

GIVING THE FACTS.

University Students Know Conditions and are Urging Campaign for Adequate Facilities.

Cor. of The Gleaner.

Chapel Hill, N. C., Dec. 30.—Students of the University of North Carolina have started a campaign to tell the people of the State the conditions under which they are forced to live because of overcrowded dormitories and inadequate eating facilities. In the biggest and most serious mass-meeting of the year held several weeks back one thousand of them resolved that if living conditions, which were characterized by student speakers as being unfit for men, were to be bettered, it would be by the efforts of the students themselves.

They gave a thundering vote of unanimous approval to a program of what they called "Giving the people of North Carolina the facts," as outlined by their student Campus Cabinet and they prepared and voted again unanimously to send a message to the people of the State outlining their case.

"As part of the large company of your sons and daughters, who today crowd the North Carolina colleges, we wish to face facts with you," said this message. "The main fact is that the public schools are turning out graduates in far larger numbers than the colleges can take care of them in a decent way. Over 3,000 will graduate from the high schools next spring. Even now students eat in shifts in Chapel Hill boarding houses and are packed three and four to a room in the dormitories. Our congestion here is but representative of the congestion in all the North Carolina colleges.

"We present these facts to you with their simple story of present urgent need of room in which to eat, sleep, and study. We hope that the churches will build more buildings at the denominational colleges and the State will build more buildings at the State colleges.

"The main fact is not our present congestion, critical as that is in fact and significance, but the larger concern is to make room for the boys and girls who even now are treasuring in their hearts the hope of going to colleges in North Carolina. With belief in her greatness we trust that North Carolina will not close the door in their faces.

"We send this message of hope to the people of North Carolina with confident faith that the people, armed with the facts will rise up to meet a big problem in a big way."

The student body has not been so stirred in many years as it has become over its present overcrowded condition, the recent meeting, arising spontaneously from the students and backed by the leading men in college, took on the character of a crusade.

A committee has been organized composed of John Kerr, Jr., chairman, W. R. Berryhill, T. C. Taylor, W. H. Bobbitt, B. C. Brown, Boyd Harden, C. B. Holding and R. L. Thompson to direct the students' part in the fight to give the cause of higher education in North Carolina a chance. Similar student meetings have been held at A. & E., State College for Women, and the Eastern Carolina Teachers' Training School. The student bodies of all these schools are working together in this move. They feel that North Carolina, fourth from the top in the nation in agricultural wealth, should come to the aid of her sons and daughters, and give them a chance to train themselves properly for future leadership in the State, industrially, educationally, socially, and politically. The County Clubs are aiding the move. The Teachers' Assembly and the State Parent-Teacher Associations, in conjunction with numerous Rotary Clubs, Chambers of Commerce, Kiwanis Clubs, have all called upon the people of the State to realize the situation fully and come to the aid of its University and colleges. They all realize that if North Carolina is to maintain her fourth place, and even go beyond that, in the nation, then her boys and girls must be properly educated to a degree

worthy of their State's leadership.

Plenty of Fruit For Every Farm Family.

The Progressive Farmer.

A matter that should have attention on every Southern farm at this season is that of providing for plenty of delicious and wholesome fruits. Few things add more to the solid satisfaction of farm life, few things contribute more to physical health and well-being, and few really good things are more easily had if the matter be gone about in the right way.

During the next two or three months orchard trees should be set. First, we would suggest that our readers get in touch with their state horticulturists in regard to the best varieties for their particular sections and the nearest reliable nurseries. This done, write the nurseries for prices and place your orders without delay, for there is a scarcity of good trees, and late orders may not be filled.

Once the orchard is set, do not neglect it to the ravages of insects and diseases. The unsprayed orchard is soon ruined, but spraying, pruning, fertilizing and cultivation will pretty nearly insure a crop of good fruit.

Make your plans to have a first-class home orchard, and then get to work on the job. It will pay you.

FARM CONVENIENCES.

Free Bulletin, Illustrated with Pictures and Drawings of Labor Saving Devices.

West Raleigh, Jan. 3, 1921.—"Farm Conveniences" is the title of a sixty-four page bulletin just issued by the department of Agricultural Engineering at State College. The authors are: Profs. Deane G. Carter and R. E. Bosque.

The booklet considers in a brief way the subject of farm conveniences. No attempt is made to discuss the subjects thoroughly, but rather, it is hoped that this bulletin will be the means of answering a number of questions. The subjects considered are (1) farm mechanics, (2) home-built conveniences, (3) concrete on the farm, (4) farm buildings, (5) farm machinery and power, including tractors, and (6) farm home equipment.

