A Man and Mule Working in Harmony Can Laugh at Hard Times.

With a fair season, a reasonable amount of energy and a good mule a man, single-handed, can raise enough on a few acres of land to dispel the prospect of hunger a whole year in advance. We know a man in Albright township, now 51 years young—and he don't look it and you would be dubious about it if some one else told you, who allowed himself to be persuaded to quit work some 8 or 10 years ago. After going away for a few years and living with his children, he became restless and found he was rusting out. He itched to get back on his farm and back he went. That was two or three years ago. At once he began to exercise himself and a newly purchased mule in an agricultural fashion. We saw him not the mule, here Monday and passed a few words with him. Was glad to see him in fine health, fine spirits and jolly. Naturally, we inquired "how are you getting along." He had gathered his corn, some 40 barrels, which he added to the bulk of old corn still in the crib. He had harvested 43 bushels of wheat from two acres and 40-odd bushels of oats from one and a half acres in the early summer. Besides these, numerous smaller things he did to fill in the time. And now Gilbert M. Holt, well known citizen, and his mule are not worrying about rations for a whole year to come.

Made FRESH never parched, never toasted CAMELS are KEPT Fresh!

You probably know that heat is used in the treatment of all cigarette tobaccos.

But you know too that excessive heat can destroy freshness and fragrance.

That's why there could be no truly fresh cigarette except for scientifically developed methods of applying heat.

Reynolds is proud of having discovered and perfected methods for getting the

benefits of heat treatments and still avoiding ever parching or toasting.

With every assurance we tell you, Camels are truly fresh. They're made fresh—not parched or toasted—and then they're kept fresh in the Camel Humidor Pack.

If you wish to know why the swing to Camels is nationwide and steadily growing—switch to them for just one day—then leave them, if you can.

In offices and homes, even in the dry atmosphere of artificial heat, the Camel Humidor Pack delivers fresh Camels and keeps them right until the last one has been smoked.
