Colonel Roosevelt arrived in Lou-isiana in the thick of a fierce bat-tle in the Progressive party in that State. It used to be that there was never a fight unless the Col-onel started it.

West Va. Fire Marshel Bulletin.

The fire insurance rate is a tax upon the business men just the the same as is the State, county and city levy. Its reduction is a problem of vital interest to every man who owns property.

The reduction can be brought about and is within the reach of the insuring public. How? Reduce the losses by careful and well planned campaigns against the ordinary fire hazards. Our stores and houses are full of hazards that can be removed at small cost.

In the State of Ohio, where after a number of years of co-operation given by the public to the Fire Marshall Department, the Fire Prevention Bureau and similar organizations, the underwriting interests have ordered a complete re-rating of the State with the view of giving to the people of State a lower rate, due to the decreased loss ratio.

West Virginia can secure the same results, Let's get rid of our fires before they start. Remove the hazard. ENJOY

The worst feature of this dastardly action is the fact that these missiles are often directed against and accomplish the wholesale destruction of non-combatants. When two hostile armies battle for the two hostile armies battle for the supremacy they meet face to face and engage in honorable combat Is it according to the usages of war, and is it humane for these bi-planes to halt over a sleeping city and drop these bombs and ruth-lessly slaughter men, women and innocent children, who for the most part are non-combattants.

Memphis, Tenn., Sept. 18.—Because of the export lumber trade from the United States has been heavy and because of these shipments would be contraband, as all building of homes in the war zone has been stopped, Southern lumberman foresee a heavy loss in their industry on account of the European war. Already the shipment of lumber from Southern ports is entirely paralyzed, Great ment of lumber from Southern ports is entirely paralyzed. Great losses already have been sustained through the seizure of vessels on the high seas when war was declared, or through cargoes diverted to poins at which the timber canhot readily be sold because the lumber intended for export to one country is very seldom in such shape as to be readily salable in another. In actual figures, the countries directly or indirectly involved in war take each year about 700,000,000 board feet of American timber, of which about 650,000,000 feet is Southern yellow pine.
