

LUMBAGO?

A pain in the lower part of your back can torture you. But not for long, if you know Bayer Aspirin. These harmless, pleasant tablets take away the misery of lumbago, rheumatism, neuralgia, headaches, toothaches, and systemic pains of women. Relief comes promptly; is complete. Genuine Aspirin cannot depress the heart. Look for the Bayer cross, thus:

FOR FIRST AID
SINCE 1846
HANFORD'S
Balsam of Myrrh

Boosting Stamps Wanted
Postage stamps bearing attractive pictures of Britain which would attract tourists have been proposed to the postmaster general. Scenes of landscapes, flowers and animals would be used. One enthusiast says that the pictures would also brighten stamp albums throughout the world.

TIRED WHEN SHE GOT UP

Strengthened by Lydia E. Pinkham's Vegetable Compound

St. Paul, Minn.—"I used to be as tired when I got up in the morning as when I went to bed. I had fainting spells and palpitation. Of course it was my age. I read a Lydia E. Pinkham booklet and started taking the Vegetable Compound three times a day. I am now a well woman. Three of my neighbors know what it did for me so they are taking it too. I will write to any woman if Lydia E. Pinkham's Vegetable Compound will help her as it did me. I feel like a young woman now and I thank you."—Mrs. H. C. HENRY, 286 Fuller Ave., St. Paul, Minnesota.

Interpreting the Wren
"I don't know much about this stuff they call bird lore," says Uncle Amaziah, "but I've been listening to a wren out our way, and I find that his song is to be interpreted about as follows, to-wit: 'If I were just a little bigger I'd sock that cocky robin and get mesome of those cherries.'" — Lafayette Journal and Courier.

More Freethinkers
The German Freethinkers' society on its twenty-fifth anniversary asserts more than 52,000 persons joined last year, bringing the roster of the movement to 600,000. It was said that in Berlin alone 6,000 persons severed connections with the churches.

Uses Tail as Anchor
The sea-horse differs from all other fish in having a tail that can be twisted around stems and used to anchor the fish to a certain spot.

When Food Sours

Lots of folks who think they have "indigestion" have only an acid condition which could be corrected in five or ten minutes. An effective anti-acid like Phillips Milk of Magnesia soon restores digestion to normal. Phillips does away with all that sourness and gas right after meals. It prevents the distress so apt to occur two hours after eating. What a pleasant preparation to take! And how good it is for the system! Unlike a burning dose of soda—which is but temporary relief at best—Phillips Milk of Magnesia neutralizes many times its volume in acid. Next time a hearty meal, or too rich a diet has brought on the least discomfort, try—

PHILLIPS Milk of Magnesia

W. N. U., BALTIMORE, NO. 34-1930.

Insecticides in Safe Place Best

Never Keep Poison Where It May Be Mistaken for Harmless Article.

(Prepared by the United States Department of Agriculture.)

A clerk's error in selling a sulphur-arsenic insecticide instead of sulphur resulted in the death of a number of hogs and caused the dangerous illness of two persons on a farm in New York, an investigation by an official of the food and drug administration, United States Department of Agriculture, has revealed.

The supposed sulphur was used in preparing a sulphur and molasses mixture as a home remedy for a cold. This resulted in the critical illness of one person. Then the drug was burned and the fumes were inhaled by another, also as an attempted treatment for a cold. This person became unconscious and for some days was severely ill.

Used to Cure Hogs.
Investigation by a federal food official revealed that this same sulphur had been used last fall in an attempt to cure hogs thought to be suffering from cholera. The preparation was mixed with the feed of 60 hogs, and a majority died. It was thought at the time that the deaths were due to cholera.

The sulphur used in the three cases was analyzed by the food and drug administration and was found to contain arsenic. Fearing that others would buy this same product and use it as sulphur, the food officials traced it to its source.

Investigation showed that the mixture supposed to be sulphur had been bought at an implement store. This store had a bag of sulphur and also a bag of sulphur-arsenic insecticide. Both were in a dark attic. A clerk had sold the poisonous mixture thinking it was sulphur.

Three Errors Made.
Officials of the food and drug administration point out three errors in the situation. A poison should never be kept where it may be mistaken for a nonpoisonous product. Sulphur is not recognized by the modern veterinary science as a cure for hog cholera. Modern medical science does not consider sulphur effective in the treatment in colds either as a mixture of sulphur and molasses or as sulphur fumes.

