

# THE GLEANER

ISSUED EVERY THURSDAY.

J. D. KERNODLE, Editor.

\$1.00 A YEAR, IN ADVANCE.

ADVERTISING RATES  
One square (1 in.) time \$1.00, 10 squares, 10 cents. For longer time, rates furnished on application. Local notices 50 cents a line for first insertion; subsequent insertions 25 cents. A line transient advertisements must be paid for in advance.

The editor will not be responsible for views expressed by correspondents. Entered at the Postoffice at Graham, N. C., as second class matter. GRAHAM, N. C., July 9 1914.

All editorial space is given over to local matters this week.

## County Commissioners' Proceedings.

The County Commissioners met Monday in regular monthly session with the following members present: Geo. T. Williamson, chairman, W. H. Turrentine, Ches. H. Roney, Chas. F. Cates, John M. Coble, and the following business was transacted:

Blackmon-Thompson Store Co. was relieved of State tax, \$11.07, same being a corporation and the State tax being paid direct to the State Treasurer.

W. T. Huffines was relieved of one poll tax, erroneously listed, he living in Guilford county.

A. T. Ingles was relieved of Graded School tax, \$2.72, for Elmira Graded School, not being in district.

The petition to change the Public road in Boon Station township was laid over until the next first Monday.

Jacob Horner was relieved of poll tax on account of disabilities.

C. M. Clark and Thos. Trölinger, colored, were relieved of poll and road tax on account of disabilities.

J. J. Self was authorized to furnish Emeline Paul in provisions to the amount of \$1.50 per month for two months.

W. H. Gant & Holt Mfg. Co. were authorized to furnish Margaret E. Smith in provisions to the amount of \$1.50 per month for two months.

R. N. Cook, Sheriff, was authorized to summon a lawful jury and assess the damages, if any, caused by widening and straightening the public road through the premises of Lewis H. Holt and H. C. Stout.

Geo. T. Williamson, W. H. Turrentine, Ches. H. Roney, Chas. F. Cates and John M. Coble were appointed delegates to the State meeting of the County Commissioners which meets at Fayetteville on August 12th, 1914.

Whereas, a number of citizens of Alamance county have petitioned this Board to ask the proper railroad authorities to have timbers placed at all the crossings in the county on the outside of the rails and also on the inside between the rails, so the crossings be more comfortable and less dangerous to travelers, therefore, be it resolved that this Board ask the proper authorities of the railroad to carry out the above request as soon as they can conveniently do so.

Ordered that the matter of changing the road near D. M. Elder's be heard the first Monday in August.

The report of Chas. D. Johnston, Register of Deeds, was accepted and filed.

The report of G. Ab. Fogleman, Supt. of Roads, was accepted and filed.

The report of A. B. McKeel, Supt. of the County Home was accepted and filed.

The report of Dr. Geo. W. Long, Supt. of Health was accepted and filed.

It is ordered by this Board that R. N. Cook, Sheriff of Alamance county, proceed at once to collect all unpaid taxes, and that he be authorized, and he is hereby authorized to levy on all real and personal property belonging to the delinquent tax payers, for the collection of said taxes now past due, and it is further ordered, that said Sheriff be required to make settlement of all State and County Taxes the first Monday in August.

The Board adjourned to meet the 13th of July, it being the second Monday, to receive the tax lists and to hear any complaints that may be made as to the valuation of personal property.

The North Carolina Rural Letter Carriers' Association, was in session in Winston-Salem Friday and Saturday, and decided to hold its next meeting in Charlotte. L. H. Wright of Ruffin was elected president.

Mr. Jno. McCollum, aged 70 years, near Deep Creek church, Yadkin county, was found unconscious near his home Tuesday morning and died in a short time. He was feeble and fell while going to his mail box. Wife and five children survive.

While attempting to cross the tracks of the Southern Railway near Buebee, Buncombe county, Friday, Robert Raines, a railway section hand, was killed by a train. It is said that he had just been aroused from sleep when he started across the track in front of the train. He was 18 years old and lived at Buebee.

