much larger tann last year, and that a larger number of States wiil represented.

The ideal location of Elon College—64 miles west of Raleigh and 17 miles east of Greensboro, on the N. C. Division of the Southern Railway, running between Goldsboro and Charlotte—has had no little par to play in the success which this college has attained. It is possible for the student here to enjoy the advantages of town life without the temptations of the same, and to possess at the same time the freedom of the country. So desirable is the climate and so healthful the condition of the community, that during the past eight years there has not been a death in the student body of the college and rarely has there been a case of serious illness. This latter statement is emphasized by the fact that while in one of the college buildings there is a well equipped inirmary, it has never been used, nor is a medical fee included in the expense account of the students.
