EUREKA Spring Water FROM EUREKA SPRING, Graham, N. C.

A valuable mineral spring has been discovered by W. H. Ausley on his place in Graham. It was noticed that it brought health to the users of the water, and upon being analyzed it was found to be a water strong in mineral properties and good for stomach and blood troubles. Physicians who have seen the analysis and what it does, recommend its use.

Analysis and testimonials will be furnished upon request. Why buy expensive mineral waters from a distance, when there is a good water recommended by physicians right at home? For further information and/or the water, if you desire it apply to the undersigned.

W. H. AUSLEY.

When Mr. Wilson dictates the peace terms, do you realize that he will have more power than any man in this world has ever had? And do you realize why? Because the world is willing.

Prof. Hyman Powell's story of the conditions accompanying the distribution of prisoners among the German army makes us understand rather better the sympathy between Berlin and Constantinople.

To Cure a Cold in One Day. Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 50 cents. adv.

There's No Mail Order House That Can Beat Your Prices. Let Folks Know It

Some Good Things For the Christmas Stocking

Too often the days immediately before Christmas are spent in worrying over the buying of gifts which the giver can but ill afford and which are going to people whom she cares little about. These are what we

call "duty" presents and of all gifts they give the least pleasure to the giver. So try to put yourself in your gifts this year. Begin early and knit the chubbly play suit. Nothing is so soft, so warm and so comfortable for roly-poly children outdoors in early winter weather.

For big brother get ribbon two and one-half inches wide, eight inches long; fringe both ends, then embroider initial in center or have gold letters put on. The band can be glued inside of his hat to identify it.

Father will need a new desk calendar and file for his office. So cover a

form with leather, cretonne or any durable material and hang it by silk cords. Crimson is a suitable color scheme. Apply an easily read calendar near the top center and with celluloid tabs index the lower part so daddy may fill his advance engagements in proper style.

For daddy and brother a child can enamel gayly the handles of garden and carpenter's tools. This adds an attractive touch to cold steel. For the children an "ever-green pie" served at the Christmas breakfast table always causes great excitement. To make it fashion an immense plish of cardboard, paint it leaf green and cover thickly with sprays of ever-green. Put in the presents—all previously wrapped and labeled—and then put on the lid. The latter is shaped in cardboard and covered with nice ever-greens.

The wee baby makes a new appeal to our gift instincts. Cover a downy square pillow with palest pink silk and

like the one pictured, cover this with fillet lace and handkerchief linen in strips that are strapped with satin baby ribbon set off with two soft rosettes. A delightful carriage pillow is this.

Relief in Six Hours
Distressing Kidney and Bladder Disease relieved in six hours by the "NEW GREAT SOUTH AMERICAN KIDNEY CURE." It is a great surprise on account of its exceeding promptness in relieving pain in bladder, kidneys and back in male or female. Relieves retention of water almost immediately. If you want quick relief and cure this is the remedy. Sold by Graham Drug Co. adv.

GOOD ROADS

SYSTEM OF NATIONAL ROADS
President of National Highway Association Would Have Federal Government Take Charge.

Thanks to the pushful, pervasive automobile, American road building has "got it move on" at last. There is everywhere the cry for roads, for more roads and for better roads. The drawback has been that, as yet, there has been no co-ordination of these multitudinous enterprises. The president of the National Highway Association, Charles Henry Davis, G. E. in a recent paper, stated that we spent last year \$249,855,967, or more than two-thirds the total of money expended so

Good Road in England.

far on the construction of the Panama canal—for our road improvements throughout the country. Mr. Davis' contention is that good roads, roads that run for thousands of miles through state after state, are, properly, not the responsibility of the state, but of the nation. He would have the federal government build a system of national roads joining the West with the East, the North and South, connecting every part of the country, as is the case with the national highways of Europe, and, as history shows, such as was the essential equipment of every first-class power of the past. How would such an enormous construction be paid for and kept up? "Suppose," asks this eminent engineer, "the government built 100,000 miles of proposed roads, and at the same time purchased, say, 800 feet of land on either side. This land would so continually increase in value, and in demand for leasing on long rental, that the cost of the road and the land purchase would soon be paid. A rental rate of \$4.00 per acre would pay the cost of the road, and the cost of the land. But much would rent at vastly higher rates, in cities and towns, high enough to give the nation an income equal to its total annual expenditures"—from these national highways alone!

SYSTEM OF NATIONAL ROADS

We Will Soon See Necessity for Separate Systems for Freight and Passenger Traffic.

President Rowe of the American Automobile association says that in ten years the United States will be covered with systems of national roads. By that time he says we will begin to see the necessity for separate systems for freight and passenger traffic. Present highways will be greatly multiplied and largely increased in width. The quality will be improved as the country begins to learn the art of road building. Good roads he believes, are the greatest practical step toward national preparedness.

BUILDING ROADS IN FORESTS

In Past Fiscal Year There Were Constructed 227 Miles of New Highways—Other Improvements.

