

# DARLING BABY BRIGHTENS HOME

Children's Laughter a Pleasing Sound

Altoona, Pa.—"I am writing to tell you what Lydia E. Pinkham's Vegetable Compound has done for me. We had six children die almost at birth. From one hour to nineteen days is all they have lived. Before my next one was born I took a dozen bottles of your Vegetable Compound, and I can say that it is the greatest medicine on earth, for this baby is now four months old, and a healthier baby you would not want. I am sending you a picture of her. Everybody says 'That is a very healthy looking baby.' You have my consent to show these few lines to anybody."—Mrs. C. W. BENZ, 131 3rd Avenue, Altoona, Pa.

Mrs. Janssen's experience of interest to childless wives. Millston, Wis.—"I want to give you a word of praise for your wonderful medicine. We are fond of children, and for a considerable time after we were married I feared I would not have any. I began taking Lydia E. Pinkham's Vegetable Compound, and it strengthened me so I now have a nice, strong, healthy baby girl. I suffered very little at childbirth, and I give all the credit to your medicine, and shall always recommend it highly."—Mrs. H. H. JANSSEN, Millston, Wis.

Mrs. Held of Marinette, Wis., adds her testimonial for Lydia E. Pinkham's Vegetable Compound. She says:

Marinette, Wis.—"I was in a nervous condition and very irregular. My doctor advised an operation. My husband brought me one of your booklets and asked me to try Lydia E. Pinkham's Vegetable Compound. It overcame my weakness so that I now have a healthy baby girl after having been married nine years. I am glad to recommend your medicine, and you may use my letter as a testimonial."—Mrs. H. B. HELD, 330 Jefferson St., Marinette, Wis.

There are many, many such homes that were once childless, and are now blessed with healthy, happy children because Lydia E. Pinkham's Vegetable Compound has restored the mother to a strong and healthy condition, as it acts as a natural restorative for ailments as indicated by backache, irregularities, displacements, weakness and nervousness.

Women everywhere should remember that most of the commoner ailments of women are not the surgical ones—they are not caused by serious displacements or growths, although the symptoms may be the same, and that is why so many apparently serious ailments readily yield to Lydia E. Pinkham's Vegetable Compound, as it acts as a natural restorative. It can be taken with perfect safety and often prevents serious troubles.

Therefore if you know of any woman who is suffering and has been unable to secure relief and is regretfully looking forward to a childless old age, ask her to try Lydia E. Pinkham's Vegetable Compound, as it has brought health and happiness into so many homes once darkened by illness and despair.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent to you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

## Blood Is the Sap of Life;

Keep It Pure

You grow by good blood as a tree grows by sap. Rich blood, robust man. Good sap, sturdy tree. Keep the blood healthy and wholesome; poor, impoverished blood cannot nourish the body or remove the waste as nature intended.

When your blood is impure, itching, flaming skin eruptions often break out, and your body

gets run down and weak—easy prey for disease. To be safe, keep the circulation wholesome.

For this S.S.S., the famous vegetable blood remedy your druggist keeps, is excellent. Start enriching your blood with S.S.S. today, and write about your condition to Chief Medical Advisor, 838 Swift Laboratory, Atlanta, Ga.

## The Separate Skirt

A PRACTICAL, neat and very pretty separate skirt, as pictured here, for mid-summer wear, is typical of the majority of separate skirts, which are tailored affairs as useful as suits. It's representative of only this one class of skirts, however, for there are as many types of skirts as there are of hats and they are all made in unending variety.

Nothing is prettier for ordinary wear than skirts of striped or cross-bar materials in which a color or black relieves the plainness of all white. Light wool fabrics with hairline stripes or crossbars in black, like that in the skirt pictured, have found many admirers this summer. Others, with stripes in high colors alternating with

white, are box or side plaited so that the white predominates, and there are many patterns in black-and-white combinations.

Among the newest skirts for dressy wear there are heavy crepe weaves in silk with wide printed borders of floral patterns in many colors. The skirts are made up with this wide border about the hips or at the hem, and a sash of white crepe, lined with chiffon in a color, accompanies them. Skirts of georgette banded with flax satin bands in graduated widths, and skirts of taffeta silk with wide borders of duvetyne or other cloth at the bottom, are new and make opportunity for fine color combinations.

## Hand-Craft Beads and Trinkets

AMONG women there are those gifted with amazingly ingenious minds, and they are always exercising this gift on the most commonplace materials—turning them into things of beauty for themselves, their homes, and their friends. Within the last year or so some one of them discovered that colored sealing wax might be substituted for paints, and a little alcohol flame for a brush, and all sorts of pretty furnishings and trinkets made by such simple means. Faded bouquets of flowers, fashioned of wax and coated with the wax in different colors, bloom in vases, also painted in beautifully blended colors—wax providing the color and a flame providing the brush.

Very handsome beads and ornaments are made of the colored wax. Several colors are used together for making them. The wax is softened over a flame and molded round a knitting needle. Drops of melted wax in other colors worked into the beads give the most beautifully blended color effects. These beads are made in any shape and size desired and strung on small silk cord in the color prevailing in the beads. They can be made to match or harmonize with costumes

according to individual taste, and each strand may differ from every other strand. The necklace shown in the middle of the three pictured is made in this way, with lavender beads showing flecks of rose and gold strung on a lavender silk cord. Knots in the cord keep the beads from slipping, and the strand is finished with an ornament.

The necklaces at each side are made of colored paper and glass beads. Colored advertising pages cut from magazines provide the paper, which is cut into long, slender triangles. The length of the bead is governed by the width of the base of the triangle. Placing the base of the triangle on a knitting needle, the paper is wound tightly and evenly around the needle, the pointed end fastened down with a bit of mullage. The bead is then dipped in clear shellac, strung on a string, and allowed to dry. When a sufficient number of beads have been made they are strung with very small glass beads.

## The SANDMAN STORY

### THE SAUCY CLOUDS.

ONE night as Mr. Moon-man looked over the tops of the trees and mountains he saw a number of fleecy little clouds scudding about.

"O dear!" sighed Mr. Moon-man. "I am afraid I shall have trouble tonight with those saucy little clouds. I was hoping as I came up that they would be in another part of the sky instead of right in the place where I want to shine."

Mr. Moon-man was right; he was to have trouble with the saucy, fleecy little clouds, and just as his bright face peeped over the treetops all the little fleecy clouds scudded right into his face.

Mr. Moon-man ducked and dodged until at last he found a space between

the saucy little clouds to shine upon the earth below, but no sooner had he done so than the little clouds danced

### CATS CONFINED TO "RANGE"

Chicago Man Reports Success in Novel Plan for Keeping Pets From Straying Far Afield.

Another western idea was adapted to city uses the other day when a south-sider, who once rode the range on the Colorado plateaus, staked out his cats to keep them at home. The plan worked fine and now the feline animals get the air every day at the ends of tether ropes.

The cat owner found that every time he opened the cellar door the pets made a break for the open, frequently staying away for days and returning with blackened eyes and scratched hides. He thought of the tether plan, but the first trial was not a success, as the cats slipped the nooses from their necks. He then evolved a semi-hobble plan and tied the heavy string to one of the cat's hind legs, attaching the other end of the string to a stake driven in the back yard.

This system proved effective and now every day three of the cats take their exercise around their tether stakes.—Chicago Journal.

## How It Started

THE WORD "RUBBER."

THE material which we now know as "rubber" was formerly called elastic gum. One of the earliest uses of this gum had been to erase marks on paper, and the chemist, Priestly, in about 1770, suggested that the material
