THE McLEOD BILL

There is a bill before Congress, known as the McLeod bill, introduced by Representative Clarence J. McLeod, Republican, of Michigan.

were) members of the Federal Reserve System.

The government is holding the assets of these banks which aggregate many millions.

It looks preeminently fair and just that depositors should be paid in full. But there is another angle to the plan:

Other banks, not the "holiday" banks, which were closed about the same time and receivers appointed to liquidate them. Some of them settled with depositors for much less than 100 cents on the dollar.

If the government should pay depositors in "holiday" banks in full, then why not go back and square up with the depositors in the other banks which closed a day, a week, a month, or longer before the bank holiday was declared.

Seems here is a situation to be ironed out—that depositors in both classes get the same employed a backle and woolen sort of a deal.

E. C. Macon, insurance man of Asheville, announces his candidacy for the Democratic nomination for the office of Public Utilities Commissioner in oppo-Hertford, present incumbent. In his platform he pledges, if nominated and elected, to reduce electric rates and phone costs, and that he will also urge legislation to reduce automobile tag rates to five dollars. If all users of electric current and telephones and owners of automobiles, favoring the lower rates, vote for Mr. Macon, there is no doubt of his nomination and election. The electric and phone people should be able to take a cut and still have pretty easy going. But, until the roads are nearer paid for, the wisdom of any drastic reduction in automobile licenses is doubted. Nevertheless the things he stands for appeal to the economicallyminded and should boost the prospect for his nomination. The people are looking, as never before, for some way to get along cheaper after the lessons taught by depression in the past few years.

Leon Trotzky, once East Side New Yorker, who was conspicuous in the Russian Revolution that killed and banished the royal family, was later banished himself. By permission he took refuge in France. Now France don't want him and has notified him to clear out. He has been looking to the United States as a haven, but the United States don't want him-an undesirable citizen and a menace to an orderly Democracy. He is thoroughly saturated with communistic virus. He is a revolution propagandist, and on account of such activity France, thousands of miles nearer Russia than is the United States, has given him his orders to decamp.

A ship should not rely on one small anchor, nor life on a single

THE GLEANER Four H-Club

Let's Help the Girls Look Sweet J. D. KERNODLE, Editor.

> Best Dressed Four-H Girls Offered Gounty, State, National Prizes

Four-H girls who can "doll-up" becomingly have a chance to win fine prizes in this state this year in a contest to be conducted by the National committee on Boys and Club Work of Chicago in cooperation with state and county club leaders

The girls are required to model complete outfit in one of four It provides for the payment classes. They are a school wash of I00 percent of deposits in dress or suit---a wool, silk or closed banks which are (or rayon dress or suit for school-a informal party dress Winners of county contests, now being planned in many parts, will receive handsome medals and become eligiole to the state revue in which winner will receive a trip with all expenses paid by the Chicago Maid Order Company to the National Style Revue to be held at the National Cluo Congress in Chicago during the week of the International Live Stock Exposition.

The national contest will oe staged in one of Chicago's finest canquet halls before over 1200 4-H delegates and leaders attending the Club Congress, and will be a classic feature of the year's cluo program. Beautiful gold watches will be awarded class winners and a gold medal of honor to the national champion.

Economy of the outfit will be given an important rating to induce girls to exercise thrift and originality. Contestants are required to make their dress, but may purchase the accessories. year's national winning outfit, a tailored costume, co st \$21.61. It scraps from an old dress. The reserve national champion-outfit cost \$13.64 complete, and included an original belt buckle mad: of two bracelets. A Louisiana girl won national honors on a cotton school dress and outfit costing 4.62. A 15-year old Arkansas girl won sition to Stanley Winborne of the same honor on a \$7.54 outfit. Rules of the contest may be obtained from local or county club leaders.

WOMEN ARE GROWING TALL; LOSE WEIGHT

GITIS' Attention Survey Shows American Girl Thinner Nowadays.

> New York.—The American woman is getting taller. Few of them today aren't taller than their mothers.

While this change in their stature has taken place, however, no distinct American type has developed, either ng males or females. Unification of the United States has failed to submerge sectional types.

This is shown by new studies of authropologists and sociologists just completed. There are still "Western" and "Southern" and "Eastern" types, and even colleges have distinct types it was learned by Dr. Harold S. Diehl of the University of Minnesota, whose researchs show that the American girl is growing taller and thinner. In his survey, Doctor Diehl found that Stanford university coeds are the tailest in the country, Smith college students the heaviest, and those at Texas university the slightest.

This finding brought forth a deluge of comment from sociologists all over the country.

Prof. Henry Fairchild of New York university said:

"If the present rate of immigration decreases, the United States will be come a tight, homogeneous nation. Thus a curious, indirect by-product of current unemployment and quota problems is a purer American race. "Sectional types, however, remain.

The Northwestern states, Oregon and California, are noted for tall people. I've noticed for years that women are getting taller and taller. I know of few adult women today who are not taller than their mothers. As physical stature depends, within limits, upon environment, it would be a wonder if they didn't get tall, what with increased knowledge of proper nutriment and exercise.

"Increased stature is the evidence of better human development. There is no danger, however, of evolving a race of giants. The whole study of seems to show that every form varies within limits. While the present race shows a trend toward a certain height, it will stop there."

Canadians' River Plan Will Cost \$15,000,000

Montreal.-Plans for a gigantic Irrigation scheme, involving an expenditure of \$15,000,000 and a territory in northwestern Saskatchewan of 1,000.-000 acres, have been submitted to the dominion government by three Moose The plan, which now awaits the

sanction of federal and provincial governments, is backed by A. W. Fawkes, W. R. Bennett and A. E. Mar-The men state that financial backing for the scheme is available. The project would give 1,500 men

work for three years. Seventy per cent of the cost would be for labor. Part of the plan consists in the con struction of a huge dam across the Saskatchewan river. At this dam 100,-000 horse power of electrical energy could be developed. The plan also makes provision for water supplies to Moose Jaw and Regina.

The irrigation plan involves the watering of a strip of land 30 miles in width from Riverhurst to Moose Jaw and between Qu'Appelle and Thunder Creek valleys. Distribution of the wa-ter would be by pumping stations, pipe lines, canals, flumes and ditches.

Dancing Expert Solves Problem of Wallflower

New York.-Arthur Murray, the dancing consultant credited with polishing the technique of the great and near great, announced another victory over the wallflower.

Murray claims to have discovered a method of dancing that will enable, to dance in perfect harmony with a rotund matron of 200 pounds compressed into 5 feet of height.

"It's all in the feet," said Murray. "A normally matched couple dances with both bodies swaying rhythmical-Now when there's a great disparity in height the thing to do is keep the body fairly rigid and concentrate

"By standing a little further apart than usual and paying close attention to the legs a giant could dance with a pygmy-well, almost anyway."

Careers on Great Lakes Now Beckoning to Youth

Superior, Wis .- Young men are taking careers on the Great Lakes seriously these days, Capt. Fred des Jardins, who has sailed the lakes for 32 years. claims.

"Younger men are enlisting in the lakes service, and they don't leave the boat after a trip up from down below to go West to see the country. They are taking the lakes seriously as a

The veteran captain contends that the younger generation is right in taking the work seriously.

Gives Geologists Clue

Crater Lake, Ore.-Discovery of an upright carbonized log buried inside the inner rim of Crater lake is said to prove volcanic action in geologic history of this region. The discovery was made by Ranger-Naturalist Albert Long. The section uncovered is 52 inches long, 131/2 in diameter at top and 151/2 at the base. Its upright po
