

ACHES

There's scarcely an ache or pain that Bayer Aspirin won't relieve promptly. It can't remove the cause, but it will relieve the pain! Headaches. Backaches. Neuritis and neuralgia. Yes, and rheumatism. Read proven directions for many important uses. Genuine Aspirin can't depress the heart. Look for the Bayer cross:

Nothing Doing

Secretary McCankle of the American Institute of Actuaries told a story at a banquet in Des Moines. "A waiter in a night club," he said, "complained bitterly to the cloakroom girl.

"The whole night through," he moaned, "I've had the hardest kind of hard luck. Haven't made a cent on the side, not a cent. I added in the date on every blasted bill, but not once did the trick work. Not once the whole night through."

"You poor fish," said the cloakroom girl, "no wonder your trick didn't work. Don't you know that all these people here are attending the actuaries' convention?"

for Stomach and LIVER TROUBLES

Coated tongue, bad breath, constipation, biliousness, nausea, indigestion, dizziness, insomnia result from acid stomach. Avoid serious illness by taking August Flower at once. Get at any good druggist. Relieves promptly—sweetens stomach, livens liver, aids digestion, clears out poisons. You feel fine, eat anything, weigh

AUGUST FLOWER

Freak Addresses Barred

The Post Office department has announced that hereafter letters bearing freak addresses will be sent to the dead letter office if they do not bear addresses of senders. Postal authorities in the past have been indulgent toward violations of the rule that all letters and post cards should bear proper addresses, but this recent decision would indicate that it was forced by an increase of first-class matter bearing freak addresses.

Handicapped

A magazine writer asked Paul Shoup, the California railroad king, if he did not think the present generation was admirably adapted for railroading, both by nature and by training. Mr. Shoup laughed.

"The modern boy," he replied, "is mechanic-minded. He can run almost anything except an errand."

Taking It on Trust

She—Where did you get that umbrella?

He—It was a gift from sister.

She—You told me you hadn't any sisters.

He—I know—but that's what's engraved on the handle.—Brooklyn Eagle.

Or a Press Agent

A fourteen-year-old school boy has been expelled because his teachers claim that he is incapable of telling the truth. If his young man doesn't mend his ways he will likely end up in the weather bureau.—Life.

The Right Way Out

Policeman—Where's that flaming youth who was creating all the disturbance up here?

Landlady—He just went down the fire escape.—Cincinnati Enquirer.

HEADACHE?

Instead of dangerous heart depressants take safe, mild, purely vegetable NATURE'S REMEDY and get rid of the bowel poisons that cause the trouble. Nothing like NR for biliousness, sick headache and constipation. Acts pleasantly. Never gripes.

Mild, safe, purely vegetable. At druggists—only 25c. Make the test tonight. FEEL LIKE A MILLION, TAKE

NR TO-NIGHT TOMORROW ALRIGHT

USE GLENN'S SULPHUR SOAP

Contains 33% Pure Sulphur. Soft, Clear Skin. Rohland's Styptic Cotton, 25c.

DAISY FLY KILLER

Flies, gnats, mosquitoes, house flies, and all other annoying insects are attracted to the Daisy Fly Killer. It kills them instantly and keeps them from coming back. It is safe for all household uses. It is the best fly killer ever made. It is sold in 5-cent and 25-cent packages. It is sold everywhere.

Growing Pickles Very Profitable

Offers Opportunity for Summer Work by School Boys and Girls

(Prepared by the United States Department of Agriculture.)

About three billion cucumber pickles tickle the American palate each year. Consumers buy them although the pickles are not high in food value, but serve primarily as an appetizer and relish with other foods. Growing cucumbers for sale to pickle manufacturers is a profitable farm specialty in certain regions where soil and climatic conditions are favorable and where the fields are within reasonable distance of a salting station.

Summer Work for Students.

Cucumber growing for pickling often offers opportunity for profitable summer work by boys and girls. Most of the pickles are grown in small fields of one or two acres because they demand many hours of attention in the marketing season, and labor is not often available for large plantings. The work of gathering the cucumbers demands patience more than strength.

