to the principal canal and main water thoroughfare of Venice. It is nearly two miles in length, is in shape like the letter "S," and divides the city into two nearly equal parts. The "Canalazza," as it is called in Italian, is spanned by the Rialto, and is lined with palaces which, although appearing stained and battered in the daytime, loom up grandly in the moon light.

The Adventure of Work.

We are in grave danger in these days of dividing life into two utterly unrelated portions, and the true function of play as something that is essentially creative and life-renewing in the fullest sense is being forgotten. The best work must ever have in it the spirit of play; that is, the spirit of adventure. Great work, as another writer has said, is play itself .-- Cape Argus.
