Changes Follow CO-op Victory

TOBACCO ASSOCIATION WINS

Accept Resignation of Patterson After Federal Court Finds Association Solvent.

The Tobacco Growers Cooperative Association made material changes in its management last Saturday when the Board of Directors accepted the resignation of Richard R Patterson, former General Manager. and appointed in his place a committee of three directors from North Carolina, Virginia and South Carolinia, including President, Geo. A. Norwood, of Goldsboro, N. C., Vice-President Bright Williamson, of Darlington, S. C., and director E. G. Bagley, of Kenbridge, Va.

This important action followed immediately upon the legal victory which resulted from a five day battle in the Federal Court at Raleigh last week, when United States Judge Isaac M. Meekins, declined to grant a receiver for the associa-"The Tobacco Growers Co operative Association can now go ahead and make progress", Aaron Sapiro and Colonel W. T. Joyner, its attorneys, told the directors at their meeting on April 3rd. They declared that they would not want a single word changed in the decision handed down by United States Judge Meekins.

Association Solvent.

The counsel for the association whose brillant defence of its operations proved to the satisfaction of the Superior Court, at his office the court that the association was in Graham, North Carolina, on not insolvent and toat there were the 23rd day of April, 1926, and not fraud or current evils in the answer or demur to the comassociation which would warrant a plaint in said action, or the receivership, stated "This series of receivership actions against the association has been paralyzed by the retention of the case in the jurisdiction of this Federal Court. We are satisfied to have it suggested that we be confined to our usual business. As the decree now stands it has everything in it that we need to protect ourselves and there are no parmful strings tied to the dicision. The association is absolutely at liberty to handle its own affairs, in its own way, under its own leaders." Patterson Goes.

The resignation of Richard R. Patterson, for four years leaf manager and recently General Manager of the association, was accepted by the directors to become immediately effective. There has been some suggestions of retaining Mr. Patterson's services as manager of the of Alamance County, North

a resolution unanimously adopted: "That the president appoint a committee of three to include himself, one director from Virginia, one from South Carolina to perform all duties of general management, direct and in said complaint. carry on the activities of the association until further order by this board. Among other things the said committee shall make recommendations for a new general manager shall, make any other changes which it may deem advisable among other employees, and shall generally carry on work of this association, subject to the instructions of the

Some further economies and changes in the employees of the association are looked for directly as the result of this important action of the board in changing its formal management.

Up To The Farmers.

That contract which contains very important changes and new safe guards of the growers rights is now being presented to the old belt to-bacce farmers by the cremital to the complaint in said action, or the plaintiff will apply to the Court for the relief demanded in said provided by law complaint. bacco farmers by the organization committee of the proposed Old Bright Belt Tobacce Growers Co. 1926. perative Association.

In its pages are the following

lauses which represent the wish of Plant Corn When Dogwood Blooms. he tobacco farmers after four years experence of cooperative marketing:

will provide:

a. For an invitation and request for an annual investigation of Association affairs and books by one or more public officials of North Carolina and Virginia.

b. That annually there shall be published the individual salaries of the average salary of minor emhere shall be published to any member upon request the individual salary of this Association,

c. That no director except the President shall be an employee of the Association.

That new Directors shall take office annually prior to the making of annual contracts with employees.

e. That no director or officer of the Association shall engage in redrying tobacco for the Association or shall have a financial interest in any business which makes a profit through handling in any way the tobacco of this Association through selling to this Association or buying for or from the Association and physical supplies.'

Tarheel farmers are fast learnng the profits to be secured from feeding pigs according to methods advocated by the swine extension office at State College. More demonstrations than ever are being placed this winter.

Black-Draught Brings Relief for Tight, Bloated Feeling.

for Tight, Bloated Feeling.

"I had indigestion," says Mr. W.
B. Bouknight, of Ballentine, S. C.
"Working out, I got in the habit of eating fast, for which I soon paid by having a tight, bloated feeling after meals. This made me very uncomfortable.

"I would feel shupid and drowsy, didn't feel like working. I was told it was indigestion. Some one recommended Black-Draught and I took it after meals. I soon could eat anything any time,

"Tuse it for colds and biliousness and it will knock out a cold and carry away the bile better and quicker than any liver medicine I have ever found."

Eating too fast, too much, or faulty chewing of your food, often causes discomfort after meals. A pinch of Black-Draught, washed down with a swallow of water, will help to bring prompt relief.

Black-Draught gently helps the over-taxed organs to perform their regular functions, in such cases, ridding the system of poisons that might accumulate.

ROBERT C. LAWRENCE,

Good Plan To Test Cotton Seed.

While the past fall was favorable for the harvesting of cotton free from weather damage, it still is a good precaution to test the cotton seed for germination. Most of high in germination, but to assure mended.

"It is always a good precaution to test our cotton seed before planting." says Dr. R. Y. Winters, Director of the North Carolina Experiment Station. "Under boll weevil conditions it is necessary to get a good stand early and sometimes seed become damaged in storage. This is true especial.

ly if the seed are stored in large quantities or kept in a damp reom

To test the seed, Dr. Winters advises taking a small sample from the bottom or the pile, one from the middle and a few from the sides, mix them thoroughly, and send a double haudful to the Seed Laboratory at the State Department of Agriculture in Raleigh. Make a request that they test the seed for germination, Dr. Winters cautions the grower to give his correct name and address on the package so that a reply may be sent without delay. Such a test will save trouble and expense.

The Tarheel says a man cannot be useful without making ene-