Michigan ordinarily supplies about one-third of the pickles with Wisconsin in second place. Indiana, Minnesota, Colorado, and California are of importance in the industry.

Careful preparation of the soil, fertilization, planting, thinning, cultivation and harvesting and handling are the principal operations. Spraying and dusting for control of insects and diseases are necessary in many districts. Careful harvesting includes removal of the small cucumbers when they are at the size desired by the manufacturer, and before they develop enough to deplete the vitality of the vines. Picking the cucumbers while immature results in heavy bearing and a long harvest season.

Practical Advice.

In "Growing Cucumbers for Pickling," just published by the United States Department of Agriculture, as Farmers' Bulletin 7620-F, J. H. Beattie of the bureau of plant industry gives simple and practical advice for growing the crop. Other bulletins published previously give information on cucumber growing for table and slicing cucumbers and on cucumber culture in greenhouses. "Cucumbers for pickling occupy approximately 75,000 acres each season in the United States," says Mr. Beattie, "and the yield has a value to the growers of about \$3,000,000 annually. Successful growers often obtain a gross return of \$150 to \$200 an acre. This is a cash crop which is well worth attention where it can be grown and handled."

Those interested may obtain a copy of Farmers' Bulletin 7620-F, by writing to the Office of Information, Department of Agriculture, Washington, D. C.

Beware of Coccidiosis, Dread Chicken Disease

"Too much emphasis cannot be laid on sanitary measures for the prevention of coccidiosis in chickens," said Dr. J. F. Bullard, Purdue university, recently in speaking to a group of poultrymen in Indiana. "This is a common disease and is the cause of heavy losses in chicks from two to fifteen weeks of age.

"The coccidium, which is the cause of the disease, is passed in large numbers in the droppings. For a time after the organisms are passed out they do not infect the chicks so it is obvious that if the houses, lots and feeders are kept clean, and on lots that have not been used for chicks before, the disease can be controlled.

"Old birds and young chicks should be kept apart, which is an important part of the sanitation program."

Agricultural Hints

Other things being equal, the well-fed dairy cow is always more profitable than the one that is poorly fed.

Regularity in feeding and milking adds to the dairy farmer's profits. The testers of the dairy herd improvement associations of the state will tell you so.

Testing is the only sure way of finding out for sure whether a cow has tuberculosis. A cow may look all right but still be badly infected with this disease.

Clean milk and dairy products are admitted to be the best and most nearly perfect of all human foods. On the other hand they may be the most dangerous.

When roughage of the proper quality is available, cows will produce more profitably on less grain than formerly was thought necessary for highest production.

The sides, flanks, and udder of the cow should be clipped as often as necessary and should be brushed before each milking. Also the udder and teats should be washed.

Cabbage root maggot can be controlled by corrosive sublimate. Use one ounce of the powder in eight gallons of water. Dissolve the powder first in a little hot water. Apply one-half teaspoonful to the soil around each plant.

Striking Effects Produced by Combinations of Materials

While this brick and frame home has an appearance of the Dutch colonial, it will be noticed by the floor plan that it is slightly different. At the front are the living and dining rooms but the central hall is absent. This home contains five rooms and a sun parlor at the end.

By W. A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 407 South Dearborn Street, Chicago, Ill., and only inclose two-cent stamp for reply.

Some very fine effects are secured in the home building design illustrated by using combinations of different types of building materials. Brick and tile give the appearance of stability; lumber is perhaps the more flexible of the building materials that go into the construction of a house.

An example of what may be done when a combination of brick and lumber

is used is shown in the home building design illustrated here. The walls of the home illustrated up to the second floor are of face brick which may be either solid brick construction or what is known as veneer brick construction. The latter means that instead of board siding one course of brick is used and tied to the frame of the house. In this house the use of brick is happy because the sun porch appears to be an integral part

Second Floor.

of the house rather than an addition, and the brick seems to be supporting pillars.

While this home has the appearance of a Dutch colonial, it will be noticed by the floor plan that it is slightly different. At the front are the living and dining rooms, but the central hall, which marks the colonial design, is absent. The house contains five rooms and a large sun parlor with a balcony over the latter. Its dimensions are 26 feet, including the sun room, by 22 feet deep. How the rooms are arranged and the size of each are shown by the floor plan.

