**Quart of Water Cleans Kidneys**

Take a Little Salt if Your Back Hurts, or Bladder is Troubling You

No man or woman can make a mistake by flushing the kidneys occasionally, says a well-known authority. Eating too much rich food creates acids, which excite the kidneys. They become overworked from the strain, get sluggish and fail to filter the waste and poisons from the blood. Then we get sick. Rheumatism, headaches, liver trouble, nervousness, dizziness, sleeplessness and urinary disorders often come from sluggish kidneys.

The moment you feel a dull ache in the kidneys, or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, begin drinking a quart of water each day, also get about four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast and in a few days your kidneys may act fine.

This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to flush and stimulate the kidneys; also to help neutralize the acids in the system, so they no longer cause irritation, thus often relieving bladder weakness.

Jad Salts is inexpensive; makes a delightful effervescent lithia-water drink which everyone should take now and then to help keep the kidneys clean and active and the blood pure, thereby often avoiding serious kidney complications.

**Nut Bread.**—Take one cupful of milk, one-half cupful of sugar, one egg, three-fourths of a cupful of walnuts, two and one-half cupful of flour, three spoonfuls of baking powder and one-fourth spoonful of salt. Mix as usual and bake in a one-loaf bread pan forty-five minutes.

**Coffee Cake.**—Take five cupfuls of light bread sponge, three eggs, one cupful of raisins, one-half cupful of sugar, one spoonful of cinnamon, three-fourths cupful of shortening. Warm the shortening, add the beaten eggs, stir into the sponge, add flour until too stiff to stir. Set to rise until light. Mix sugar and cinnamon and spread the top of the cake with butter before sprinkling with the cinnamon and sugar. Bake twenty minutes or more in a hot oven.

**Almond Omelet.**—Take half a cupful of blanched and halved almonds, place in an omelet pan with butter, stir until well coated with the butter, using a tablespoonful, then pour in an omelet mixture using four eggs. Cook as usual, fold and roll onto a hot platter and pour over a hot maple sauce. Serve at once. The nuts will be nicely browned if they are quickly coated with butter, before the omelet is poured.

**Taxis Travel on Water**  
"Water taxis" are to be used in Amsterdam for service in the canals which wind about the city. The taxis will accommodate two to four persons and are really small motorboats with cabins, the taximeter being attached to the shaft of the propeller. The taxis were decided upon to meet the increased growth of the city on both sides of the River IJ, as well as the other waterways of the city and nearby districts.

**Loosen Up That Cold With Musterole**  
Have Musterole handy when a cold starts. It has all the advantages of grandmother's mustard plaster without the burn. You feel a warm tingle as the heating ointment penetrates the pores, then a soothing, cooling sensation and quick relief.

Made of pure oil of mustard and other simple ingredients, Musterole is recommended by many nurses and doctors. Try Musterole for bronchitis, sore throat, stiff neck, pleurisy, rheumatism, lumbago, cramp, asthma, neuralgia, congestion, pains and aches of the back or joints, sore muscles, sprains, bruises, chilblains, frosted feet, colds of the chest. It may prevent pneumonia and "flu."

**FOOD FOR THE FAMILY**  
Good bread is one of the first essentials in planning a menu. The following will be kinds one will like to serve occasionally:  
**Oatmeal Bread.**—Pour two cupfuls of scalded milk over one cupful of rolled oats; milk and water may be used. Add a teaspoonful of salt, a tablespoonful of shortening and when lukewarm add one-third of a yeast cake, softened in half a cupful of water. Add wheat flour to make a dough to knead from five to ten minutes. Return to the mixing bowl, cover, let rise until double its bulk. Shape into loaves and when light bake one hour. About five cupfuls of flour are required for this amount.

**Nut Bread.**—Take one cupful of milk, one-half cupful of sugar, one egg, three-fourths of a cupful of walnuts, two and one-half cupful of flour, three spoonfuls of baking powder and one-fourth spoonful of salt. Mix as usual and bake in a one-loaf bread pan forty-five minutes.  
**Coffee Cake.**—Take five cupfuls of light bread sponge, three eggs, one cupful of raisins, one-half cupful of sugar, one spoonful of cinnamon, three-fourths cupful of shortening. Warm the shortening, add the beaten eggs, stir into the sponge, add flour until too stiff to stir. Set to rise until light. Mix sugar and cinnamon and spread the top of the cake with butter before sprinkling with the cinnamon and sugar. Bake twenty minutes or more in a hot oven.

**Almond Omelet.**—Take half a cupful of blanched and halved almonds, place in an omelet pan with butter, stir until well coated with the butter, using a tablespoonful, then pour in an omelet mixture using four eggs. Cook as usual, fold and roll onto a hot platter and pour over a hot maple sauce. Serve at once. The nuts will be nicely browned if they are quickly coated with butter, before the omelet is poured.