The pamphlet is profusely illustrated with pictures and detailed drawings and specifications of various labor-saving devices. Considerable care has been exercised in the preparation of the latter in order to provide workable plans for those who wish to build the conveniences at home.

The bulletin is for free distribution and copies may be obtained by addressing E. B. Owen, Registrar, West Raleigh, N. C.

Catarrh Cannot Be Cured

with Local Applications, as they cannot reach the seat of the disease. Catarrh is a local disease, greatly influenced by constitutional conditions, and in order to cure it you must take an internal remedy. Hall's Catarrh Medicine is taken internally and acts thru the blood on the mucous surface of the system. Hall's Catarrh Medicine was prescribed by one of the best physicians in this country for years. It is composed of some of the best tonic known, combined with some of the best blood purifiers. The perfect combination of the ingredients in Hall's Catarrh Medicine is what produces such wonderful results in catarrhal conditions. Send for testimonials free.

DR. LAWRENCE FOR ROADS AND EDUCATION.

Elon Graded School will be Practice and Demonstration School—Basketball Practice Starts

Cor. of The Gleaner.

Elon College, Jan. 3.—For the first time in the history of Elon College a member of the Faculty becomes a member of the General Assembly. Dr. W. P. Lawrence, Head of the English Department, and College Dean, is to represent Alamance County in the lower house for this session. Dr. Lawrence was elected to this position because of his known interest in good roads and education, and this will be the policy he will advocate in the Assembly.

Prof. Hook will assist Dr. Lawrence by taking charge of the work of the Dean while he is away attending the Assembly.

Basketball practice started today although the college does not open until Wednesday. Candidates for the team have been arriving since Sunday and the outlook for a successful season is good.

Beginning with the opening of the college for the second semester the Elon College graded school and high school will be turned into a practice school and demonstration school and will be in charge of Dr. W. C. Wicker, head of the Department of Education in the college, and Prof. Humphries, Supt. of the graded school. The college students preparing for teachers will in this way receive practical training in the profession of teaching, and the school children will be benefited by the institution of supervised instruction.

The wind may be tempered to the short horn lamb but nothing at all is done for the sick—calf.

PEPTO-MANGAN WILL HELP FIGHT COLDS

Make Up Your Mind to Keep Free From Colds. Get Your Blood In Good Condition

START TAKING PEPTO-MANGAN

Now Is the Time to Build Up. You Will Be Strong This Winter.

Every house has a supply of fuel for winter. People know cold weather is coming. They get ready for it.

How many people get their own bodies ready for winter? Most of us go around all summer in the intense heat burning up energy, working hard all day and sometimes lying awake nights sleepless in the heat.

Winter comes along. It catches many people totally unprepared physically. Few of us take stock of our health. Whether we will be well, healthy and strong, we often leave too much to chance.

But not everybody. Nowadays people are learning. They know this matter of enjoying good health is a thing they can help control. If you live right, eat right, get plenty of sleep, breathe fresh air and keep your blood in good condition, you will be all right.

It is so simple. If you feel a little off in health—perhaps worn out and pale—don't take chances. There's no need of it. Buy some Pepto-Mangan of your druggist. Begin taking it today. You can get it in liquid or tablet form. Tell your druggist which you prefer. But to be certain that you get the genuine Pepto-Mangan, ask for it by the full name—"Gude's Pepto-Mangan." Look for the name "Gude's" on the package.—Advt.

MUCH DEPENDS ON RALEIGH MEET

COTTON AND TOBACCO GROWERS TO HOLD IMPORTANT MEETING JANUARY 12 AND 13 IN CAPITAL CITY.

Raleigh.—Secretary of Agriculture Meredith, former Governor Richard I. Manning of South Carolina, head of the cotton export corporation movement, and Aaron Sapiro of California, expert in co-operative marketing, are expected to address and confer with the cotton and tobacco growers of this State at their meetings to be held in Raleigh on January 12 and 13.

The North Carolina Tobacco Growers Association meets Wednesday, January 12, and the North Carolina division of the American Cotton Association on Thursday, the 13th. While these are separate and distinct organizations they have a great deal in common. Both are working toward the same end—that proper and the most efficient marketing facilities may be provided for the principal agricultural products of North Carolina.

In addition to the farmer delegates—and all cotton and tobacco growers of the State, regardless of affiliation with these organizations, are invited to attend the mass meetings—the banking and commercial interests are expected to be largely represented. What is done at the Raleigh meeting will doubtless have far-reaching effect upon the economic life of the State. Plans are to be laid for the future guidance of the hundreds of thousands of producers of the two chief products of North Carolina's soil.

