Bucklen's Arnica Salve for All Sores.

Southwest Has Various Plants That Can Be Used for Purpose But Product of Sunflower State Is Given the Preference.

Kansas are cutting and marketing scap weed, or Spanish bayonet, to sup-ply the demands of scap manufacturers, according to a report recently re-Yucca bacata, a species with excep-tionally large fruits, is the most used. The soap manufacturers, however, utilize the tops or the roots. Manufacturers are paying eight dollars a ton for the plant at the railway sta-tions, while the estimated cost of cut-ting, drying, baling and hauling ranges DAMERON & LONG from five to ax dollars, depending upon the distance to the railroad. Since a man can ordinarily get out a ton a day, the gathering of the soap weed affords an opportunity to Becure a fair day's wages at a time when other ranch activities are not pressing. After cutting, the soap weed is allowed to dry from 60 to 90 days and then is baled up in the ordinary

> made into a soapy decoction which the Indian and Mexican women have used, particularly for washing their hair, for which purpose it is considhair, for which purpose it is considered especially suited, since it contains no alkali. Present-day, soar manufacturers use it for tollet and wool soaps. Its qualities have been known for a long time but the harvesting of soap weed is just now becoming commercially important.

The industry is now operating on lands adjacent to the Kansas national forest and it is expected that the demand will soon spread to that forest be made up of county organizations requiring at least 50 farmers in each county to form a branch association, some portions of which bear an abundant supply of the plant. There is a plentiful supply of it throughout each to conduct the marketing of all southern Colorado, Arizona, New Mexico and Texas.

Forest officers have considered this of the plant to spread over extensive areas and kill off other vegetation. It is particularly a pest on stock ranges. In line with its policy of range improvement; the government is anxious to rid the forage areas of all such injurious plants, and it is the hope of the forest officers that the com-mercial demand for soap weed will soon reach such proportions that it will not only take an otherwise use-less product, but also will eradicate it from areas which could be utilized to better advantage for the supplying of forage to cattle and sheep.

LADY DECIES IN CALIFORNIA

Former Vivian Gould and Husband Enjoying Beautiful Climate of Western Coast.

New York.—Lady Decies and her husband, who have only recently re-turned from a visit to the duke and duchess of Connaught at Ottawa, Can ada, are now with Mr. and Mrs. O. B

birds buried beneath a foot of snow is taken as an indication by sports-men that many others have died beneath the snow and that the hunting next season will be far from good.

The flock the keeper rescued is one that is allowed to roam at will on the game farm. After the big storm he noticed that the quali had disappeared. a search of outbuildings failing to re-eal them he took a shovel and pro-eeded to dig in a field not far from

the house where he had noticed that the quall spent most of their time. Eventually he discovered the birds. They would have perished in a few hours of starvation. Apparently they were unable to fight their way up were unable to fight their way up through the drift that covered them, as they were huddled together. First sld to the injured applied in quali fashion restored the birds so that they are now apparently as healthy and as lively as possible.

U. S. AS AGENT OF FARMERS
Unique Bill Introduced By Senator
Borah—Clearing House for Scientific Marketing of Products.

Washington.—A popular governWashington.—A popular govern-Washington.—A popular govern-ment institution for the scientific marketing of farm products, to be in a deep stratum of London soot, so that when he became dean of Arches and explored the room in which they were stored a spade was almost re-quired to dig them out. known as the Agricultural Capital, to be separate from any existing branch

Wealthy Sought Cheap Groceries. Designed primarily to eliminate middlemen and reduce the cost of Chicago.—In the crowds that flocked to the municipal grocery, where the living, to arrange transportation facili-ties and otherwise improve conditions city of Chicago sells food at cost prices, County Agent, Meyer recog-nized a dozen maids and butlers who admitted they were buying for famiof the farmers and consumers, the bill aroused considerable interest among senators by its radical suggestions, admitted they were buying for families whose incomes are more than \$200 a week. He refused to sell graceries to them.