Geo. Searrett, aged 40, a stereotyper on the Atlanta Constitution, was drowned and three others had narrow escapes at Moore's Inlet, Wrightsville Beach, Saturday morning. Coming in from a fishing trip outside their motor boat ran into a heavy sea. Mr. Searrett was washed overboard and other members of the party—Abner Wooten, Arthur Butt of Charlotte and J. C. Herring of Wilmington were later thrown into the sea, but were rescued. Searrett's body was not recovered.

## CRIMSON CLOVER

### The Premier Clover For North Carolina Farmers.

Crimson clover has a wider adaptability to southern climate, soils, and cropping systems than any of the other clovers. It is generally not only a surer crop than red, alsike and mammoth clovers, outside of the more elevated sections, but will grow well under the conditions best suited to the other clovers.

The root-system is comparatively large and strong. It is made up of a branched tap root with many secondary branches and fibrous roots which penetrate the soil to a depth of one to three feet. Tubercles appear on the roots of the plants when they are quite small. On an average the roots comprise about one-third of the whole plant. The full development of the roots of the plants is reached some time before the tops. With summer or early fall sowing the root growth to stem growth in the fall is usually proportionally larger than in the spring.

Although crimson clover is an annual it has a semi-biennial habit as it when sown in the summer or fall will mature during the spring of the following year. It is upright in its habit of growth, and under favorable conditions attains a height of 20 to 30 inches. From the crown of the root are developed four to thirty or more erect branches on which a large amount of foliage is produced. The stems and leaves are quite hairy. The heads are terminal, being some distance above the last leaves and are somewhat longer than those of red clover. They are of a rich crimson color and are strikingly beautiful in their appearance. The leaves are borne on long leaf clover. It is much earlier in maturing in the spring than the red, alsike or mammoth clovers. It grows late in the fall and starts early growth in the spring. The plants grow rapidly during the latter part of their development, producing about one-half of their growth during the last month before maturity, and for this reason the stalks are rather weak. It is quite susceptible to drought and excessive cold.

### VARIETIES.

There are two varieties of crimson clover, the common form which has crimson blooms, and a somewhat smaller type which has white flowers. The white blooming variety is about two weeks later in maturing than the common crimson clover. Each of these has its special adaptations.

### SEED.

The seed are oval in shape and are much larger than those of any of the other common clovers. New seed are of a bright reddish yellow color and have a glossy appearance, while old seed are brown in color and of a dull lustrous. The seed are less subject to adulteration with other seed than most of the other clovers. The seed will mature in the different localities grown usually during May or early June.

### DISTRIBUTION.

Crimson clover is most extensively grown in the territory east of the Allegheny Mountains, extending from Northern New Jersey to the Gulf States. It can be grown to some extent in the Central States, but will not usually survive the winters north of latitude 40 deg. In the Southern States the acreage devoted to this clover has been greatly increased during the past few years. It is no as hardy as red clover, and does not grow well generally in those sections well suited to the growth of this clover.

### SOIL AND ITS PREPARATION.

Although this clover will grow on a good many types of soil, it does its best usually on a warm, sandy loam containing a good supply of organic matter. It does not do well on stiff and poorly drained soils, nor does it generally grow on poor sandy soils devoid of organic matter unless they receive liberal applications of a complete commercial fertilizer or barnyard manure or both. These soils are naturally too draughty and the young plants are more than likely to die for lack of sufficient moisture. In sowing in he fall on clay soils it is important that it be done sufficiently early for the plants to become thoroughly established before cold weather or else they will be likely to heave. This will be apt to take place if the soil is not well drained, matters not what the type of soil or date of seeding, especially if the winter be severe. It is highly essential that the seed bed be fine so that it will retain sufficient moisture to germinate the seed and supply the needs of the young plants until they have become well established in the soil.