Hessian Fly Has Cost Country \$100,000,000

Of all the insects working at cross purposes with man, few have such records for destructiveness as the Hessian fly whose activities have cost the country as much as \$100,000,000 in a single year, the United States Department of Agriculture's records show.

In 1927, according to estimates, Kansas alone lost 20,000,000 bushels of wheat to the Hessian fly. Serious outbreaks of Hessian fly activity occurred in 1914 and again in 1919 and 1920. At least eight serious outbreaks have occurred over the northeastern one-third of the country within the last 45 years. Local activity is evident almost every year somewhere in that large territory or in limited areas on the Pacific coast. To assist the farmer in combating this pest, the United States Department of Agriculture has recently published Farmers' Bulletin 1627-F, "The Hessian Fly and How Losses from It Can Be Avoided." It is free to anyone requesting it.

Irregular Soy Stands Not Considered Good

The best yields of soy beans cannot be obtained from stands that are very irregular as is common in most fields. Beans put in with a grain drill at the University of Illinois, and which produced what was considered a good stand, were found to vary all the way from one bean plant in a foot of drill row to fifteen plants. Such irregularity is largely due to variation in flow of seed through the drill as modified by the jarring or lack of jarring of drill. Irregular physical condition of the soil caused by clods and ridges and holes make for irregular distribution of the seed and consequent irregular stands and lower yield.

Farm Hints

Manure with superphosphate makes a combination that is hard to beat as a pasture fertilizer.

Early threshing helps to control the angoumois grain moth. To save wheat from the insect the grain should be threshed not later than September 1.

Anemia in pigs is caused by the gradual decrease of blood-forming elements in the blood, as the sows milk is low in iron and copper, which have restorative properties.

According to the thirty-fifth annual report on fertilizer inspection work in Wisconsin, farmers in that state used 40,671 tons of fertilizer of various kinds in 1929. In 1919 the tonnage used was only 10,000 tons.

When through with the plow, grease it well and slip an old gunny sack over the lay and moldboards and tie it at the top. This keeps the grease from being rubbed off and prevents difficulty in scouring next time the plow is to be used.

Example of Colonial Type of Home That Has Many Pleasing Features

We are sure you will agree that this fine example of the colonial design is worth a second look, and don't overlook the floor plan with its center hall and large sun room off the living room. The entrance is one of the best colonial designs.

By W. A. RADFORD
Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 407 South Dearborn Street, Chicago, Ill., and only inclose two-cent stamp for reply.

There are many variations of the colonial type home, but the one shown in the accompanying illustration is about as near the true colonial as it is possible to get. The only variation from the colonial in this home is the addition of the sun porch at the right. Without this porch this home is exactly the type that will be found in so many New England villages. This is a two-gable, rectangular house, 28 feet by 24 feet. On the first floor are the living room, dining room and kitchen, and on the second floor three bedrooms and bath. The entrance door is directly in the center of the house with the living room at the right of the hall and the dining room at the left.

and kitchen, and on the second floor three bedrooms and bath. The entrance door is directly in the center of the house with the living room at the right of the hall and the dining room at the left.

Many Good Reasons for Remodeling Old Home

Home modernizing appeals to owners of old homes from a number of different angles. Following are some of the reasons for modernizing which dealers have put before home owners. The sale or rent value of an old home may be greatly increased by improving its appearance and equipping it with modern conveniences. The increased value is considerably greater than the cost of making the improvements.

People not able or willing to pay for the construction of a new house may have their old home modern in appearance and convenience for but a part of the cost of a new building.

Most old homes hold a hidden treasure—sound lumber and sturdy construction. The sound lumber in an old house is well seasoned. Architects and contractors often pay a premium for the lumber taken from old buildings for use in building apartments and other structures. Most old houses are of real good construction—a value that the owner would be wise in taking advantage of.

Many old homes have an unsatisfactory arrangement of rooms, doors and windows. These features can be made to the owner's liking by modernizing. It is not necessary to do all of the modernizing work on a house at one time, although this usually is desirable. The owner can determine on the work he wants done and have it completed step by step as he is able to pay for it.

