

**"Stuffed" Ballot Box
in English Parliament**

If an old yarn is to be believed, the people of the world owe their privileges regarding habeas writs to an old trick of crooked politics. When the act of 1879 was going through the English parliament there was strong opposition in the house of lords. The third reading, according to one Bishop Burnet, was carried by a trick. Two members of the house of lords, Grey and Norris, were appointed tellers to count the vote.

A very fat member was counted as ten members by Lord Grey who, so the narrator says, did it at first as a joke. Then, seeing that Lord Norris, who was in bad health, did not notice what had happened, Grey, who favored the bill, went on with his misreckoning, which added enough extra votes to carry the bill. "There must have been," wrote a famous English authority some years ago, "some mistake, accidental or willful, for the members were declared to be 57 to 55 for the bill and by the minute-book of the lords it appears that there were only 107 peers in the house."

Pure Natural Mineral Water
May Help
MILLIONS FIND IT
VERY BENEFICIAL

For over 2,000 years the great mineral waters of the World, given to us by Mother Nature, have proven themselves very beneficial in the treatment of "rheumatic" aches and pains, arthritis, sluggishness, certain stomach disorders and other chronic ailments.

It has been estimated that Americans alone have spent \$100,000,000 a year in going to the mineral wells and health resorts of Europe. Over \$1,000,000 of these foreign mineral waters are imported annually into this country to help suffering humanity. But it isn't necessary to go to Europe to find fine natural mineral water. We have many marvelous mineral waters in our own country—many excellent health resorts to which you can go for the mineral water treatment for "rheumatic" aches and pains.

Most surprising of all, however, is the fact that today you can make a natural mineral water in your own home at a tremendous saving in expense. For Crazy Water Crystals bring you, in crystal form, healthful minerals taken from one of the world's fine mineral waters. Just the natural minerals. Nothing is added. All you do is add Crazy Water Crystals to your drinking water, and you have a great mineral water that has helped millions to better health and greater happiness.

A standard size box of Crazy Water Crystals costs only \$1.50 and is sufficient for several weeks thorough treatment for rheumatic pains. Crazy Water Co., Mineral Wells, Texas.

**HARD TO LOOSEN
ERROR'S GRIP ON
POPULAR BELIEFS**

Two eminent scientists at Atlantic City, taking stock of the state of knowledge, catalogued "eight popular beliefs that are not true" thus: "A child is influenced by what its mother sees or thinks before the child is born; birth marks are caused by what a mother sees or touches before her child is born; in former times the average length of human life was much longer than now; fat people always are good natured; mental disorders are caused by overstudy; children of first cousins, though of good parentage, are likely to be feeble minded; heavy growth of hair on a person's limbs and chest indicates great physical strength; the theory of evolution implies that men are descended from apes."

This list of beliefs unbased in fact is particularly interesting because each of its items is a venerable member of the human mind. None of these widely accepted errors is of recent origin; none of them arises from the life of today; even the youngest of them, that concerning the theory of evolution, is of a considerable age; and all of them have been contradicted by authority time and again. Yet they persist in vigor apparently unimpairing, and there is no sign that any of them is giving ground under the impact of denial.

A belief once accepted by the population at large has more lives than a litter of kittens. The earnest inculcator of sound doctrine who attempts to dislodge it undertakes an almost hopeless task. Nor does this mean that truth is mocked. The untruth is simply, often picturesquely, dressed; the exceptional circumstances that seem to support it are vividly related and remain in the memory, while the growth of truth is likely to be a drab garment stitched with ifs and buts.—New York Sun.

No Famine in Russia
Soviet Russia will have no famine similar to that of last winter when 4,000,000 died, according to reports from Moscow. The 1933 harvest was more evenly divided and peasants given more grain than in the previous season. This is expected to avert another calamity.

Ocean to Yield Up Wealth?

**Extraction of Bromine, of Immense Value in Industry,
Now Being Carried On, and Scientists Are
Promising Other Miracles.**

Ten years ago commercial extraction of any of the score of valuable elements present in the ocean was as impossible as alchemy. Today it is an accomplished fact in the production of bromine, a vital ingredient in the manufacture of anti-knock gasoline.

"And I feel safe in predicting that within the next decade—and possibly within the next year—we will be able to recover gold, silver, radium and all the other untold wealth from the sea," says Thomas Midgley, whose research promises this modern miracle.

Midgley, who received the William H. Nichols medal of the American Chemical Society for his discovery of knockless gasoline through the application of tetraethyl lead, then continued: "Now that we have made one dream a reality, it is only a matter of further technical development and refinement of processes before we make the sea loosen its hold on fortune so fabulous that it staggers the imagination.

"The process for taking gold from sea water is no more difficult a problem today than was the task of extracting bromine ten years ago. Tomorrow we shall probably be wondering how we overlooked some simple discovery that will unlock the door.

"In fact, the sea is the greatest storehouse of wealth on the earth. Once the secret of tapping it is known, it will give man an inexhaustible treasurehouse of riches he will be able to draw on for thousands of years without striking bottom."

Bromine is used in synthetic chemistry, medicine and the color industry, but its chief value at present is in the manufacture of what motor-

profitable extraction of gold from sea water has been the prohibitive cost of pumping. With the water already running through the plant for the elimination of bromine, gold could be made a by-product. The water pumped up in the course of one day in the bromine process contains more than \$1,000 in gold. It also contains, in varying quantities, radium, silver and many other valuable elements.

There are 600,000,000 pounds of bromine in a cubic mile of water. In the plant, 15,000 pounds a day are removed from 30,000,000 gallons of water, or approximately \$2,000,000 worth of bromine annually. In that same cubic mile of water there is \$10,000,000 in gold and there are approximately 300,000,000 cubic miles of water in the oceans of the world. —Popular Mechanics Magazine.

**Tires have been on the winning cars in the
gruelling Indianapolis 500-Mile Race
FOR 15 CONSECUTIVE YEARS**

EVERY winner in the 500-Mile Indianapolis Race—the most gruelling tire test in the world—drove to victory on Firestone High Speed Tires.

Race drivers know that heat generated by friction inside the cotton cords is the greatest enemy of tire life. These men will not risk their lives on any but Firestone Tires, because they know the high stretch cords in every Firestone Tire are protected by the Firestone patented process of Gum-Dipping.

Gum-Dipping soaks the high stretch cords in liquid rubber and saturates and coats the millions of fibers inside the cords, counteracting destructive friction and heat. It provides greater adhesion between the plies of the tire, and between the Gum-Dipped cord body and the tread.

Firestone chemists and engineers kept pace with new car developments by building stronger, safer tires to meet the exacting demands. See your Firestone Dealer or Service Store today and equip your car with new Firestone High Speed Tires for 1934, with deeper, thicker, flatter, and wider non-skid tread, more and tougher rubber, more traction, giving you more than 50% longer non-skid mileage.

Remember, in Firestone High Speed Tires there is Greater Strength—Greater Safety—and Greater Blowout Protection than in any tire made.

THE ADHESION TEST

Note how the rubber in a Firestone Tire clings to the high stretch Gum-Dipped cords. This greater adhesion and strength is made possible by the Firestone patented process of Gum-Dipping.

Note how the rubber in an ordinary tire pulls away from the cords that have not been soaked and insulated with rubber. This causes friction and heat within the cords, resulting in separation.
