BELGIUM AGAIN CENTRE OF WAR

Germans Making Desperate Assault On Antwerp, The Temporary Capital Of The Belgians

AISNE BATTLE UNTETTLED

Allies Have Forced Battle Line To Bel

Belgium is once more the scene of the fighting of the allied armies of France and England against the Ger-mans. During the past week the allies have succeeded in pushing the German armies back to the Belgian border. Antwerp, the temporary capital of Belgium, and one of the strongest fortified cities in the world is being besieged by the Germans. The world awaits the outcome.

The battle of the Aisne, which was

In progress north of the Aisne river in France for more than a month, will go down in history as one of the greatest battles the world has ever known.
The area over which the fighting occurred occupied almost the entire
portion of France and at times the main battle lines extended over 150 miles in length. The casualties on both sides were astounding.

For days the great armies of the al-

ies and the Germans swayed back and orth. At some points the allies would gain the advantage, while at others the Germans were victorious, but dur-ing these days neither side were able o gain an appreciable advantage. Folto gain an appreciable advantage. Following desperate fighting on both sides for several weeks the battle settled down to a siege. It was even predicted by military experts of the contending nations that winter would find the contending armies still fightng on the northern border of France The predictions that have been made by writers that areoplanes would play a prominent part in the future wars has in part become true. Although they have failed so far to live up to the expectation of the writers when it came to destroying whole fleets of ships and entire cities, but they have

proven themselves indispensable in alding the armies in battle.

It has been the aeroplanes that have soared over the battle lines that located the strength of the enemy and

cated the strength of the enemy and made it possible for the commanders to keep in touch with what was going on along a hundred mile battle line. Raids over Paris were made by German aeroplanes during the past week and the British aircraft succeeded in making another successful excursion into Germany. The damage done in both flights were slight.

The war in Europe has been in progress for more than two months and so far there has been no decisive battles fought either on land or on sea. It now appears that the war will last through the winter with alternate victories for the combatants. The battle of the Aisne between the allies and the Germans in the north of France has developed into a siege and may last for weeks longer. The and may last for weeks longer. The greatest activity is now being found in East Prussia and Poland where the great armies of Russia are preparing for an invasion into Germany.

Treckled Girls

It is an absolute fact, that one 50 cent jar of WILSON'S FRECKLE CREAM will either remove your freckles or cause Germans Defeated In Prussia

of the rulers of the countries at war are at the front. When the condi-tions in East Prussia grew to alarmtions in East Prussia grew to airming proportions and a Russian invasion menaced Germany, Kaiser William hastened to East Prussia. King Albert of Belgium has been constantly with his troops in their fighting against the Germans in Belgium. Czar

Gen. Von Moltke Not Removed Rome.-Inquiries made in German nilitary circles with regard to reports that Gen. Von Moltke had been remov ed as chief of the general staff of the ed as chief of the general staff of the German army, brings forth the state-ment that the report is incorrect. The report, it is declared, probably was caused by the change of officers made in the German quartermaster general's department, where Gen. Von Voight-Rhets was appointed to succeed Gen. Von Stein. Gen. Von Molike retains his neet.

Belgian Capital Moved To Ostend Washington -An official cablegram to the Belgian legation here announce removed from Antwerp to Ostend. E. Havenith the Belgian minister, in the act had no political significance and that no matter if all of Belgium fell into the hands of the Germans, Belgium would make no terms with the enemy before similar steps were taken by the allies.

When you want a fact to become known, the right way is to publish it. Mrs. Joe. Kallans, Perue, Ind., was troubled with belching, sour stomach and frequent headaches. She writes, "I feel it my duty to tell others what Chamberlain's Tablets have done for me. They have helped my digestion and regulated my bowels. Since using them I have been entirely well." For sale by all dealers. adv.

News Snapshots

Fears of raids by Zeppelin airships were expressed in England, and hundreds of aeroplanes were kept in readiness to repel an attack and to furnish news of immediate danger. Hundreds of wounded British soldiers were returned to England for treatment. The fighting along the river Oise continued, and many bridges were blown up to hinder the movements of the enemy. German artillery captured in France was taken to England to be exhibited as proof of the success of the allies. The converted converted converted as Shipping men protested at such action as causing expensive delays. Managers George Stallings and Connie Mack lined their teams up in Philadelphia to begin the battles for the world's baseball championship. M. Turpin's deadly turpinite shells were used by France.