The tobacco growers' meeting will begin at 10 o'clock Wednesday morning, January 12—both meetings to be held in the City Auditorium—with organization for business, the basis of representation being one delegate for every one hundred members in each county. Words of welcome and of greeting will be heard from the outgoing and the incoming governors, to be followed by a round table conference.

At the recent meeting held in Richmond certain recommendations were made looking to the organization in North Carolina of a tobacco growers' marketing association modeled somewhat along the lines of the California co-operative organizations, Aaron Sapiro, who is the attorney and the guiding hand of fourteen of the most successful of these, and who has been retained as attorney for the organization committee of the Interstate Tobacco Growers Association, will explain in detail the proposed plan of operation.

The meeting Thursday of the cotton growers will be, in point of fact, the annual convention of the North Carolina division of the American Cotton Association. It will open with a word of welcome from Governor Morrison. The recommendations of the Southern Cotton Conference, held in Memphis, December 7 and 8, having to do with such important matters as reduction of acreage, credits and advances, diversifications and warehousing and classification of cotton, will be considered.

The principal matter of business, however, will be the working out of plans to better facilitate the marketing of the staple. The co-operative plan will be considered in all its phases. Mr. Sapiro will address the cotton growers Thursday morning.

Cotton Export Corporation.

At the morning session on Thursday, the 13th, former Governor Richard I. Manning of South Carolina will address the convention, explaining the plan of operation of the so-called cotton export corporation movement, which is the outgrowth of the American Cotton Association, and tell of the progress that has been made. Governor Manning, himself a farmer, is president of the American Products Export & Import Corporation, which, organized in South Carolina in the fall, is already a going concern, with more than \$2,000,000 of its capital stock subscribed in that State alone. The export of cotton to reopen the markets of Europe to the South's staple has already begun, although the movement is still less than three months old. The first shipment was made from the port of Charleston just before Christmas.

The cotton export corporation movement will be extended into North Carolina, as throughout the cotton growing South, and, although not intended to conflict in any way with any strictly co-operative marketing program that may be adopted, will be launched. It is hoped, at the Raleigh meeting as among the activities of the American Cotton Association in this State. Already there is much interest felt throughout North Carolina, among farmers, bankers and business men, in the movement which has made such wonderful headway.

Secretary of Agriculture Meredith

has been invited to close the two-day meeting with an address on Thursday night. He is a forceful speaker and always has a message to deliver. The trio of speakers have been selected with especial consideration for the intimate knowledge they possess along lines bearing directly upon the problems the cotton and tobacco growers now face and in the hope that they may be able to give some practical advice and suggestions toward the solution of these problems, rather than by reason of their oratorical powers.

MASTER OF ART OF WOOING

Missourian Gives Out Some Points That May or May Not Be of Value to Others.

There are experts in all lines, but shall not a man who can persuade eight women to marry him rank as an authority on matrimony? According to the Missourian who is locked up in the Tombs as a confessed bigamist, the way to a woman's heart is through her higher emotions. "I appealed to the best in women always," he says, "and never to their lower natures."

Women also, this artist in love discovered, "like to be swept off their feet by those who woo them; they have no patience" with the dawdler. Nor did he find that it was essential for the wooer to be handsome or more than neatly dressed. But these, of course, are old precepts in the manual of courtship. Ugly men have often been great rakes, and ardor is traditionally effective in sweeping the reluctant fair "off their feet." His main contribution to the art of love, and it is one worthy of Ovid, is that of the potency of an appeal to the higher nature of women.

But is "the best" in women a fixed quality, or does it vary and require to be diagnosed in the individual? That is no doubt a difficulty that will confront ordinary wooers. Is the higher feminine nature compatible with matinee tickets and tea dances, or does it incline seriously only to more elevated interests? The recipe apparently leaves the problem about as it was for less successful suitors to whom the mystery remains of other men's easy mastery of an art of which they fail to learn the rudiments.—New York World.

CAUSES OF BROKEN ROMANCE

London Newspaper Points Out Two Reasons Why Love's Young Dream Is Rudely Shattered.

Engagement breaking is in season. "The marriage arranged between Captain X and Miss Y will not now take place." That cold print end to romance can be read any day now in the society columns of the papers. It is becoming a habit.

Experts who study these matters declare that the percentage of broken engagements has never been so high, and they set down several reasons, says the London Daily Express. The main one is:

The great khaki illusion. (a) The woman: "You would not believe how different he looked in his civilian suit, my dear. I simply couldn't do it." (b) The man: "She was awfully charming as a driver in the Women's legion, but when I saw her in one of the new evening gowns—well, it just couldn't happen."

