freedom from diseases, quick growth iom from diseases, quick growth and general vigor it will be worth all that it costs the shepherd.

Good Feeder Keeps Improving His Herd in Quality and Individuality —Good Ration Counts.

There are too many farmers and even breeders who seem to hold the idea that a pig can feed himself and that their whole duty ends when they have supplied the food. A good feeder can keep improving his herd in quality and individuality and is therefore progressive and su the poor feeder may take the best to be had, and in five generations be back to scrubs. This is the difference be-tween good feeding and poor feeding. This is where the feeder has more or feeder may take the b

nce than the feed. It is a clean waste to give the pig 80 or 90 per cent. of his feed in corn or meal when perhaps not more than one-half that amount is needed in building the various structures of his body. The balanced ration is what counts. That is intended to be composed of such materials as are needed by the pig to build all of his growth to furnish the bone and the muscle to furnish the bone and the muscle, and all parts in proper proportion. It is shown time and again that two valuable feeds, when combined, make better feed than either one separately, because it comes nearer balancing the

ration.

It is only of late that the opinion is spreading among farmers in general that the feeder is one of the important factors, both in the success of a breeder and also that of a pork raiser. The modern hog is an artificial product, and is more readily responsive to good treatment, or the reverse, than any treatment, or the reverse, than say other farm animal. No matter how much you may pay for pedigree or individuality, if you do not know how to feed your hogs will be but little bet-ter than scrubs.

Uncomfortable Sheep.

If the sheep is warm and uncomfortable, it does not eat well. And if it does not eat well to produce neither flesh nor a good fleese. Many people wonder why their sheep do not produce such heavy fleece as they used to produce. The housing will enable one to answer that question in many cases, though of course the method of housing capture account for it and Uncomfortable Sheep

A mule belonging to Luby Measley featured in a freakish runaway in La Grange Sunday. The animal shucked himself of the buggy by running between an electric light pole electric light pole and a tree leaving the vehicle jammed be-hind the two. Then the mule, as an old darkey once said, "went on whar he was gwine."

CHUECH SHOULD ADVERTISE Clergymen Should Adopt Modera Methods to Fill Empty Pews, Declares Preacher.

By REV. FRANK E. EBRIGHT,
(Pastor of the Methodist Episcopal
Church at Whitestone, L. 1.)
If any one has common sense he
ought to use 4t. This is just as important in the ministry as in business, finance, politics or war.

People who are in a rut make no progress. Those who are stupidly following prejudices, sentiment or the exploded notions of their grandfathers are not progressive.

If a clergyman finds his is small it is his duty to find ways and means to fill the empty pews. If a department store can fill its aisles by announcements in the press, if doc-tors can spread the teachings of cleanliness and hygiene through the columns of newspapers and if theaters can be filled by billboard announce-ments—then we have a set of facts which a minister of the gospel may

well consider.

If there is a lesson for him to learn from this he is stupid not to learn it. This is an age of the printing press and the dissemination of knowledge and the dissemination of knowledge through type and white paper. Is there any sound reason why a pro-gressive clergyman should not resort to these modern instruments of pub-licity to fill the empty pews in his If then we are screed that the nub

licity of the printing press is legiti-mate and effective, why should clergy-men not make use of it? I can see nothing but a purely sentimental ob-jection. The medical profession, bound by ancient traditions, has felt "unethical" to advertise—but this stupid superstition is being broken down by the really intelligent men of the profession. The day will come when all progressive clergymen will feel as I do that every legitimate instrument must be used to draw the attention of mankind to the greates and most profound business of all-

When I took charge of the Epworth Methodist Episcopal church at White-stone, Long Island, I found the audience smaller than they should be. I reasoned that it was my duty to in-crease these congregations by attract-ing attention to the church. The first advertisement that I published increased the attendance in my church one-third; and I feel that my convictions have been amply justified.

WANAMAKER ON DAILY ADS

Advises Merchants to Use Newspi pers as Best Means of Reach ing the Public.

John Wanamaker gave frank and time of experience in successful merchandising, at the opening of the pure food exposition in Philadelphia recent-ly. Mr. Wanamaker urged especially the absolute necessity of newspaper advertising for an expanding trade and

"The first necessity to success in re tail trade," Mr. Wanamaker said, "is, of course, good merchandise. Quite as much a necessity to a business that is to keep up a healthy growth is good advertising. If you have in your shop exactly what 500,000 people in this city want, but only 500 of them know that FEED MAKES PIG PROFITABLE you have it, the care and energy you have expended in maintaining a stock of high quality do little good either to

"The satisfaction of knowing that your name stands for good merchandise is a great thing certainly, but it is not apt to be greatly profitable unle the public at large knows it also. And the profit of judicious and well-justi-fied advertising does not exist merely for the large merchant. A large newspaper advertisement undoubtedly atly put it holds attention

"But there are hundreds of small dealers throughout the city who would find upon experiment that newspaper advertising is the most powerful of all means for increasing their trade.

