THE GLEANER

GRAHAM. N. C., MAY 4, 1933.

ISSUED EVERY THURSDAY

J. D. KERNODLE, Editor.

\$1.00 A YEAR, IN ADVANCE. Entered at the "stoffice at Graham.

.N C., as seco . . class matter. The Legislature has stayi qualities. A few days me and it will surpass the reco d

of the 1931 session.

night to welcome the return of make up the shortage in probeer at 12:01! Folks often do duction or pay the deficit in one of them.

The way things went in Graham's town election Tuesday makes one almost believe that the spirits of departed political workers came back and took a hand in it.

Two months ago today Franklin D. Roosevelt took in hand the reins of government. News Notes of Week Not in the history of the country have so many moves been made, looking to the improvement in conditions of people and government, in so short a time. We hope they will turn out well.

An effort on the part of some members of the Legislature to limit the length of public schools, where patrons are willing to tax themselves for the purpose, is high - handed business. Any town or community willing to pay extra money for school purposes should rather be encouragea. It's patriotic, progressive and forward-looking.

Fertilizer manufacturers are groaning loud and long in anticipation of the government putting Muscle Shoals in operation. A writer says that the price per ton can be cut from \$35 to \$20 -a cut of more than forty percent. The users of fertilizers have taken a much larger cut in the price of their products, and it is only fair to shift a por tion of the burden.

Congress is reposing unpredented power in the Chief E ecutive. As a rule, such a course would be very hazardous. The he will use every power given him wisely and discretly for the a difficult role, and may he of the principal pests: keep on an even keel and cause no regret.

The Legislature is trying to match its appropriation bill with sufficent funds to balance it. It means nothing short of necessary Magnesium arsenate putting taxes in many places and on many things where they are not wanted, which will cause lots of "kicking." In the of the leaves, last and final analysis the consumer will pay the bill in higher costs for what he buys, 2 pounds to 50 gailess of water have to regulate his consump-

In fixing the pay, in the matter of the revaluation of property in this county for taxation, last week the county commishour day. If this ten-hour day, or 1 ounce to three gallons, a thing rarely observed by pub. Cucumber Beetle L This is the

creased-a sort of mild inflation in anticipation of what may happen in the event of the accomplishment of certain legislation proposed in Washington and the consequent increase in hospital. Mrs. Ingle is a cousin of tributed with Next Sunday's Balcurrency.

If the proposed 30 (or 36)hour-week should become law and strictly enforced, what woul become of the businessthat must keep going full 10hours perday time or the worker doing ten hours per day to Holding a "wake" Sunday make ends meet. Who would lots of foolish things. This is just necessary inco ne? The proposition don't look well from this observation station. No man's right to work and business right to operate, when employes are fairly treated and fairly paid, should be abridged, pro viding always that women and children are treated humanely.

on Alamance Farms.

By N. C. SHIVER, County Agent

Alamance Poultry Flocks Rank High In Production

Mr. C. F. Parrish, poultry exten sion specialist, was a visitor in the county last week, and he states that poultrymen in Alamance county rank among the best in North Carolina in efficiency of produc tion. The birds in the flocks of the fourteen poultrymen, who care cooperating with the county agent. averaged 19,63 eggs per bird for the month of March And; the flocks showed an average above feed cost of \$1973. The State av erage production for the month o' March was 18,88 eggs per bird.

in company with the County Agent Mr. Parrish spent Wednes day and Thursday in this county visiting a number of poultrymen and advised them as to disease con trol, feeding, breeding etc.

Control Insects in The Home Garden

For the control of insect pests the first essential is good equip ment. For the same gardener, 'n piece of equipment of most genera use is a compres ed air sprayer o 2 or 3 gal, capacity. A hand dus.eis also desirable. The second es sential is a supply of spray an dust materials. This brings up th subject of practical means of mea suring spray materials in small a mount. The Lome gard ner is not usually equipped with scales for weighing small amounts, and must therefore seek more means people near to and knowing Mr. of measuring the materials. An a Roosevelt have confidence that cunce glass measuring cup is quite useful for this purpose. It is grad uated in thirds and quarters and is suitable for mea uring most matbetterment of the people and terials. The following central country. He has been assigned measures are suggested for some