A nondescript type of house can be changed into a good architectural type, such as an English cottage, one of the colonial types or an adaptation of one of these styles.

A house may be modernized easily, without impairing the strength of any part.

Some owners of old homes want to keep them because of sentimental attachment. By modernizing they can retain that to which sentiment is attached and at the same time have modern conveniences and attractiveness.

Owners of some old homes would like to have them modernized because of their contrast to the modern houses which have been built around them.

An old home can be made absolutely new in appearance, with no indications that it has been made over. Unused attic and basement space can be converted into additional bedrooms, dens, sewing rooms, playrooms, studios, billiard rooms or some other kind of special room.

The true colonial balance is retained in this house, there being two windows on either side of the entrance with three windows on the second floor in perfect alignment.

and is 23 feet by 11 feet 3 inches. Connected with this through french doors on both sides of an open fireplace is the sun parlor, which is 7 feet 6 inches by 16 feet deep. To the left of the entrance hall is the dining room the same width as the living room and 12 feet 6 inches deep. At the back is the kitchen, 9 feet 3 inches by 10 feet with a breakfast room adjoining. Colonial stairs run out of the entrance hall to the second floor. There are three bedrooms, two at the front and one at the back and a bathroom all opening off the hall.

The house is built of frame set on a concrete foundation with a basement of the same dimensions as the house proper. An attractive feature of the home is the entry way, which is enclosed. The platform and steps of brick lead to it. For prospective home builders who want to get the greatest amount of space for their money, this design is good.

Use Paint for Profit in Selling Your Home

Though about the least expensive item in home modernization, observes a writer in the Household Magazine, paint is one of the greatest factors in paying greater returns in satisfaction to the home owner or occupant or in earning actual profits in resale or rental value.

"Paint is refreshing, symbolic of cleanliness, and, to most of us, the embodiment of sanitation. Engines idle as we drive through streets of painted houses, but as we enter the unpainted districts, a heavy foot descends upon the gasoline feed. Did you ever try to rent or sell a house that needs painting? Then you know, or strongly suspect, that paint is just as good business for the house owner as it is for the merchant or filling station operator," advises the writer.

"An ordinary roof shingle, sixteen inches long and one-fourth inch thick, will last about 25 years, but with creosote stain, a foundation of aluminum, it should last indefinitely." One man purchased a cottage for \$2,500, spent \$100 in painting, and sold it soon thereafter for \$3,200. In these days when houses are not so scarce as they were back in war times," continues the Household Magazine, "tenants not only will not rent houses in bad condition but will not stay in houses if the owner neglects them. Agents may justifiably claim that tenants may move from neglected homes or apartments. Unpainted exteriors and woodwork are depressing. Depression stifles progress, breeds inferiority. Brightening of a home by paint stimulates similar improvement in appearance of the entire neighborhood, and thus increases value of entire real estate blocks.

Ideal Basement Height Placed at Eight Feet

Ceiling height did not matter in the old-time cellar, for no one stayed down there long enough to care whether the ceiling were too low or not. Now, with families planning and arranging to spend considerable time in their basements, a ceiling height of eight feet is none too high. One then has plenty of room for piping and more elbow and breathing room. Steel beams are another "thought" for the new basement. Wooden or steel posts take up room for floor support and if an owner wants all the possible room he can get from his basement he should consider using steel beams. More expensive, yes, but they give you more room.

The KITCHEN CABINET

The wise, extending their inquiries wide, See how both states are by connection 'y'd, Fools view but part, and not the whole survey, So crowd existence all into a day. —Jenyns.

SEASONABLE GOOD THINGS

Every day now there is something good that may be prepared for the winter fruit closet. The strawberries have been put away in as many delicious ways as time and the price of berries would warrant. Pineapple conserve, with rhubarb, preserved for garnishing, and canned for serving as desserts are all in neat rows and now comes the later fruits to finish filling the shelves. Watermelon rind is so well liked for a sweet pickle, is so attractive when carefully made that a few jars of it should be in every fruit closet.