### SEEDING.

The seed should be sown at the rate of 12 to 20 pounds to the acre, the date varying from August 15th to October 15th, with the different sections in the Eastern and Middle States, the more Southern the localities, the later the sowing may take place. The seeding may take place sooner on a fertile soil than

on a poor one; and on a specially prepared seed bed than when sown in some growing crop like corn. If the clover is being grown especially for seed a rather thin seeding is preferable to a heavy seeding. It is important that the plants make considerable growth before winter. The seed may be sown in corn, cotton, and tobacco, as a catch crop and be lightly covered with a harrow or weeder. It may follow truck, cowpeas, or small grain by breaking the land with a plow or disk harrow sufficiently thorough so that harrowing will put the land in fine mellow condition. The seed should be sown broadcast and be lightly covered by means of a harrow or weeder. It will generally be found well to roll the land immediately after covering the soil. From the seed are sown during hot weather great care should be taken to provide a good seed-bed. Although the seed are generally sown alone it will frequently be found advisable where grown for hay to sow with some crop like oats, using one of the early maturing varieties like Burt, Kherson or Culberson. Where seed of the white blooming variety is sown with oats use such varieties as Red Rust Proof or Applier, which are later maturing, as they reach the haying stage at about the same time as this variety of clover. A good seeding will be secured by using 1 1/2 bushels of clover seed with 8 to 12 pounds of oats seed. When the growth for soil improvement solely and its growth is to be plowed under green, rye is sometimes combined with clover, using about two to three pecks of the former with 8 to 12 pounds of the latter, putting the seed of each in separately. The seed are sown in the same way and by the same methods used in seeding other common clovers. On stubble land a good catch can frequently be secured by simply disking the land followed by a thorough harrowing; then harrow lightly and roll after the seed are sown.

### ROTATIONS.

Crimson clover should be grown as a catch crop for the purpose of enriching the land as well as protecting it from washing during the winter and spring. It may follow a small grain crop, or a cotton, corn, tobacco or truck crop by being lightly harrowed or cultivated in between the rows of growing crops during the month of August or early in September. As nearly as possible farmers try to sow the seed at the last cultivation of the crop, in order to save labor. It may be plowed under the following spring or cut for hay and the stubble turned in time to go in corn or some other summer crop, but not in time usually for cotton tobacco. In this way a crop may be secured and the land greatly benefited by plowing under the whole crop or the stubble. It is frequently used in peach orchards as a winter crop. It about completes its growth and may be plowed under in the spring as the growth of the peach trees are getting good under way. It is one of the best cover crops for the Southern farmer to use in his rotations.

### HARVESTING.

Usually 1 to 2 tons of crimson clover hay may be secured per acre. The hay is of good quality being nearly equal to that of the clover when cut at the right stage, but is frequently somewhat difficult to cure as it comes on before the hot weather of summer and at a time of the year when showers are usually frequent. As it contains less proportion of leaves it will stand more rain, however, than red clover. Cut when the dew is off and just when it arrives at full bloom, for if allowed to go beyond this stage to full maturity it becomes coarse and woody. After cutting allow to wilt thoroughly, but not sufficiently long for the leaves to become brittle; then rake into windrows and throw into high cocks of relatively small diameter. Allow it to remain here for some days. Before hauling to the barn open up the cocks so they will be thoroughly aired and dried out. The stiff hairs on the sides of the heads of such hay is liable to produce hair balls in the stomach of horses and mules and cause death when fed as the exclusive roughage. To prevent the occurrence of this trouble where over mature crimson clover hay is to be fed, it should be combined with grass hay or corn stover in proportionally large quantities. The hay of this clover does not deteriorate as much nor leaves shatter so badly as red clover hay by exposure to sunshine and rain.