"A business association as such cal make use of newspaper advertising to would surprise you. Business men should mark each other up, instead of marking each other down.

The force of good advertising is easily nullified by clerks taking advantage of sharp practices or becoming petulant with thoughtless customers. The modern merchant is eminently a man of fairness, but his force must be brought to see the broad view of justice and unvarying politeness, and this policy, rigidly adhered to, is sure to build a patronage that com-petition cannot shake, or thieves break through and steal.

town so anxious to get jobs at Smith's

-They don't have to do muc work at Smith's store. He doesn't ad vertise.—Cincinnati Enquirer.

Advertising Pays Uncle Sam. Uncle Sam has had such good result from his advertisements for recruits for the navy and the army that the English government has adopted the plan.

Mr. W. T. Moore of Rocking ham county has sold the last o his 1913 crop of tobacco. Mr. Moore had in six acres, which sold for \$1,540. In addition to this crop Mr. Moore raised his home sup plies and he says that he would continue to do this and make his tobacco his money crop.

STRICT LAWS OF THE SEA

Advertising Talks

NEWSPAPER HABIT AN AMERICAN ONE

Press Best Advertising Medium Because of Its Intimate Relations With the Home.

By TRUMAN A DE WEESE. "The newspaper habit" is an American habit. In the old world countries newspaper reading is confined to the educated and prosperous few. If you step into a street car in the average American city you will see a sight that cannot be seen in any other coun-try on the globe—every individual de-youring the contents of a newspaper. The newspaper is their only source of activities of life.

In advertising it is the constant pounding that wears away the bar-riers of doubt and indifference. It is the frequent repetition of names and products that indelibly impresses them upon human memory and finally cre-ates a favorable attitude toward the products advertised. The repetition of selling arguments is the life of advertising. Suppose a manufacturer or merchant has an important announce-ment to make regarding a commodity. He very carefully and laboriously groups the argument in logical se-quence, presenting a compact, com-plete presentation of his proposition. It is the result of much study and revision. The advertisement is advely a work of art. In order to get in all He concludes to make "a complete job of it," so he runs it one time on a half page and pays for what he things is a big investment in pub-

He has followed the example of the small boy who touched off a wagonload of fireworks all at once. He has made a "flash." As a display of pub-licity pyrotechnics it is dazzling, but it is not advertising. It is contrary to the most elementary principles of

vertising he would have taken one sure that your life insurance dues ar selling argument at a time and ham- all paid." mered it home from day to day through constant iteration and reiter-ation. One-time advertising or "spas-modic advertising" is a waste of money, no matter how large the space or how compactly it is filled. It is constant repetition that gradually fixes a trade-mark or firm name in the human mind, and it is constant repetition that associates certain qualities ed for causing a disturbance. In the and uses with that trade-mark or court the magistrate asked him why

Now, if advertising is repetition of Now, it advertising is selling arguments, then the newspa-per is an advertising medium par ex-was the reply.

"We no understan mooth was the reply.

"Well, but you must have under-"Well, but you must have underper is an advertising medium par excellence, for it permits of daily repetition in a vehicle that sustains intimate relation to the home. It comes you to go," said the magistrate.

"I tink he come to dance," was the or every evening. It knows your friends and your neighbor's friends. It chronicles events and activities that are closely related to their inter ests. Its columns pulsate with the social and industrial life of the community in which your customers live. It carries the news of the town into the home of the dealer who sells your goods. Enterprise is a contagious from the Chelsea art coterie and the thing, and if your dealer sees your students of the Slade school. Augus advertisement in his home paper tus John, with his earrings, velvet coat advertisement in his home paper tus John, with his earrings, velvet coat, every day, it awakens in him a spirit and gipsylike "get up," is a most inconsciously absorbing your selling drin and the other French post-impresarguments until he can talk the sionists 15 years before they were product as well as you can. The known in England and long before the newspaper has chronicled the doname was applied to them. tions. The files of the paper contain his family history, the weddings, the eaths, the anniversaries. It source of information regarding his party, his church, his lodge. It is because of this intimate relation to the sain at Brussels recently, he became that the newspaper occupies a that he insisted on taking it to pieces field of its own as a medium, indispensable to the advertiser who must be to the great discomfiture of the head have a wide distribution for his products in order to secure the volume of usiness that will yield a profit on his

Secretive Advertising.