The institution would be controlled by a board of 15 directors. It would be made up of county organizations

Vhat is Popularly Known as "Billing and Cooling" Doesn't Go i.i

When he is admitted within, his doom is sealed, if that is a proper expression in connection with a senorita of ravishing eyes and hair, says Cen-tury Magazine. Once he has become a visitor inside the great fort-like ors, he is expected to declare his intention, and stick to it. Even then there are no sentimental rambles for him and his senorita under the palms of the patio; there are no whispered conversations full of sweetly maudin monotony. He sits in a rocking chair that is one of a painfully straight row ranged down the middle of the room. His senorita sits in one in a similar straight row opposite. The rest of the row is occupied by the senor father and the senora mother and the senoras aunts and the senoritas sisters, and all the rest of the household. For an hour or two hours they rock at each other and speak noble polite nesses. Then the senor father begins tion that the big trusts had done more good for the public than the governto indicate, very much as senors fa-thers sometimes do in the United States, that he would lay the parental ment.

Asserting that competition is the head on the pillow. The senor lover mother of waste, Mr. Rettig said: picks up his hat from the stone floor "The law of business success is co- and rises. The senorita sweetheart

riving again some evening?"
"Some evening," is the next evening in the same rocking chair.

Not Always of a Tragic Nature, Some Even Humorous to All but the Victims.

The antics played by lightning are sometimes almost beyond belief. A common trick is that of undressing its victims. In 1898 two girls and an el-derly woman were standing by a reap-ing machine during a storm. A light-ning flash struck the woman and killed her on the spot, while the two girls were stripped to the skin, even their boots being torn from their feet, Otherwise they were safe and sound

—and astonished.
In 1855 a man was struck by light-ning near Vallerois, in France, and stripped naked. All that could be found afterwards of his clothes was a shirt-sleeve, a few other shreds, and some pieces of his hob-nailed boots. Ten minutes after he regained con-actousness, opened his eyes, com-plained of the cold, and inquired how

bilined of the cold, and inquired now he happened to be naked.

Such instances have been recorded again and again. In one case a man and two oxen were struck simultane-ously and all three killed. The man ously and all three killed. The man was found stripped to the skin, and his boots had been carried 30 yards away. "In other cases," says Camille Flammarion, the eminent French astronomer, "lighting has been known to split men in half, almost as with a huge ax. On June 20, 1868, this happened to a miller's assistant at a windmill near Croix. The lightning struck him and split him from his head downwards in two." head downwards in two."

Strange Story of Wanderings of a Set of Old English Court

Records.

London.—A strange tale of the wanderings of the records of the Court of Arches is told by Sir Lewis Dibdin. For some time prior to 1801 they were in a hired room in a house in Knight rider street; and when that house was rebuilt they were removed to St. Paul's cathedral, where they remained until 1865. It was a tradition that

regulation charge for its gratuitous

FEDERAL BUILDING, VERA CRUZI

The Touch of Genius,
Macpherson started to build a small outhouse of brick. After the usual plan of bricklayers, he worked from the inside, and, as he had the material close beside him, the walls were rising fast when noon arrived, and with it his son, Jock, who brought his father's dinner With honest pride in his eye, Sandy looked at Jock over the wall on which

he was engaged, and asked;
"Hoo d'ye think I'm gettin' on??" "Famous, feyther; but hoo dae ye get oot? You've forgot the door!" One glance round him showed Sandy that his son was right; but, look-

ing kindly at him, he said: "Man Jock, you've got a gran' held on ye! Ye'll be an architect yet, as sure's yer feyther's a builder."— Youth's Companion.