The use of shrubbery and flowers around the foundation of the house; the vines which are trained up the brick work of the house or sun porch; the flower boxes which edge the balcony, and the awnings give this house a very homey and pretty appearance.

First Floor.

Tile Roof Provides Protection From Fire

When the fire alarm awakes you at midnight on a windy night, do you calmly turn over and go to sleep again, or does the dread of fire, felt by all those who sleep in inflammable buildings, arouse you?

Even if the fire may be far away, you are not at ease, not knowing what progress the fire is making—whether victory awards the fire fighters or whether the burning brands borne by the wind are flying toward your roof.

The fear of fire is a dreadful thing. Fire, which is a good servant but a hard master, exacts its heavy toll year by year from those who fail to provide against its hazards. The annual loss in the United States is eight times as great as in England per thousand houses, it is said. Americans do not insist on fireproof materials for roofs and walls of homes like the English.

The roof is the most vulnerable point. Wood shingles are responsible for an unbelievable amount of fires. Often they are like tinder. Flying sparks from chimneys, from passing trains or nearby bonfires will often set an old, inflammable roof ablaze, and when such a fire is started it gets under headway quickly and is hard to stop.

The wind will lift firebrands of blazing shingles more than half a mile around. If they fall on a burnable roof, another fire is likely to be started.

Large conflagrations, such as the Chicago fire, the San Francisco fire and the Salem (Mass.) fire were spread in this manner.

A fire loss amounting to more than a million dollars annually is saved by many of the large cities in the United States that refuse to allow a combustible roof within their corporations.

Modern conditions and modern production methods have made it possible to have a permanent fireproof roof over a house of five or six rooms at about \$250 more than the cost of perishable roofs. A home owner can, for an investment of an addition 2 or 3 per cent, secure a roof that is not only fire resisting but permanent as well as beautiful.

New Drain Plug for Tub Fits Old Chain Hole

Old lavatories and bathtubs with rubber plugs and chains may be modernized with a new type of metal drain control that fits any lavatory or bath. The water seal is made by a metal stopper which seats firmly into the body of the drain—there is nothing to wear or get out of working order. The units are made so that the heads may be obtained with nickel or chromium.

Floor Is Foundation of Rooms in the House

What color or design to select when purchasing a rug or carpet is a problem that bothers many people. However, if we remember that, just as the floor is the foundation of the room, the floor covering should keep that feeling in relation to the other furnishings, points out Harriet W. Allard in the Household Magazine, the problem will seem much less difficult.

This authority on homemaking advises a darker tone of color for rugs than for walls and ceilings, inasmuch as this carries out the idea of a foundation. However, she says, it is not necessary to confine one's choice to plain colors in somber shades, although carpets and rugs, in one color, or with a center of one color and border of another, have been, and still are, popular. They give an appearance of a firm, sturdy foundation.

Life and animation can be added to a room with a plain carpet by using colorful drapes and wall coverings. If the value of the color is comparatively darker than the side walls, there may be a deviation from a perfectly plain covering. Designs in keeping with those of other furnishings build character and add strength to a room. A one-color carpet is lifted successfully from the plain class by having a part of the pile cut to form a pattern. The effect of light, as it is reflected across the cut and uncut pile, gives a variation which is delightful. This is called the frieze weave.

The floor covering with a number of colors in the design may be the basis for the color scheme of the room. It can act in the same capacity that a picture, fabric hanging or a piece of pottery does when the colors in their decorations are repeated in the other furnishings. If the pattern is in harmonious and satisfying colors, it becomes a safe guide to follow in selecting wall coverings, draperies, furniture and bric-a-brac.

Floor Should Be of Seasoned Lumber Only

Cracks in a new well-laid floor are the result of a change in moisture content within the wood itself.

This change is due to improper preliminary seasoning; improper storage conditions at the mill or retail yard; delivery of the flooring during wet weather or before the masonry or plaster walls are dry; or it may be due to the absorption of moisture from the air within the building either before or after the flooring is laid.