During the past fiscal year there were constructed on the national forests 227 miles of new road, 1,975 miles of trails, 2,124 miles of telephone line, 80 miles of fire lines, 81 lookout structures, 40 bridges, 222 miles of fence, 545 dwellings, barns and other structures, 17 corrals and 202 water improvements.

IMPROVE ROAD BY DRAGGING

Ordinarily it is Best to Use Implement When Surface is "Moist, but Not Sticky."

It is probable that you can improve the road by dragging it the moment the drag is purchased or constructed, no matter what is the condition of the earth. Ordinarily, however, it is best to drag when the surface is "moist, but not sticky."

Read Progress.

Missouri and Kansas have both passed new road laws during the recent sessions of their legislatures, and work under them is already starting. Missouri has made longer steps forward toward good roads than ever in her history.

More Receipts for Roads.

The receipts of the Pennsylvania highway department from motorist licenses were \$1,742,242 April 1, an increase of \$700,000 over last year. The entire fund is available now.

CERTAIN CURE FOR COUGHS.

Mrs. Rose Middleton of Greenville, Ill., has had experience in the treatment of this disease. It says, "when my children were small my son had cough frequently. Chamberlain's Cough Remedy always broke up these attacks immediately, and I was never without it in the house. I have taken it myself for coughs and colds with good results."

EXCELLENT WAR CROP

Poultry Offers One of Best Ways of Increasing Food.

Fowls Feed More Economically Than Any Other Farm Animal When Carefully Handled—Little Capital is Required.

Poultry has been called the crop that never fails. It offers one of the best ways of increasing food production on short notes. Poultry uses feed more economically probably than any other class of farm animal when it is carefully handled. It will produce a pound of meat or eggs on four pounds of grain while protein concentrates are fed. Pullets will begin laying in from 6 to 8 months. Cockerels are ready for market at the age of 12 to 16 weeks.

There is good money in poultry and eggs if the stock is properly managed. Very little capital is required and expensive stock and equipment are unnecessary. Careful management and feeding are more important than expensive equipment.

Laying hens should be allowed to moult naturally. The common idea that if hens are compelled to moult early they will quickly feather out and commence laying early in the fall is erroneous. An early moult is not a sign of early fall production. Usually the late-mouling hen is the heavier pro-

Trap Nest Tells Profits.

ducer. In fact a lack of feather growth is one of the points to consider when selecting hens for winter laying. Very often show birds are forced into summer moult by a restriction of feed. This is done so that the birds may be in full feather once more for the early show season. This should never be practiced with utility stock. It will cause production to stop and weaken the hens at a time of the year when full strength is needed. It is unwise to change the general character of the feed. The addition of some oil-carrying ingredient, however, such as sunflower seed, will aid in the development of new feathers.

ATTENTION TO THE WOOD LOT

Burning Over Destroys Leaves and Humus-Forming Material—Cut Out Undesirable Trees.

Don't let anyone persuade you to burn over the wood lot. By doing so you destroy the leaves and humus-forming material which nature intended the trees to have.

Cut out only the undesirable and pest-infested trees. Keep the chestnuts, hickories, oaks and white pines, and remove all crooked and defective trees.

Where several trees stand closely together, or where there are shoots from an old stump, remove all but one or two of the best.

Be very careful not to injure the desirable trees when removing those wanted for fuel.

Study your wood lot, its trees and their characteristics and be guided by the knowledge and experience acquired.

MAKE ALL HOUSES RATPROOF

Farmers Should Take Necessary Precautions to Save All Food Produced This Year.

E. W. Lehmann of the University of Missouri College of Agriculture suggests that since farmers are doing their utmost to produce maximum crops they should also take necessary precautions to save the food produced. One method of conservation is to eliminate the loss caused by rats and mice. Concrete may be used to keep them out of the basement. Concrete floors may be built for new corn cribs and granaries and small mesh wire netting can be placed in the walls. Old cribs and granaries, chicken coops and poultry houses should also be made ratproof.

MAKE BUTTER OF WINDFALLS

No Better Way of Utilizing Sound Portions of Bruised and Wormy Apples in Fall.

There is no better way to use good apples and the sound portions of wind-fall, wormy and bruised apples than to make apple butter of them. While almost all varieties of apples will make good apple butter, those with distinct flavor and good cooking quality are most satisfactory.

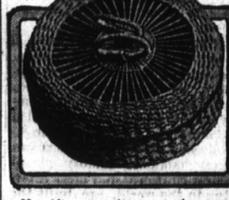

Neckwear for Christmas

No more acceptable present can be found for any woman young or old than the collar and cuffs sets of organdie which add so much to the tailored suit or the one-piece frock. For the younger women these sets are shown in pale tints or in white with ruffles in light colors. In all-white they are suitable to any age.

The set pictured is a favorite for stock, wear or with tailored suits. It is of white organdie having little ruffles in light tan color. Handsome sets are also made of white and cream or ivory satin but nothing is more durable or dainty than organdie.