Tribute to Stenographers The classics are full of allusions which suggest that no matter what may have been the defects of shorthand, regarded from a modern standpoint, the stenographers of antiquity-must have been very expert. In some of Horace's satires he takes a fling at a brother poet who would often, as a great feat, dictate 20 verses in one hour standing in the same position. Horace says Luculius, of whom he spoke, was verbose and too lazy to endure the fatigue of writing. He may have been a sorry poet, but the stenog

rapher evidently, knew his business. BUSINESS NOT ALL OF LIFE Time Should Be Taken for Cultivation of Graces That Make Existence

Worth the Having. Business in its widest sense of commerce and industry is only a means to an end, remarks the Chicago Evening Post. It is an instrumental activity, a buttressing and bulwarking of a personal and social life that should be bigger and more important than any of the tools by which it maintains itself. To make business an end in itself, to devote one's whole life to it nstead of merely safeguarding one's life by it, is not only a mistake, but a blighting one. For business inevitably makes demands on a man's character which would rapidly sear and sear it if the contrary demands of culture, religion and the art of using lefsure

did not counteract.

A little illustration of this tendency without its indicative value-is given by German manufacturers. They sending out slips to all their corre-spondents asking them to omit all forms of courtesy in their future cortorms of courtesy in their future cor-respondence. Terms equivalent to our "Dear Sir" and "Yours. truly" waste too much time. With half a man's life spent on a schedule of such severe utilitarianism as that, the need for a counteracting mood of ap-preciation, of the cultivation of the graces of life, is obvious. The idea of devoting all one's activities to the demands of such a spirit—and too many men do just that—is revolting to the most rudimentary sense of rela-tive values in human life.

WITH NATURE'S HAIR DYE Young Lady Visitor to South America Brilliant Red.

A young woman ran down the gangway of the ship just in from South American ports, and flung her arms about the neck of a man who had been waving to her.

"Gracious, Natale!" he cried, "what's the matter with your hair? It's red, and it was blonde when you

went away."

"Oh," smiled the young woman,
"that's the result of a shampoo from
the water of a little lake in Ica, Peru."
She told that during a recent visit
to Ica she had found that the Indians
there had their hair thred every imaginable color. She learned that they aginable color. She learned that they dyed their hair with the waters of several small lakes in Iga, all of which contained water of different colors. "I thought that I would look so much better if my hair was a deep

red, so I went to the lake containing the reddish water, named Huscachins, and shampooed my hair. It certainly worked fine." Oyster's Ups and Downs.

The total number of persons engaged in the oyster industry of the entire United States is 67,257, with yearly wages amounting to \$10,786,301, and the capital invested, excluding

lighthouse fee. There is no other the value of the private beds, is \$16. of a bushel for every man, woman and of a bushel for every man, woman and child in the country. Every restau-rant, however humble or wherever situated, as well as every great hotel, is expected during the season to have oysters on the bill of fare. In olden times the epicures of Athens and other cities close to the ocean had an abundance of shellfish such as we use, and enjoyed them very much. But to the Jews this kind of food was forbidden Jews this kind of food was forbidden by their law, which, allowing certain kinds of fish, rejected much sea food, including the oyster, which was prob-ably little known to the ancients. "And whatsover hath not fins and scales ye may not eat; it is unclean unto you" (Deut. 14:10).

> "All sorts and conditions of men have excellent explanations for their position in life," said the senator. "A tramp, however, came under my ob-servation who had no illusions about the cause of his own condition. "A fine looking and fashionably

dressed woman had just alighted from her limousine at the hotel entrance and was suddenly approached by this shabbily dressed man, who requested a dime. 'No, I have no money to spar

for you. I do not see why an able-bodied man like you should go about begging.' a "'' I s'pose, ma'am,' replied the lazy

tramp, 'it's fer about the same rea-son that a healthy woman like you boards at a hotel instead of keepin' boards at a hotel instead of house."—Harper's Magazine.

Knowledge and Spelling.

It is jolly to read among all the ontests of spelling reformers that we bad spellers spell badly because we know too much. I am speaking sadly of myself. When once you know three or four languages-say French, Latin Greek and English—you can never be certain what is the accepted way of spelling such words as "apartment" or 'address," or even "literature." German and Spanish make for despair The more languages you learn the worse you spell your own. Which encourages me to spell as I please.— London Chronicle.