FORTS GUARDING ANTWERP

Paris.-The following official comnunication was issued here: "There s nothing new to report, except that there has been a lively engagement in the region of Roye, where, in the last two days, we have captured sixteen nundred prisoners."

London.-Belgium once again is the center of military interest, for not only s her army battling for its life behind the fortresses at Antwerp, but the long battle line in France has struggled orthward until it has crossed he frontier at Armentieres and yet may oin the beleaguered Belgians. According to a German report re

ceived by wireless from Berlin, railway and telegraphic communication with Antwerp is interrupted. It was reported also that the king of the Bel gians had been slightly wounded.

been directing their attacks at points been directing their attacks at points of ingress to and egress from the city and at the same time dropping shells into the town itself. A portion of the town is reported to have been destroyed. The 42-centimeter guns made short work of the great Briaimont forts and lesser ones are now engaged in destroying the city, which under the provisions of The Hague conventhe provisions of The Hague conver

the provisions of the Hague conven-tion, was given due notice before the bombardment commenced.

The military fortunes of Gen. Von Kluck and his one-armed adversary, commanding the allies' cavalry, rapdly are being made or marred within sight of the North sea, which sets a limit to the outflanking movements, the accomplishment of which for so long has been the supreme goal of the

rival generals.

Russians Holding Their Own
Petrograd.—An unofficial communi ation issued from general headquar

"The fighting on the East Prussian frontier continued on October 7 with the same ferocity. In spite of German reinforcements all their attacks in the region of Wirballen (Russian Poland) and Philipoff have been repulsed with great losses. By a night assault the Russian troops have captured the village of Kamenka, near Bakalargewo. "In the forest of Massaistchigna, west of Ratchka, our troops in a night attack surrounded a German detachment which was partly exterminated, the others being dispersed, abandoning their rapid firers.

"Russian troops have also captured the town of Bials (in Gallcia; 43 miles west southwest of Cracow). In other regions there is nothing of importance to record.

"In the attack against the Przemsyl garrison conditions are in our favor, our troops capturing, by assault a strong fortification, constituting one of the principal positions."

The poorty built sile is an abomina-tion and a snare. Do not stint the la-bor required in building.

Now is the season to study the marshes, and the best way of tiling or surface-draining them.

British Airships Raid Germany London,-The following official statement was issued covering an attack by a British air squadron on

German airship shed at Dusseldorf.

"The secretary of the admiralty anounces that Squadron Commander Grey reports that, as authorized, he carried out with Lieut, R. L. G. Marix and Lieut. S. V. Sippe, a successful at tack on a Dusseldorf airship shed Lieutenant Marix's bombs, dropped from a height of 500 feet, hit the shed went through the roof and destroyed a Zeppelin.

"Flames were observed 500 feet high, the result of the igniting of the gas of an airship.
"All three officers are safe, but their

aeropianes have been lost.
"The feat would appear to be in every respect remarkable, having regard to the distance of over one hundred miles penetrated into country held by the enemy and to the fact that a pre-vious attack had put the enemy on their guard and enabled them to mount anti-aircraft guns.

May Force Turkey Into War
Washington.—The alternative the
Ottoman empire faces as to whether
the Dardanelles are to be swung open in answer to the demand of the triple entente or whether the key to the Black sea is to remain in Turkish pos-session promises to force the ports to join the European struggle, according to opinion expressed in diplomatic cir-cles here. At the Turkish embassy it was admitted that it might prove high-ly embarrassing to the sultan to be forced to commit himself on such a request. Officials stated that unless no other course was open it was highly unlikely that Turkey would submit to a change in its policy because of outside influence.

Russians Repuise Germans
Petrograd.—The general staff has
given out the following official com-

nunication.
"The Russian troops have continued to repulse the enemy from the bounda-ries of the governments of Suwalki and Lomza. The engagement has been very fierce west of Symno.

"The German troops that were attacking Ossowetz are retreating hastily to the north. Considerable forces of

ly to the north. Considerable forces of the enemy, of which the bulk arrived from the west, are concentrating in the districts west of the governments of Piotrkow and Kleice.

"The Russian cavalry and vanguard are reconnoitering energetically through all that reg."—Impeding through vigorous atta. "The movement of the enemy.