The use of the heating plant may be advisable, says the United States forest service, to maintain a temperature that will prevent excessive humidity in the building from the time the flooring is delivered until the house is occupied.

THE KITCHEN CABINET

(© 1926, Western Newspaper Union.)
"If you think you are beaten you are;
If you think you dare not, you don't;
If you like to win, but you think you can't,
It's almost a cinch you won't."

APPETIZING DISHES

In the spring and early summer green foods—fresh vegetables and fruit—are more appealing than more complicated foods. There are some roughage foods that are needed all the year round and an occasional use of bran

in food, or, taken in water as a drink, will keep the elimination good. For the children the bran may be given in small cakes, cookies and macaroons.

Bran Date Muffins.—Break two eggs into a mixing bowl and beat with an egg beater for two minutes; add two-thirds of a cupful of milk, one-half teaspoonful of salt, one-fourth cupful of sugar and one-fourth cupful of softened shortening. Add two teaspoonfuls of baking powder to one cupful of flour, add one cupful of bran, one-half cupful each of dates cut fine, and one-half cupful of nutmeats cut fine. Mix all as usual and beat well. Bake in well greased muffin pans for twenty-five minutes.

Liver Sandwiches.—Rub cooked liver while hot through a sieve, season with salt and pepper and mix with three-fourths the amount of thinly sliced olives. Spread on buttered rye bread.

Calf's Liver Sandwich Spread.—Rub cooked liver with hard-cooked eggs through a sieve, using to one pound of liver three hard cooked eggs. Add one grated onion, salt and pepper to season. Mix well and spread on buttered bread. A layer of thinly sliced sour pickle will add to the sandwich.

Chicken Liver and Jelly Sandwich.—Boil two chicken livers until tender; chop fine. Add salt, pepper and a teaspoonful of worcestershire sauce and a tablespoonful of currant jelly. Butter is not needed with this filling.

Shrimp and Liver Sandwiches.—Take one cupful of cooked shrimps, one cupful of cooked chicken livers, one Bermuda onion and one green pepper. Remove the seeds from the pepper and grind with all the other ingredients; mix with a little mayonnaise or chili sauce. Use on buttered white bread for filling.

Savory Liver Sandwich.—Chop a cooked chicken liver fine. Soften a package of cream cheese with heavy cream or mayonnaise. Add the liver, a teaspoonful of finely minced celery leaves, pepper, salt to taste, one-half teaspoonful of curry powder and one small gherkin finely chopped. Mix to a paste and spread on unbuttered bread. If too stiff add more cream or mayonnaise.

Broiled bacon and chicken liver put through a food chopper and mixed with mayonnaise makes a good filling for sandwiches.

TASTY SANDWICHES

This is the season for the sandwich. The following will be helpful in preparing your lunch baskets or sandwiches for the porch or garden parties:

Emergency Sandwich.—Put six sweet pickles through the food chopper, also five hard-cooked eggs. Cream two tablespoonfuls of peanut butter with one of prepared mustard and add the pickle and eggs with salt and pepper to taste. Add a dash of vinegar to thin the mixture and a bit of paprika for added seasoning. Spread on whole wheat or rye bread.

Sardine Sandwich.—Take one cupful of minced sardines, one-half cupful of stuffed olives chopped, one teaspoonful of scraped onion, one tablespoonful of chopped parsley, one tablespoonful of lemon juice and three tablespoonfuls of cream. Mix and spread on buttered brown bread.

Lobster and Celery Sandwich.—Mince fine the meat of a fresh boiled lobster. Moisten with heavy mayonnaise, add a dash of cayenne and two teaspoonfuls of minced white celery leaves. Spread on rounds of bread and decorate with a stuffed olive. These are served open, or they may be covered with another slice of bread and use the stuffed olives minced.

Egg and Chutney Sandwich.—Mash as many hard-cooked egg yolks as desired and chop the whites fine. Mix enough chutney with the yolks to make a spreading paste and spread on thin slices of buttered bread. Sprinkle with the finely chopped whites and lay a very tender lettuce leaf on all. Cover with another slice of buttered bread.

