COAT STYLES FOR MIDWINTER; FORECAST OF SPRING STYLES

LADY FASHION has thown some very decided preferences in the selling are presented in sports and matter of coat styles for midwinter and these are the points that are instructions to designers of spring garmatter of coat styles for midwinter and these are the points that are interesting to designers of spring garments. One o' these much emphasized features is the liking for fur accessories, especially the fur collar, and for fur introduced in trimming touches. There is no doubt of the survival of the fur collar in spring styles, and even for summer there is every reason to believe that "summer furs" will play a conspicuous part in coat styles.

DERHAPS you didn't know that ferti-lizer should be "cured" or "aged" in order that the food for soil can be more readily available when that food is needed

This is one of the details of the fertilizer industry that few people know, but it's mighty important. Such "details" as this represent the difference between Royster's Fertilizer and less carefully pre-pared foods—and the difference between profitable crops and crops that are not so profitable.

To keep vast quantities of fertilizer for months represents an enormous supply and a tremendous capital. Therefore, only a large company like Royster's can offer this re effective "cured" fertilizer.

Rid yourself of the idea that all fertilizer is alike. This is no more true than that all land is alike.

The truth of this can be proven not alone by the enthusiastic praise of successful farmers who have used Royster's, but by your own experience.

Use Royster's this year. Give it a fair test-and don't guess about fertilizer any

Grow better and larger crops by using fertilizer that has been "cured"—that is free from lumps—that has been proven chemically correct by forty chemists—and that has established a record for good works over a long period of years. Look for the name "ROYSTER" on the bags.