The house famine is given as another cause. Two young people who believe themselves to be twin souls go out and try to find a future home. It is physically impossible for any person's temper to stand the strain of present-day house-hunting. They quarrel, and there is another broken romance.

Cleaning Rusted Tools.

Elbow grease is usually the best thing to use when cleaning rust from steel, but the following manner has also been suggested: Fasten the steel tightly to a piece of zinc by means of wire and place it in a jar containing water to which sulphuric acid has been added. Leave it there until the rust has disappeared. If the article is very rusty add a little more acid from time to time. The process by which the rust is removed is electrical. The steel being in contact with the zinc short-circuited battery cells are formed, and the rust is reduced to iron again by electro-chemical action. The process, but will regain its brightness if rubbed with sweet oil or a mixture of petrolatum and kerosene.

NEW YEAR RESOLUTIONS.

Resolved:
To end lots of useless spending.
To shut out the Profiteers.
To cut this unrest forever.
To look to the future years.
To unite our mightiest efforts
To bring Thrift to bring content.
To invest our money wisely.
To save—all be bent.
Now is the time to start if our success would crown intent.

WHAT SHAPE HAS MOTH HOLE?

On This by No Means Simple Question Hangs Result of an Omaha Lawsuit.

On whether a moth makes an oblong hole or a round hole when he sinks his molars into the more succulent portions of dad's last winter overcoat or sister's summer furs, hinges a law suit in Justice Collins' court, brought by an Omaha store against Miss Josephine Hill of Council Bluffs. The store seeks to enforce payment for an \$80 suit which Miss Hill is alleged to have purchased, says the World-Herald.

According to the girl's testimony, a week after she bought the suit she found a moth hole in it. She returned it to the store. The suit was mended and given back to her with instructions to wear it 30 days and bring it back at the end of that time if not satisfactory.

Miss Hill testified she wore the suit for 30 days, placing it carefully on a hanger in her closet each night. At the end of the specified period, examination, she said, revealed not one but a whole community of holes. She refused to pay for the suit, and the store took the case into court.

After one clerk for the store told the court the holes complained of couldn't be moth holes, because any self-respecting moth eats a round hole, while those under discussion were distinctly oblong, and after Miss Hill had made an exhibition of the holes and another clerk had suggested that Miss Hill might have worn the holes in the skirt by rubbing against her typewriter desk, Justice Collins looked wise and took the matter under advisement.

ENGAGED IN SPLENDID WORK

New York School Devoted to the Task of Making Cripples and Unfortunates Self-Supporting.

From his association with the late Rev. H. Boswell Bates, founder of the Neighborhood house, George A. Merritt learned how little was being done to make cripples self-supporting and how common, almost universal, was the belief that owing to various afflictions these unhappy ones must always be a burden on others. This was not his belief, and so strong did he hold his opposite conviction that, with the aid of a few charitable persons whom he inspired with it, he founded the Path school at 60 West Twenty-Fifth street, New York, in order to teach cripples commercial and railroad telegraphy and thus give to them that greatest boon, a means of livelihood. This school is still young, but it has already proved itself many times over. It trains legless, armless, and deformed persons, but especially the young who are thus afflicted, either in the course laid out by the school or in some other line most suitable to individual cases. It is free to all, non-sectarian, and it has already in its short life lifted nearly 50 poor creatures from a state of dependence, or even penury, to positions where by honest labor they earn from \$12 to \$18 per week and have the joy that comes from self-support.

MERELY HER 'INDIAN SUMMER'

Elderly Lady Rejects With Scorn the Idea That She is in the Autumn of Life.

She is a little old grandmother—exactly seventy-four years old. And quite a busy little creature she is, knitting stockings for this niece, a sweater for this grandson and tending lace for her newest great-grandchild. Her daughter with whom she lives, the other day remonstrated with her for working so hard. "You don't have to work so hard now, mother," she said. "You've worked all through your summer of life and now at autumn you surely should have a rest."

"I'm not having an actual autumn of rest and decay," the old woman indignantly protested. "My life is too beautiful and too fruitful to label it that way. It's an Indian summer. When I was younger I used to watch old people having autumns when they fretted everybody and were miserable themselves. It worried me because I knew that some day I would be old, and I didn't want to make any one, not even myself, miserable. And one autumn I enjoyed Indian summer so much that I decided to have an Indian summer in my life. And," half indignantly, "I don't intend to have you or any other person throwing frost on it to ruin it, either."—Indianapolis News.

Incredibly Silly Order.

Army orders regarding mustaches recall the fact that the Bank of England once issued an order forbidding clerks to wear mustaches during business hours! This remarkable order afforded the public so much amusement that it was soon canceled.
