U. S. Department of Justice Urges Americans to Guard Against Bolshevism Menace.

CALLS RED PLANS CRIMINAL

Press, Church, Schools, Labor Union and Civic Bodies Called Upon to Teach True Purpose of Bolshevist Propaganda.

Washington.—Calling for the patri-etic support of all true Americans in its fight to protect their homes, re-Helon and property from the spread fing menace of Bolshevism, the United States Department of Justice has issued a warning against the insidious propaganda of the "Reds" during the new year. It reads:

"It would be extremely helpful to the cause of good government, the maintenance of law and order and the preservation of peace and happiness in our country if the people on this New Year's day would resolve to study, understand and appreciate the so-called 'Red' movement. They can counteract it most effectively by teaching its purpose through the press, the church, the schools, patriotic organizations and labor unions, all of which are within labor unions, all of which are within the range of its insidious attacks.

"Red" Theories Criminal. "The 'Red' movement does not mean an attitude of protest against allegean attitude of process against anlegated defects in our present political and economic organization of society. It does not represent the radicalism of progress, it represents a specific doc-trine—namely, the introduction of dictatorships the world over by force and violence. It is not a movement of lib-erty-loving persons, but a distinctly criminal and disliconest movement. Lenine himself made the statement at the Third Soviet Conference, 'Among one hundred so-called Bolshevists there is one real Bolshevik, thirty-nine crin inals and sixty fools.' It advocates the destruction of all ownership in proper-ty, the destruction of all religion and belief in God. It is a movement organized against Democracy and in faforce. Boishevism, syndicalism, the Soviet Government, sabotage, etc., are only names for old theories of violence

Russian Labor Crushed, "Though their adherents in this country are advocating and fomenting strikes, Lenine and Trotzky forbid strikes, and trade unions are being broken up and completely subordinated to the will of the few demagogues in centrol in Russia. This Belshevist ex-periment on the living body of the Russian people has not proven in any ense of the word an experiment in sense of the word an experiment in Democracy. The Bolshevist leaders frankly repudiate democratic princi-ples as we understand them. It has been a gamble which meant for Rus-sia, and, indeed, for the whole of huenormous losses in lives as well as in material resources. The Bolshevists have run up a colossal bill which the Russian workmen and peasmats will have to pay.

"Reds" Menace America,
"Having lived at the expense of the Russian people for two years, these peculators in human lives and other people's earnings are trying to move to new fields to the east and to the west, hoping to take advantage of the economic distress and confusion of mind in which humanity finds itself after the terrific strain of five years

There are hundreds of thousands of churches and religious institutions, all of which they would abolish. In other words, 110,000,000 hards. tutions, all of which they would abol-ish. In other words, 110,000,000 hardworking and saving people who own property, love liberty and worship God are asked to abandon all the ideals of are assed to abandon an the locals of religion, liberty and government, which are the outcome of the struggles of their fathers and their own develop-ment, and to place themselves, their homes, their family and their religious faith in the keeping and their property under the domination of a small group