**A Few Good Desserts.**  
To avoid monotony in dessert making, the following may be used:  
**Butterscotch Pudding.**—Melt one cupful of brown sugar and two spoonfuls of butter, until brown but not burned; pour over the mixture two cupfuls of boiling milk and simmer until the sugar is dissolved. Meanwhile soak a thick slice of bread in cold water until soft. press all the water out of it, add the yolks of two eggs, a pinch of salt and a teaspoonful of vanilla. Pour into a well buttered baking dish and bake in a pan of water for forty-five minutes. Beat the whites of the eggs until stiff, add two spoonfuls of powdered sugar and the juice of half a lemon; beat again, spread over the pudding and brown in a moderate oven. Serve hot or cold.

**Baked Apple Tarts.**—Cook apples until tender in sirup, but not soft enough to lose their shape. Roll out rich pastry cut into squares large enough to wrap an apple. Brush the tops with water and dredge with sugar. Bake until well browned. Serve with a spoonful of hard sauce piped on the top of each. Pass the sirup that was left, also.  
**Graham Pudding.**—Cream one-fourth of a cupful of butter, add one-half cupful of molasses, the same of milk, one egg, one and one-half cupfuls of graham flour, one-half spoonful of soda, one spoonful of salt, and one cupful of raisins. Mix and steam in a buttered mold two and one-half hours. Serve with a sweet sauce.

**Caramel Pudding.**—Boil together one cupful of brown sugar and one-half cupful of water until it hairs. Dissolve one-fourth of a box of gelatin in enough water to cover, add to the sirup, then when cool fold in three beaten egg whites and pour into cups to cool. The white comes to the top—the brown goes to the bottom. Serve with a custard made from the egg yolks, two cupfuls of milk, sugar and flavoring.

**Baked Savory Eggs.**—Cook as many eggs in the shell as there are people to serve. Prepare the same number of pieces of toast, butter slightly and arrange in a dish to be served. Cut the eggs into halves lengthwise and remove the yolks. Put two halves on each piece of toast. Have ready a small amount of minced tongue or chicken, mix with the egg yolks, adding a little softened butter, salt and pepper to taste. Pile the stuffing on each egg white, making it round up in a little mound; sprinkle with buttered crumbs and set in a quick oven to brown the crumbs. Have ready a cupful of white sauce or a thickened, seasoned tomato sauce. When the eggs are hot pour the hot sauce around the eggs but not over them. Serve at once.

**Scientist Has Found Stars by the Billion**

Prof. Frederick H. Sears of the Mount Wilson observatory recently completed counting the stars in the heavens. This seemingly impossible task he accomplished by mathematical calculations, although he could not see even with the most powerful telescope 97 per cent of them. First he divided the sky into squares. Then, 139 of these squares, he photographed all the stars included in each space with the great 60-inch reflecting telescope of Mount Wilson observatory, which collects 50,000 times as much light as the human eye. A count of the stars in the 139 squares showed 1,000,000,000. The 139 squares, however, represented only the 1-2,500 part of the sky and include stars only up to the twenty-first magnitude. So he worked out a ratio between the stars of each succeeding magnitude and by an intricate calculation arrived at the final count of 30,000,000,000,000.

**Academic Prize Went to Skillful Arguer**  
Heretofore "wrangling" was but another word for disputing, and as in the Middle Ages of scholarship was decided by skill in argument in public, so the senior disputor or "wrangler" was the winner of any academic prize.

Long after this system of public argument had been superseded by the system of written examinations, the name of wrangler had survived, and up to only a few years ago was given at Cambridge to the senior mathematical scholar of any one year, many of the famous scholars of the world being known as first, second and third "wranglers."

Some seventeen years ago, however, the order of senior, second, and so on, "wrangler" was abolished, mathematical scholars being now alphabetically arranged under groups.

**Causes of Fire Loss**  
In 1924 lightning as a cause of fire ranked eighth. The cause heading the list was exposure, which merely means the loss due to fires spreading beyond the point of origin. Next came matches and smoking; then defective chimneys and flues; stoves, furnaces, and their pipes; spontaneous combustion; sparks on roofs; electricity and lightning.

Specially prepared dyes in containers fitted to the nose of shells fired from naval guns and scattered by means of a small detonating fuse have been adopted by ordinance experts to color the water the missiles throw up and thus enable the marksmen on different ships to determine which shots register. **When Winter Comes Good Elimination is Essential**

**HABITS** of life change with the changing seasons. Winter brings us more indoors; we are apt to get less fresh air and exercise, to eat heavier food and to be less active generally. These winter-time habits impose heavier burdens upon our hard-working kidneys.

Sluggish kidney function permits retention of poisonous waste in the blood and makes one an easier victim of winter's colds and chills. Presence of these unfettered toxins makes itself felt in many unpleasant ways. One is apt to feel tired, achy and listless—to have drowsy, headache, dizziness and perhaps a dull, toxic backache. That the kidneys are not functioning as they should is often shown by scanty or burning secretions.

At such times the use of a stimulant diuretic to the kidneys is indicated. Doan's Pills act on the kidneys only. Grateful users the country over recommend them. Ask your neighbor!