A prominent store in an eastern city s found it good business to keep the dates of its special sales secret until the preparation of these sales, how-ever there is plenty of publicity given them, the store's advertising telling everything except the date. Up-to-the inute merchandise is used in the winnd not only to arouse curiosity as to help business at the sales, but to on being outliness at the sales, but mecourage buying on the part of comers who come in only with the ention of asking the date,

Mariners, According to Old Portu-guese Manual, Seemed to Have Little Rights on Shipboard.

Some remarkable advice to seafar ers is given in an old Portuguese book, published for the guidance of marin-ers. Amongst other things it deals with the rights of captains to assault sailors, and the methods in which the

attacks are to be legally met.

The sailor is advised to bear calmly any verbal abuse that an irate skipper may huri at him, but if words passed to blows he was to run away into the bows and firmly take his stand beside the anchor chain. Should an infuriated master, armed

with a belaying pin or other lethal weapon, chase him to his stronghold, the mariner was to slip round to the farther side of the chain. Should he still be pursued, he was to call his messmate to witness that the master had broken the rules by circumventing the chain.

Then, at last, he was to defend

himself-and let us hope he would do it well! Other little matters of discipline are set out, and they show a noble effort to make the punishment fit the crime.

The ship's clerk, a privileged per-

aper is their only source of a non all the interests and son who acted as bookkeeper, pur of life.

The ship's cierk, a privileged to son who acted as bookkeeper, pur and cargo-master, was liable to branded in the forehead, to lose that wears away the barright hand, and to forfeit all his property if he made a wrong entry in the ship's book, or connived at such an

"Why is it," asked the feminist orator, "that the majority of women will not make big, determined strides "I guess," volunteered one of her hearers. "because their hobble skirts won't let 'em."

PROFITABLE AS EGG LAYER

own Leghorn Hen, Six Years Old, Stops Laying Just Long Enough to Hatch Out Brood.

As to the age limit of profitable egg production there are many exceptions to this rule. Some hens are never profitable egg producers, while others may be profitable for years. I have a three-fourths grade Brown Leghorn that is nearly six years old and she has not stopped laying since early last spring long enough to hatch a brood of chickens, says a writer in an exchange. She got broody last April and was given eggs, but she sat but a few days until ehe quit her nest and was laying again in a short time. She has been almost a continual layer up to this date, and is still laying. Much of the time she laid an egg every day. has not stopped laying since early last

day.

The regular profit of \$1 per fowl seems to satisfy the average poultry-man. This is wrong, for no one should be satisfied in any line of work,

but constantly striving for better results and larger profits. Two and suits and larger profits. Two and three dollars per fowl is a possible profit and is being attained by some

men in the poultry business today.

The secret does not lie in the fowl or the variety, but in the human brain. Let us all study more carefully the rules and principles that govern poultry culture. Let us strive to increase the profit in our flocks, and thus each year set up a new standard for the succeeding year. By thought, perseverance and persisten great things can be accomplished with poultry.

INJURIOUS HABITS OF HENS

Pulling and Eating of Each Other's Feathers May Be Cured by Al-lowing Them Free Range.

Sometimes a flock of hens acquire the habit of pulling and eating each other's feathers. In some cases they are so bad that the flesh of the fowls become torn and sore, and the whole flock is nearly naked.

When they first show the signs of this vice measures should promptly

be taken to cure them.

The trouble is caused by too closely confining the fowls and allowing them to be idle. Where possible they hould be turned on the range where the fascination of chasing bugs and

the inscination of chasing bugs and eating the green stuff will make thems forget the bad habit.

When they cannot be turned out they should be made to scratch for their grain in deep litter. Bundles of wheat or cats, or sunflower heads may be hung up just high enough that they will have to work to get the seeds. Give them some turnlps or mangle beets or cabbage heads to work at—anything to keep them in exercise and busy. Feed them plenty of green food, meat, meal, beef scraps

and green cut bone.

Rub carbolated vaseline on the plucked fowls where the feathers have been pulled out.

Cleanliness is more important than nedicine for poultry.

Plenty of buttermilk and clabber aves buying meat scraps.

Sanitation to the great chick rem-

edy. In other words, prevention Patient attention to the little things is what makes success with poultry.
Cull all your young chickens, keeping those nearest to the standard of
