General charges of improper administration were made by Mr. Kennard in a statement recently submitted to the committee by Senator New, and answered by Mr. Palmer, who presented an affidavit from Mr. Kennard repudiating his previous statement.

### VALUE OF SAVINGS **CANNOT LOSE MONEY BECOMES APPARENT**

of Great Lessons of War is That National and Individual Thrift, Now Rapidly Growing

Now that the new German ment has accepted the inevitable, and has officially signed the peace terms dictated by the allies and the countries associated with them, the great est and most disastrous war that ever securged the world is ended.

For nearly five years the world has been topsy-turvy. The things that were needed yesterday are no longer required, and the activities of the eat war establishments and muni tion plants are being diverted to the manufacture of implements of peace.

There must now be a readjustment. Governments that have thought in billions and spent money with a lavish hand, must retrench and think in mil lions and even smaller amounts, and must gain a new perspective.

Viewed in the retrospect the part played by America in the great world war is one of the most glorious chapgreat ships that carried the men across the ocean could not have been provided had not the common people

This war that is now happily ended has taught the people the value of saving. They went into the saving game as much through patriotism as anything else. But now that they are reaping the returns, and see that what they did with a patriotic motive is a Savings Stamps.

### **PAYING OFF THAT MORTGAGE**

Theodore Roosevelt said: "Thrift is merely the use of hard common sense in the spending of money." Paying off the mortgage on the installment plan by buying War Savings Stamps is one of the uses of this hard com-

mon sense. Not only does this plan offer a pracmoney, but small amounts may be earning interest as soon as they are set aside toward the collecting of the larger sum. This interest in turn materially helps to reduce the 6 per cent interest rate commonly charged

Government securities afford the afest and most practical investment in the world. A War Savings Stamp is a promisory note for \$6 if redeemed at maturity, or fer the original cost of the stamp plus accrued interest if redeemed before maturity.

It was only after America entered the great world conflict that the small wage earner in this country was af-forded the opportunity of investing in government securities; of becoming o-partners with the government. That there are today more than 30,000,000 holders of government securities is a fact which speaks for itself. When you buy a War Savings Stamp

you are helping the gevernment. To be able to make a lean to the govern-ment, even as small as the sum repre-sented by a War Savings Stamp, is a proof of patrictism and also a practi-cal manifestation of that spirit of na-tional thrift and individual savings which has come to us as a permanent heritage from the war.

### **WEALTH OF NATION GROWING RAPIDLY**

In Washington some of those experts, who are masters of figures and who have a mind attuned to statistics, frequently dig up queer things. One of this type has figured out that the total wealth of the United States is \$800,000,000,000.000. Then he figures out the new wealth produced annually, real peace is here, every cent that was to he new wealth produced annually, so invested will come back to those who aided their government, and it will come back with interest.

This war that is now happily ended that last year the national wealth increased \$18,000,000,000, which is come feater than the he admits is going faster than the normal Another Washington official points out that one of the best ways to conserve this national income in wealth is for individuals to buy War