Pineapple and Tuna Fish Sandwich.—Take one can of tuna, drain and flake, add salt and pepper and two tablespoonfuls of chopped pickle, add French dressing to soften and then add three-fourths of a cupful of drained crushed pineapple. Spread on buttered bread.

Salmon with lemon juice mixed to a paste and spread on bread, or flaked salmon with a good boiled salad dressing spread on buttered rye bread make most satisfying sandwiches.

Nellie Maxwell

Pipe-Organ to Sound in Famous Tabernacle

One wonders what Spurgeon would have thought of the new organ which is to be brought into use at the Metropolitan tabernacle, writes "Looker-On" in the London Daily Chronicle. The great preacher shared the old Scottish dislike of "a kist 'o whistles," and in his time would permit no musical instrument of any kind in the tabernacle services, all the singing being led by a precursor, who announced the hymns and sang through the first line to give the congregation a start. In recent years an American organ has been used, but the famous church in Newington Butts has had to wait until now for its first pipe-organ. It should be added that, despite—or because of?—the lack of instrumental aid, the congregational singing at the tabernacle has always been notably good.

OLD DOCTOR'S IDEA IS BIG HELP TO ELDERLY PEOPLE

In 1885, old Dr. Caldwell made a discovery for which elderly people the world over praise him today!

Years of practice convinced him that many people were endangering their health by a careless choice of laxatives. So he began a search for a harmless prescription which would be thoroughly effective, yet would neither gripe nor form any habit. At last he found it.

Over and over he wrote it, when he found people bilious, headachy, out of sorts, weak or feverish; with coated tongue, bad breath, no appetite or energy. It relieved the most obstinate cases, and yet was gentle with women, children and elderly people.

Today the same famous, effective prescription, known as Dr. Caldwell's Syrup Pepsin, is the world's most popular laxative. It may be obtained from any drugstore.

Victory for Eagles

After two years of warfare against a representative of Uncle Sam two bald eagles stand victorious with Uncle Sam's agent in full retreat. The latter, a telegraph operator, has been stationed atop, a forty-foot pole to register the shots fired from the naval station at Dahlgren, Va. Upon this perch the eagles built their nest and a conflict has been raging for possession, with the operator forbidden from shooting the birds under a penalty of a \$50 fine. So he retreated to a new pole, conceding victory to the eagles.

Buffalo in the Arctic

As a result of the success attending the introduction of the reindeer into the American Arctic, the experiment has been tried with buffalo taken from points in the northern part of the United States and southern Canada. Nineteen American buffaloes were liberated more than a year ago at Jarvis creek in Alaska, and while they have been carefully watched they have been given no special care, except an occasional ration of food when nature had cut off the supply. The last reports indicate that the animals were thriving in the most satisfactory manner.

For bloated feeling and distressed breathing due to indigestion you need a medicine as well as a purgative. Wright's Indian Vegetable Pills are both. Only 25c a box. Adv.

Airplane's Triumph

Airplanes are transporting all materials for building the town of Wau in the Edie Creek goldfields of New Guinea. From the coast of New Guinea the planes need only thirty minutes to reach the site, whereas it takes nine days by ground through jungles and over mountains.

When two men who know it all begin to instruct each other, it soon becomes a contest of showing off.

Nonsense

Jean Assolant, the French airman, said at his wedding breakfast in Old Orchard:

"Everybody ought to get married. Most people's excuses for not marrying are as nonsensical as Sir Thomas Lipton's."

"Sir Thomas, you know, said to the Dolly sisters:

"Yes, I'm a bachelor, and I'm going to remain one, for you know, my dears, married men make the worst husbands."

Peace hath her victories no less renowned than war, but the warriors get all the status.

"I Feel Like a New Person"

"I took Lydia E. Pinkham's Vegetable Compound when I was tired, nervous and run-down. I saw the advertisement and decided to try it because I was hardly able to do my housework. It has helped me in every way. My nerves are better, I have a good appetite, I sleep well and I do not tire so easily. I recommend the Vegetable Compound to other women for it gives me so much strength and makes me feel like a new person."—Mrs. Lena Young, R. # 1, Ellsworth, Maine.