Work Basket of Paper Rope

No gifts are quite so much appreciated as those which show the painstaking work of the giver. The pretty work basket, pictured above, is such a token of warm friendship as every woman might wish to give to someone near and dear to her.

It is made of paper rope in gray and lined with rose-colored silk. It is an achievement to be proud of and a gift to cherish. Little pockets, set about the lining of the basket at the sides will carry all the tools for sewing. They are made of the rose-colored silk.

Remember the Baby

Even the baby is to have a patriotic bent given to his affections, by means of toys this year. Uncle Sam appears among the clever, home-made Christmas dolls, that reveal a rubber ball somewhere in their anatomy. They have limp bodies, stuffed with a little cotton and are dressed in cotton fabrics, as cotton flannel, elderdown or percale.

In the Uncle Sam doll the ball is used for the head—but in the other one it makes the body. This doll is dressed in blue elderdown and has a row of the tiniest pearl buttons down its rotund tummy. When the ball is punched the doll squeals—much to the surprise and delight of his babyship.

Christmas Aprons

It would not seem like Christmas if no dainty and ornamental aprons appeared among the gifts displayed for women. They belong to the festival, like Christmas trees and candles, and Christmas time usually provides a supply for the coming year.

Two new and attractive Christmas aprons pictured here, show them to be as gay and frivolously inclined as ever. They are of fine batiste with inserts and edgings of lace. Either ribbon or batiste may be used for the ties but in this instance they are of batiste.

You Can Cure That Backache.

Pain along the back, dizziness, headache and general languor, get a package of Mother Gray's Australian Balm, the pleasant root and herb cure for rheumatism, bladder and urinary troubles. When you feel all run down, tired, weak and without energy use this remarkable combination of nature's herbs and roots. As a regulator it has no equal. Sold by Druggists or sent by mail for 50 cents. Send for free literature. The Mother Gray Co., Le Roy, N. Y.

If trousers could be abolished the hip-pocket menace would disappear.

Solutions of The Christmas Gift Problem

If Christmas giving were regulated by common sense and affection there would not be so many persons in the shops these days sighing to themselves, "Ten more presents and only \$51 How will I do it?"

Begin with the baby. Crochet in single open stitch a circle of bright wool, cord, silk or coarse thread, just big enough to cover a rubber bouncing ball. Run a drawingstring through the edges, tie the circle to fit well over the

ball and then attach a long, bright string.

Or make him this adorable jacket and cap of white cashmere, the other variations being creamy silk and white linen. On the folded back front em-broider tiny forget-me-nots to match those down the front of the jacket. Hemstitch the cap strings and scallop all other edges.

For mother make several skirt hangers. Purchase a five-cent skirt hanger, next a five-cent pan of gold water-color paint. Carefully glid the two wooden ends of the hanger. Then wrap the wire portion of the hanger with narrow pale blue ribbon. This will cost five cents a yard, and two yards will be necessary and provide for bows.

Grandma will like a knitting bag crocheted in fine macrame cord, which

Heart of the Giver in the Christmas Gift

THINK a little while before setting out on the line in which the tastes of your friend run. You will save yourself a vast deal of tramping through crowded shops. Sleeveless sweaters are all the go for girls. Lay in a supply of becoming

wool and, between knitting for the marines, make sister a beautiful slip-on, with a tasseled belt. The picture gives a good model.

Aprons, "like the poor, are always with us," and many women like nothing better. Attractive designs in check-dish aprons, with perky little pockets, can be quickly and successfully made by even the girl who is not especially clever with her needles.

If you are clever handling tools you can make an elegant hand carved tobacco for cigars or a couch-side reading

lamp as hubby's best Christmas gift. Use sweet gum wood and select a good design. Get a carpenter to put it together for you and give it a coat of stain or shellac for finish.

Little handmade handkerchiefs of colored linen are a novelty and very simple to make. Either a wide or a narrow hem is pretty, and it should be hemstitched. They should be twelve inches square. In light pink, pale yellow or gray the linen comes in a fine quality at about 85 cents a yard.

All sorts of cases are so convenient to keep tidy a top bureau drawer or to tuck in a week-end trunk. Raf-

is lined with cherry-colored silk so her knitting needles won't poke through. The fringe is a big addition, as the cut proves.

We have always known of hand embroidered and initialed kerchiefs as gifts for all male members of our social circles. But the idea of providing men with plenty of big, gay sports kerchiefs is new. You may buy by the yard fine linen in sports colors and hemstitch them yourself, or you may

buy two-tone kerchiefs and then make red, blue, yellow and green monograms in the corners, just like those in the pictures. Men love to flaunt these gay mementos.

Just copy his signature, transfer it to the corner of a handkerchief and embroider with the "over-and-over" stitch. This makes an individual gift which will please any man.

FOR A WEEK STOMACH.

As a general rule all you need to do is to adopt a diet suited to your age and occupation and to keep your bowels regular. When you find that you have eaten too much and when constipated, take one of Chamberlain's Tablets.

Colonel Roosevelt has an eye for the White House. He used to have two.