In removing the hay from a field of crimson clover about one-third of the total nitrogen of the entire plant is left in the soil in roots and stubble, he other two-thirds being contained in the tops removed as hay. In this country seed are chiefly produced in Delaware and Maryland and to a lesser extent in Virginia and Ohio. For seed he clover should be cut when the heads have turned brown and during the morning when the heads are tough, in order to prevent shattering. The clover is very difficult to harvest for seed as the seed pods readily fall from the heads when ripe. Again, a rain or a spell of wet weather at this time will frequently cause the seed to sprout in the heads as they dry very slowly after once thoroughly wet. The hauling should be as little as necessary after cutting and to secure complete curing and should be handled with as great care as possible in order to reduce shattering to a minimum. The separating of the seed from the hulls may be done in the same general way as red clover, but it will be best usually to do it directly from the field and not attempt to stack as here the clover would be liable to heat and cause the seed to become dark. Seven to ten bushels of clover seed is a good yield per acre. As the home supply is not equal to

the demand a good many seed are imported annually from Europe.

### GRAZING.

Common clover is prized highly as a pasture or grazing crop. When sown sufficiently early it makes rapid and sufficient growth to supply considerable pasturage during the late fall and early spring, and more or less during the winter months in the milder sections. It makes earlier pasturage than any of the other clovers; and if grazed moderately may be cut later for hay or seed without materially lessening the yield of either. In this way considerable, excellent grazing is provided for the animals at the time of the year when green feed is always scarce. Care should be taken not to pasture too severely as such would greatly injure and tend to destroy the clover. It cannot be used for permanent pasture as its growth ceases with blooming. Crimson clover pasture is not suited by all kinds of stock, but it is especially valuable for grazing hogs, cows, sheep and poultry.

### FOOD VALUE.

In feeding value crimson clover is not greatly different in chemical composition and digestibility from the other common clovers. It is not generally as highly prized for hay by feeders as red clover, but for pasturage and as a soiling crop it is very highly esteemed, especially by eastern and southern dairymen.

For further information address Division of Agronomy, Agricultural Experiment Station, West Raleigh, N. C.

### It's A Good Letter After All.

Fourth Estate.

Someone has advanced the opinion that the letter "e" is the most unfortunate letter in the English alphabet, because it is always out of cash, forever in debt, never out of danger and in hell all the time. For some reason he overlooked the fortunes of the letter, as we call his attention to the fact that "e" is never in war, always in peace, the commencement of ease, and the end of trouble. Without it there is no life and no heaven. It is the center of honesty, makes love perfect, and without it there could be no editors, devils or news.

### \$100 Reward, \$1000.

The readers of this paper will be pleased to learn that there is at least one cure in this world for the terrible disease known as Chamberlain's Colic, Cholera and Diarrhoea Remedy. It is a simple, safe, and effective remedy for all cases of this disease, and is the best medicine in the world. It is sold by all druggists and is the only one that will cure. Send for list of druggists.

Mrs. Amelia Heilig, widow of Col. P. N. Heilig, died Friday at her home in Salisbury. Two sons, Jno. G. and James D. Heilig, survive. Joseph E. Hill, county superintendent of schools of Davidson county, died at his home at Lexington Thursday night of typhoid fever. He was a native of Stokes county, was about 50 years old and was unmarried.

### The Best Medicine in the World.

"My little girl had dysentery very bad. I thought she would die. Chamberlain's Colic, Cholera and Diarrhoea Remedy cured her, and I can truly say I think it is the best medicine in the world." writes Mrs. William Orvis, Clare, Mich. For sale by all dealers.

Joseph H. Wentz, assistant chief of the Charlotte fire department, has been elected to succeed Chief Wallace who was killed last week. Louis Abel Kever, 60 years old, died in Newton last week from a rupture of the spinal cord. A few days before he had tussled with a friend and both fell into a ditch, Kever receiving the injury which proved fatal.

### Surprising Cure of Stomach Trouble.

When you have troubles with your stomach or chronic constipation, don't imagine that your case is beyond help just because your doctor failed to give you relief. Mrs. G. Stongle, Plainfield, N. J., writes, "For over a month past I have been troubled with my stomach. Everything I ate upset it terribly. One of Chamberlain's advertising booklets came to me, after reading a few of the letters from people who had been cured by taking Chamberlain's Tablets, I decided to try them. I have taken nearly three-fourths of a pack of them and can now eat almost everything that I want." For sale by all dealers.