Watermelon Pickles.—Peel the rind, cut into neat pieces, cutting off all irregular places and put to soak in salt water over night. In the morning plunge into cold water and let stand until firm. Now put into boiling water and cook until nearly tender. Prepare a sweet pickle using five pounds of brown sugar, a pint of vinegar, and two tablespoonfuls each of whole cloves and stick cinnamon tied in a muslin bag. Let this mixture boil, add the melon slices and cook until transparent, or partly so. Put into cans boiling hot and seal well. Ripen cucumbers may be treated in the same way, and many prefer them to the melon.

Peach Chartreuse.—Boil one cupful of sugar with two cupfuls of water fifteen minutes. Add one cupful of finely cut peaches which have been well drained. Cook five minutes. Add one cupful of the peach sirup, the juice of one orange and the juice of one lemon. Soak one tablespoonful of gelatin in two tablespoonfuls of cold water, add one-half cupful of the heated fruit juice to dissolve. Cool. Add to the sugar mixture. Whip well when beginning to set and fold in two well-beaten egg whites. Mold and chill.

Watermelon Served Pie Fashion.—The beautiful pink of a ripe melon with the dark seeds and the green rind, make an attractive dish to serve. Cut the melon into thick slices, leaving on the rind, then cut into pie-shaped pieces; serve on chilled plates and have the melon cold.

Banana Pancakes.—Mix and sift three-fourths of a cupful of flour, one teaspoonful of baking powder and one-half teaspoonful of salt. Beat one egg, add one cupful of banana pulp, one-half cupful of milk and two tablespoonfuls of butter. Beat until smooth. Cook on a hot griddle. Serve with currant jelly.

SAUCES FOR ICE CREAMS

One would think of ice cream in itself as being wholesome, toothsome and satisfying, plain as it is; but the addition of a zippy sauce which is easily prepared at home makes the serving an added way of expressing the real spirit of hospitality, when one wishes to offer something more than commonplace refreshment.

A few chopped nuts sprinkled over plain vanilla ice cream and topped with a spoonful of whipped cream and a maraschino cherry makes a most satisfying sundae.

The careless preparation of a sauce to serve on or with any dish is always a convincing proof of the indifference paid to good cooking. To make a good sauce requires good taste, patience and judgment. To be good it must fit the dish where it is served—that is, be appropriate to it, smooth, artfully flavored and of the right consistency.

The opportunity to add one's individuality to a dish is well expressed in sauces served.

Maple Pecan Sauce.—Melt two tablespoonfuls of butter, add three-fourths of a cupful of sugar and one-fourth of a cupful of water, three tablespoonfuls of corn sirup and cook to a stage before the soft ball when tested in water. Remove from the fire, add one-fourth of a cupful of cream, three-fourths of a teaspoonful of maple, one-half cupful of pecans chopped. This makes six servings, one cupful of sauce.

Chocolate Sauce.—Melt three squares of chocolate over hot water, add one-fourth cupful of water and stir until smooth; now add one cupful of sugar, one-half cupful of corn sirup and boil to the very soft ball stage, or 234 degrees. Remove from the fire, add one cupful of cream and one teaspoonful of vanilla. Beat until smooth. This makes two and one-half cupfuls of sauce. Cut eight marshmallows into small pieces. Boil one cupful of sugar and one-half cupful of water to a heavy sirup. Whip two egg whites, add the marshmallows and beat well. Flavor with any desired flavoring.

Lettering on Bridge to Guide Air Traveler
Using a highway bridge as an airway marker, is one of the latest developments in this fast-moving transportation age.
This novel use of a bridge, said to be the first instance of its kind, was brought about by citizens of Napoleon, Ohio. The bridge crosses the Maumee river and the work was done in conformity with instructions from the bureau of aeronautics, Washington.
In laying the bricks, the contractor started at the north end of the bridge using all dark brick, and later light brick for the marking were inserted. The surplus dark brick were then used at the south end. Asphalt was used as filler for the dark brick, while the markers were filled with a lean grout filler.
The letters are 29 feet and three inches high, and the name Napoleon is 340 feet in length. The width of the letters run four feet and three inches, thereby insuring easy visibility for the traveler in the air.—Boston Herald.

Kremola
Wonderful and rare. Make your skin beautiful, also cure eczema. Price \$1.25. Frocks Ointment removes freckles. Used over 40 years. At All Dealers. Beauty booklet sent free. Write DR. C. H. BERRY CO., 2930 Michigan Ave., Chicago.
