Freight Train Wrecked at Haw River Monday Morning.

A west-bound freight train of thirty cars was wrecked at Haw River about 3:30 o'clock Monday morning, said to be the worst wreck in 7 or 8 years on this division. Thirteen cars left the track. Five of the cars went off on the south side, down the high embankment. One of them fell bottom side up in the river and one with one end in the river.

The derailment started at the 16th car from the engine, around 100 feet east of the Haw river bridge, when an arch bar dropped. The cars lumbered across the bridge, splintering crossties and tearing up the track. The engine and a number of cars were safely across the river before the wrecking started, but the track was torn up for several hundred yards. When the train came to a stand-still the caboose, in which was Conductor L. D. Roehelle, was on the bridge 40 feet above the river and perilously near the edge of the bridge. He got out and reached a phone and called Greensboro. Roy C. Paylor was engineer. A big wrecking crew was dispatched to the scene and repairs were made for trains to cross by one o'clock Monday night. While repairing the damage passengers and mail were transferred.

We are planning in Dallas the finest folk festival yet held.