Adjutant General Young says more than 1,000 men of the State National Guard have taken the typhoid vaccine and there are frequent calls for the treatment. Morse Enquirer: A wild sweet potato was found on Mr. F. H. Wolf's place west of town a few days ago. The potato was an exceedingly large one of the variety, weighing at least three-quarters of a pound. The wild potato is seldom found in these parts.

We shouldn't worry when there is such a fine lot of young men and women just coming along with diplomas to keep the world turning right for us.

## A Certain Quick Relief for Indigestion or Up-Set Stomachs

Why suffer the tortures of indigestion, sour stomach, belching or other stomach upsets? There is a certain quick relief and permanent remedy for these disorders—BROWN'S DIGESTIVE TABLETS. They give relief almost instantly. One dose makes your stomach feel fine. It stops fermentation, prevents distention, digests all the food and restores your bowels to normal. It is a beautiful condition. Digestion is perfectly harmless—even a

### Cannibals on Solomon Isles.

New York Times.

A letter descriptive of one of the chief cannibal settlements and the rites of the savages was recently received here from Sydney from a traveler who had spent some time in the cannibal infested Solomon Islands in the Pacific. The Solomons are the cannibalistic hub of the South Pacific, although human flesh is also eaten in the Marquesas and New Hebrides Islands.

"Managers on land, managers in the water; for God's sake steel clear of the Solomons!" was the advice given to this writer when he first expressed his intention of visiting these islands. In Fiji the travelers are still so advised.

"At Suva" says the writer of the letter, "the mate of a trader told me: 'You can chuck a pig overboard anywhere in the Solomons, and five minutes later walk ashore on the black dorsal fins to sharks. But what's the use? The blacks will snap you up and pick your bones the minute you reach the beach.'"

"Cannibalism, which has always been practiced in the Solomons, owes its persistence not to any predilection for human flesh," says the writer of the letter, "but to the fact that it is looked upon as a religious and tribal right."

"The sacrifice is not always—in fact is not usually—a white man. But if a trader or missionary happens to be in striking distance when a victim is required, the prophets or the priests are more than likely to receive information from the spirits that only the flesh of a foreigner will answer the purpose of the ceremony."

### Stops Neuralgia—Kills Pain.

Sloan's Liniment gives instant relief from neuralgia or sciatica. It goes straight to the painful part, soothes the nerves and stops the pain. It is also good for rheumatism, sore throat, chest pains and sprains. You don't need to rub—generates Mr. R. Swingle of Louisville, Ky., writes, "I suffered with severe neuralgic headache for four months without any relief. I used Sloan's Liniment for two or three nights and I haven't suffered with my head since." Get a bottle to-day. Keep it in the house all the time for pains and all hurts. 25c, 50c and \$1.00, at your druggists.

### Bucklen's Arnica Salve for all sores.

Six State News. While on a fishing trip at Second Creek, seven miles from Salisbury, Frank Byrd, 23 years old, was stricken with heart trouble while in a boat and fell in the water. His brother, Joe Byrd, dived and recovered the dead body. Byrd is survived by a wife and child. He lived at Granite Quarry.

### Relief in Six Hours

Distressing Kidney and Bladder Disease relieved in six hours by the "NEW GREAT SOUTH AMERICAN KIDNEY CURE." It is a great surprise on account of its exceeding promptness in relieving pain in bladder, kidneys and back, in male or female. Relieves retention of water almost immediately. If you want quick relief and cure this is the remedy. Sold by Graham Drug Co.

### Henry Carleton of Wilkes county, was shot and killed at Naughtuck, W. Va., last week.

Carleton and a man named Maynard were deputized by the Sheriff of Mingo county, W. Va., to arrest Hiram Prince. The latter shot at Maynard and Maynard was in the act of shooting Prince when Prince knocked the revolver aside and the ball struck Carleton killing him instantly. Maynard then killed Prince. Carleton was 42 years old and leaves a wife and four children. His remains were brought to Wilkes for burial.

