Pro Bono Publico.

Graham and the community adjacent are enjoying and reaping the benefits of five days and nights high-grade entertainment this week—ten entertainments in all, music, lectures, readings, recitations, interpretations, drama, besides four mornings devoted to Junior Chautauqua for the pleasure of the little folks.

Here we have brought literally to our very doors some of the best talent in the several classes without the expense and fatigue of going miles and miles for something of inferior quality. Were it not for the cooperation of the town and community, very few would have the opportunity of a whole week's wholesome and elevating entertainment such as is presented by Chautauqua, and certainly not in any event at the negligible expense for which it is available under the cooperation plan. To hear some of the lectures and other performances would entail an outlay for a single evening equivalent to the cost of the entire week's program. Single the numbers on the program would cost several times more than a season ticket which reduces the cost to about 30 cents for each performance.

For a number of years a mere handful, a very small per cent, of the people of this community have been willing to stand behind the chautauqua proposition and guarantee the expense of it, in order to reap the benefits and put them within the reach of themselves and their neighbors. For some of the guarantors the price of a season ticket alone is a heavy tax, not counting the possibility of having to pay more in the event of a deficiency through the failure to sell a sufficient number of tickets to cover the guarantee.

It is not manifesting the proper interest in the community benefit to permit or expect a few to bear this burden. The benefits are reaped by everyone in the community either directly or indirectly.

In this community at least 100 people should stand behind the guarantee, then in the event of a shortage for any cause the share of each guarantor would be small and not a burden to anyone. Suppose the sale of tickets fell short, say \$200, each guarantor would have to pay only \$2.00. But suppose 20 had to pay it, then each one would be taxed \$10.00 to make it up. When the latter happens in a community like ours, there are some who are not doing their just and proper share toward the community uplift.

No one in the community should be selfish enough to want to enjoy the benefits of a high-grade chautauqua for the price of a single ticket while his many times less able neighbor by reason of his public spiritedness and desire to be helpful to the community is paying 4 or 5 times as much for the same privilege.