No Danger.

"Weren't you afraid that the doctor you sent for might not be able to re-lieve the baby when it choked on the pieces of dough it tried to swallow?" "No indeed! One thing a doctor never fails in is to make any of his patients cough up the dough."

Buy a well-made silo. Pure air prevents disease. Burn all trash in the garden.

Cowpeas are used for cover crops. Don't let the churning go until to-

One thing should not be forgot. Send surplus cockerels and old hens Vancouver, British Columbia, is to

have a \$400,000 factory for preserv-Improper ventilation makes more een houses cold and damp than rain

and zero weather. Give close attention to the little hings and the larger matters will take

care of themselves. In planning for early pigs next spring your plans should include a good clover field to turn them on as soon as big enough to eat grass. In such a combination there is a profit.

There is no use trying to work miracles with cows. A cow is a machine, in one sense, for turning feed into milk. Like all machines, it must be provided with the right sort of raw material.

There is a fascination about breed ing thoroughbred fowls that gives one satisfaction. When we see the results of our trouble we do not regret the care and attention which good poultry

ANTI-SUFFRAGISTS ARE HIT

Miss Sonya Levin, an Emigrant Girl, Denounces Suffrage Foce at Wash-ington Meeting.

New York.—Miss Sonya Levin, the charming young girl who posed for this photograph, is the product of what Zangwill calls the "melting pot" of New York. Coming to this country from Russia at the age of five, she has managed by the hardest kind of work to climb the ladder until she has reached an enviable position. She is a lawyer connected with a well-known legal firm which, on several occasions, has intrusted her with important missions to Europe, because as they say, she "always comes back with the goods." Miss Levin was a delegate to the Woman's Suffrage convention, held in Washington, and hotly denounced the anti-suffrage statement that the "working women do not want to vote." Being an indefatigable worker herself, having labored since she was ten years old, both in factory

Miss Sonya Levin.

office, she feels that she kno what she is talking about when she denounces any movement against per mitting women, and especially women

BACK TO THE HOLY BIBLE

Where Comfort Still is Found for Longing Ones as in the Days Long Past.

New York.—Certain of our wise men of today have shaded away sin till it becomes an expression of tem-perament, says Collier's. They tell us that we sin because our grand-father sinned and because our home is situated in the wrong block. These are clever words of clever comforters, are clever words of clever comforters, and surely they ought to wipe away forever the tears from our eyes. But they do not speak to human need. They leave the life blighted and the heart ashamed. They leave the sinning one to continue in despair. He does not ask that his sin shall be explained away. He wishes forgiveness and a fresh start. In the book, which is not read as once it was, there are no soft words about sin. But the way is not read as once it was, there are no soft words about sin. But the way out is shown. And not only is for giveness offered in this book, but man's need of comfort is met. There is comfort in plenty. These writers knew the human heart. They saw man broken by his toil and his grief. And for this, too, they had the answer. They told of a being of love, hidden just back of this rude and temporary universe. This love, they said, is conscious of how the littlest child and the old man are sick at heart for one to come close to their loneliness. When again will any company of writers say the things they know in such telling words, such pictures of humble life—the boy far away from the faces of his home and away from the faces of his home and far gone in shame—such true stories of lowly devotion breaking through into beauty? Much is swept away between us and them, but not one acand still the "Turn again, my daugh-ters," is as wistful as when it breathed through the alien corn. What richer consolation are we hun-Don't let the churning go until tomorrow.

Mars Canals Changing

Mars Canals Changing.

Boston.—The canals of Mars are now exhibiting striking seasonal developments, according to Dr. Percival Lowell of the Flagstaff (Ariz.) observatory. In a dispatch received here he said: "The north polar cap of the planet is melting, and the canals are strongest and darkest near the edge

of the cap."

This is said to be in accord with Doctor Lowell's theory that the melting of snow at the Martian pole produces floods that, sweeping south, are responsible for color changes in the canals.
