United States Warns Japan It Is Violating the Nine-Power Treaty-President Prods Congress on Relief Measures.

By EDWARD W. PICKARD

Javan has been formally notified that in the opinion of the American government she is violating the nine-power treaty by her actions in Manchuria. The Unit-

were forwarded in Identical notes to Tokyo and Nanking by Secretary of State Stimson, who Immediately thereafter called in the diplomatic representatives of the signatorles to the nine-power pact and told them what he had done. It was expected that Great Britain and some of the other powers would follow the American example. Mr. Stimson declined to say what could or would be done if Japan persists in violations of the treaty. The nine-power pact calls for no other action than "full and frank communication between the contracting powers concerned" in case of an emergency. The Kellogg treaty calls for no military or diplomatic

The Japanese forces in Manchurla moved on southward from Chinchow and occupied Shanhaikwan, the gate way to China, situated where the Great Wall reaches the coast. Their garrison in Tientsin was heavily increased and a "grand review" was held there.

Earlier in the week the Washington administration was aroused by an at-tack made on American Consul Culver B. Chamberlain by Japanese soldiers in Mukden. 'Formal protest brought an apology from the Japanese ambassador in Washington but Mr Stimson let him know that the incident would not be considered closed until the offenders had been adequately punished. For this affair, as for all its actions in Manchuria, the Japanese government sought to put forward excuses and explanations which in most cases appear to be ready made to fit the

On Friday a bomb was hurled in Tokyo by a young Corean in an effort to assassinate Emperor Hirohito. It exploded near the carriage preceding that occupied by the ruler, and no one

With President Hoover appealing to congress for speedy and nonpartisan action on the relief meas ures he has recommended, the Demo crats began to push

forward the first of their party bills of major importance. This is a tariff bill not designed to alter existing rates but to denrive the Chief Executive of his control over the flexible provisions of the present act. It also calls on the President to summon an international conference for the re-

duction of tariff rates

J. W. Collier

This measure, which was introduced by Representative James W. Collier of Mississippi, Democratic chairman of the house ways and means committee, had the approval of the congressional Democratic joint policy committee. It would take away the power now enjoyed by die President to accept or reject, as he alone sees fit, the recommendations made by the tariff commission, under the flexible provisions of the Smoot-Hawley act It would give congress the final right to determine whether or not the commission's findings justify a change in

Supported by all the Democrats and probably some of the independent Republicans, this bill, it was admitted had a good chance to get through both houses but not with a sufficient mar gin to pass it over the presidential veto that might be expected.

MR. HOOVER'S plea for quick action on relief-bills was made in a special message. The measures for which he spoke especially included the bill already passed by the house to increase the capitalization of the federal land bank system by a sum between \$100,000,000 and \$125,000,000; the bill to create a federally financed \$500,000,000 "reconstruction finance corporation"; the bill to create a

They Brought the River to This Bridge

HARDLY had Peter Rabbit left Whitefoot the Woodmouse when he discovered some new tracks in the snow, and right away he was all curiosity.
"Now whose can these be, I won-

der?" thought he.

They were quite different from the tiny tracks of Whitefoot. In the first place they were so much larger. Then, too, they were quite far apart in little groups of four, two little round ones and two quite long ones.
"Of course," said Peter to himself,

"the little ones are the prints of front feet, and the long ones are the prints of hind feet. They are just a little like my own prints, only not so big. I guess I'll follow them and see where they lead to."

So Peter started off Ilpperty-lipperty-lip, for these tracks were very easy to follow. He had followed them quite a distance without discovering anybody when he happened to look back at his own tracks. Then he stopped abruptly and sat up. First he looked at his own tracks and then he looked at the other tracks, and a very foolish look crept over his face. He ten and this was that in hopping he puts his hind feet down in front of his fore feet so that anyone who didn't know that would think from his tracks that he was going in just the opposite direction from what he was. He looked a little closer at the tracks he had been following and now he could see the marks of toenails. Who ever had made those tracks did just as he did, put the hind feet down in front of the forefeet, and here he had been following them in the wrong direction. No wonder he didn't catch up with any one. My, how foolish Peter did feel! He looked this way and that way to make sure that no ently came to an old stump with a one had seen what he had been doand that way to make sure that no

THE CHILDREN'S STORY

ing, and then he turned about and | down into that hole and none came started back the way he had come as fast as he could go.

When he reached the place where he had first begun to follow the tracks he kept right on. Presently he came to a place where some one had dug through the snow. Right beside the little hole was an empty nutshell. Peter stopped and right away he lost all interest, "Pooh!" he exclaimed "I'm not going to waste my time following those tracks any farther. They were made by Happy Jack Squirrel, and he's at home in bed now. Funny I didn't think of him before. Next time I see his tracks I'll know them so perhaps my time hasn't been wholly wasted?"

With this Peter once more went looking for tracks, and he didn't have far to look. This time they were big round tracks in a single row. Peter took one good look at them and that was enough.

"Reddy Fox!" he exclaimed under his breath. "This is no place for me if he is about. There is one good thing, and that is they head away from where I have been. I hope he won't take it into his head to come over this way."

Making the longest jumps he knew how, Peter burried off to another part of the Green Forest, and there presently he forgot all about Reddy Fox in his interest in another set of trucks. These were in a double row, and it was very plain to Peter that whoever made them was in no great hurry. He followed them, and pres-

Japanese Jonah and the Whale

THIS Japanese Jonah was not actually swallowed by the whale because he and his fellow-whalers had made the big fellow secure long before they

got within reach of his jaws. The whaling industry is one of the foremost

means of livelihood of the northern Japanese. The gigantic mammal in whose mouth this whaler is standing is of the "lwast" or beef whale species.

Here's the World's Rarest Bird

WHAT is said to be the world's rarest bird has been added to the col lection of Gilbert Lee, famous Los Angeles agriculturist. The blue rumped parrot, scientifically known as "Psittacus Insertus" and thought the only one of its kind in captivity, was recently brought by sailors from the uninhabited island off the Malay peninsula which is the only place in the world the bird is found. One other such bird was once brought to London but lived only a few days. The bird's length is 51/2 inches. It has a red bill and green wings which are Chinese red underneath. Its head and rump ate