Advertising in Newspapers Finds Regular Customers for Agricultural Products.

"In looking through your Macon pa pers I have wondered why it was they didn't contain any farmers' ad-vertisements," recently remarked G. A. Yager of Thompsonville, Conn., business has carried him into nearly all the New England states, to a Macon, Mo., man on a recent visit to that city. "Up my way there are any number of farmers who run ad-

pays. In all the towns are eager buy-ers for all sorts of stock and farm products and they read these adverthey learn Joseph Brown has a hun-dred head of fat hogs, and makes a specialty of raising that class of stock. Also that he has a fine large poultry yard, and always has on hand a good supply of fowls. Another man has specialty of certain grain his advertisements.

"Of course this farm advertising "Of course this farm advertising yields good results only where the roads are good. Most New England highways are first-class. Buyers won't go out from the cities when the roads are bad unless they are awfully hard up for stuff. But they will go in swarms when they can get about eas ily, and then is when the live farme finds it pays to advertise.

"If farmers would advertise out here they could get the same results, but they have to look well after their roads first. The farm advertiser not only gets business from the towns, but his neighbors as well. The trom his neighbors as well. They see he has a big stock of something they may be short on and they hunt up and make a deal.

make a deal.

"The day of the business farmer is close at hand. Good farmers have private offices in their homes or farms, equipped with roll top desks, typewriters and printed stationery. Many of them have given their estate som of them have given their estate some attractive name, which looks well on a letter head and helps to get business. Then the modern man keeps a complete set of books, setting down his income and expenditures, and when the end of the year comes he will know to the cent what each crop has netted him, and which crops have, been a loss.

"The Russian cavalry and vanguard are reconnoitering energetically through all that reg" impeding through vigorous atta. The movement of the enemy.

"An strack by the Russian cavalry against the German vanguard in front of Andrew, and marching on Kielee, was crowned with great success. The German infantry was caught unawares and is retreating in disorder, pursued by the Russian cavalry.

A crenfield is a gord place for late hatched chicks; good for the chicks and the corn, too.

Creamery butter is usually good when carefully made, but none can excel good farm products.

Statistics Show How Product Is Utilized.

Annual Consumption of Wood by Wood Manufacturing Industries in the United States is Very Large -100 Different Kinds

Washington.—Statistics have been Washington.—Statistics have been compiled by the forest service, which show for the first time precisely how the lumber produced in the country is utilized. About forty-five billion feet of lumber of all kinds is the annual production in the United States; of this nearly twenty-five billion feet, board measure, are further manufactured, the other portion remaining for rough construction lumber and for similar purposes. This is exclusive of similar purposes. This is exclusive of material which reaches its final use in the form of fuel, railroad ties, posts, pulpwood, cooperage, wood distillates, and the barks and extracts demanded

and the barks and extracts demanded by the tanning industry.
The work of collecting and compiling the figures extended over a considerable period and was carried out state by state; but as one full year was made the basis of statistics in each state the total is a fair average of the use of lumber in further manufacture in the whole country. Between 50 and 60 per cent of the lumber produced is subject to further manufacture. In preparing the figures in this way, however, it should be remembered that considerable material reaches shops and factories in the form of logs, bolts, and billets with form of logs, bolts, and billets with out having passed through sawmills, and while this material is included in these statistics this fact should be remembered in comparing statistics with those of lumber production.

Nearly or quite 100 different wo are used in this country under th are used in this country under their own names, while an unknown number find their way to shops and factories without being identified or separately listed, except under general names. In quantity the softwoods, the needle-leaf or conferous trees, are most important, but there is a greater number of species among the hardwoods, or broadleaf trees. Yellow pine comes first with more than eight billion feet followed by white pine with three billion, and Douglas fir with a little billion, and Douglas fir with a little more than two billion. It should be un-derstood, however, that the term "yellow pine" includes several species the three most important of which are longlear, shortlear and loblolly. Oak, including all species, has nearly two billion feet, and is the most important hardwood. Maple comes next.

Dogwood comes about halfway down the list with more than seven million board feet and of these species mentioned Turkish boxwood comes last, with less than thirty thousand feet, followed by many others too insignificant to list but making a total of all kinds of more than a million feet. Of

any number of farmers who run advertisements regularly in both the is situated, nor to the country as a
