliable medicine, for constipation, indigestion and liver trouble is firmly established. It does not imitate other medicines. It is better than others, or it would not be the favorite liver powder, with a larger sale than all others combined

ALL SUMMER SICKNESSES BY
Graham Drug Co.

Extremes In Weight.

The lightest and heaviest substances known to science are hydrogen gas and the metal osmium.

The greatest mystery of medical science is the exact use of the thyroid gland, which is the seat of the disease known as goiter.