### Dr. E. Detchon's Anti-Ducretic may be worth more to you than \$100 if you have a child who soils the bedding from incontinence of water during sleep.

Cures old and young alike. It arrests the trouble at once. \$1.00. Sold by Graham Drug Company.

### Dr. E. Detchon's Anti-Ducretic may be worth more to you than \$100 if you have a child who soils the bedding from incontinence of water during sleep.

Cures old and young alike. It arrests the trouble at once. \$1.00. Sold by Graham Drug Company.

### Douglas Is Named By Progressives

Greensboro, July 7.—The Progressives of the Fifth Congressional District met here Saturday and nominated Martin F. Douglas, a young attorney of this city, as their candidate for Congress. Mr. Douglas is about 26 years of age, a man of integrity and ability. He is a son of Justice R. M. Douglas, late of the State Supreme Court, a brother of Postmaster R. D. Douglas, and a grandson of Stephen A. Douglas, the "Little Giant" of Illinois, and famous opponent of Lincoln.

In accepting the nomination, Mr. Douglas said among other things, "Personally, I may get nothing more out of this campaign than a severe defeat. But, he is not a man who will not dare the issue and battle in the cause of truth, hopeless the task may be. This time we may not win, but we will be right. And we have come to stay."

### Has Your Child Worms?

Most children do. A coated furred tongue, strong breath, stomach pains, circles under the eyes, pale, sallow complexion, nervous, fretful, grinding of teeth, tossing in sleep, peculiar dreams—any one of these indicate the child has worms. Get a box of Kickapoo Worm Killer at once. It kills the worms—the cause of the child's condition. It is a laxative and aids Nature to expel the worms. Supplied in candy form. Easy for the children take it. 25c at your druggists.

Among the principal American exports for June will be the International Polo Cup.

The North Carolina association of osteopaths was in session in Raleigh this week. Dr. A. R. Tucker of Raleigh is president. There are about 40 osteopaths in the State and seven were licensed at this meeting. The next meeting will be held at Wrightsville Beach.

### Sick Headache and Constipation!

Sick headache, sour stomach, bad breath, furred tongue and indigestion, mean liver and bowels clogged. Clean up to-night. Get a 25c bottle of Dr. King's New Life Pills to-day and empty the stomach and bowels of fermenting, and gassy foods and waste. A full bowel movement gives a satisfied thankful feeling—makes you feel fine. Effective, yet mild. Don't give. 25c at your druggists. Bucklen's Arnica Salve for burns, sores.

### Mr. E. S. Loper, Marilla, N. Y., writes: "I have never had a cut, burn, wound or sore that would not heal."

Get a box of Bucklen's Arnica Salve to-day. Keep it handy at all times for burns, cuts, Wounds. It prevents lockjaw. 25c at your druggists.

### Thomas Page of Granite Quarry, Roman county, tore down a placard placed at his well by the county health officer to warn the public that the water had been found impure by analysis.

For this offense he was fined \$10 and cost in Rowan County Court. The case was appealed to the Superior Court.

"English Spavin Liniment removes Hard, Soft and Calloused Lumps and Blemishes from horses; also Blood Spavins, Curbs, Splints, Sweeney, Ring Bone, Stiffes, Sprains, Swollen Throats, Coughs, etc. Save \$50 by use of one bottle. A wonderful Bleemish Cure. Sold by Graham Drug Company.

## MILLSTONE PRODUCTION IN 1913

The production of millstones and related quarry products—burrstones, chasers and drag stones—in the United States in 1913 amounted to \$56,163 in value, a decrease of \$15,251 compared with 1912. The production of millstones in this country in 1913, was nevertheless larger than in all but three years since 1885, when it was valued at \$81,000. Millstones were produced in 1913 in Alabama, New York, North Carolina, Pennsylvania and Virginia.
