## CHAPTER XIII-Continued -21-

"There's only one thing to do with as," Ruth said. "You can take us to Tail Holt and leave us at Ma Presnall's. We'll be safe there. You'll have us under your eye all the time." the time. "All right," Lee assented. "I'll

take you with me-both of you. I wouldn't if I could help it, but there's nothing else to do, as you say. You and Nelly fix up your war-bags. We may be there two-three days. While we're at Tail Holt you'll stay right in the house every minute. Understand?" Ruth said she understood. They took the road two hours aft-

er midnight.

Steadily they rode, through a lovely night of stars-that softened the harsh and desiccated face of essary by others. Reinforcements were likely to come in from the Arizona to a strange, ghostly lovehills. Having gone so far, Sherm Howard would feel that safety lay in finishing the job. But the mar-shal did not say what he thought." liness. Even the sahuaros, with their intimation of age-old decay, were like magnificent candelabra waiting to be lit. Peace reigned over the land.

Jeff Gray was a light sleeper. Awakened by the furious barking of the blacksmith's dog, almost in-stantly he was out of the bunk and at the window. Silhouetted in the moonlight on the brow of the little hill in front of the cabin were a number of men. They were mov-ing toward the cabin. The marshal counted eight of them.

He called to his companion: "Wake up, Hank, and come here." Ransom struggled to conscious-ness. "Lord love ye, man, what are ye doing at the window?" he asked.

The dog was still barking savage-ly at the intrusion of so many night visitors.

"They've found out where I am and are coming to get me," Gray replied.

The blacksmith joined him. "The scalawags are scattering to cover more ground." He lifted his Winchester from the wall. "Any chance for me to slip out of

the back door down to the rocks in the creek?" Jeff inquired. "Not a chance," Ransom said

grimly. "Then I'll have to surrender. They'll only hold me prisoner, if Sherm Howard is running the show. His son is out at the L C. I'll step

out with my hands up." "Wait a minute," the old Indian fighter objected. "I'll go out and make a bargain with them. Better tie them up to an agreement. If there weren't so many, I'd say for us to stand 'em off, but I don't reckon we can do that." A gun cracked. The dog no long-

er barked. The leathery face of the black-smith twitched. "Some damned scoundrel has killed Laddie," he said.

"Yes." Gray was thinking that a man who could shoot down a faithful dog was a villain and not to be "I'm going to wave the white flag and make terms, Hank. You're not in this. I'm the man they want. First thing is to get you out

He sat down on the bed, pulled on his boots, and buckled round his waist the gun-belt lying on a chair.

"I'm not in this, ain't I?" the blacksmith blazed. "After they've killed my Laddie?" The marshal returned to the win-

Jeff said. "Got to fix the fort so we can hold it." trapped men did not escape by the back door. The man was probably He found an axe and knocked a crouched back of a rock some disbunk to pieces. Ransom told him where to find nails. The window he tance from the cabin. He might or might not have seen the door open, where to find name. The window he boarded up, leaving an inch or two for a loophole. Both doors he bar-ricaded as best he could. Mean-while, Ransom crawled across the floor and with a hatchet cut a spysince the sky was now overcast. Gray wished he knew whether he had been observed. If he moved from the shelter of the woodpile, he was likely to find out. He crept up the hill, taking adhole in the adobe wall. He made it

large enough for shooting purposes. "I'd like first-rate to get that bull vantage of every rock and bit of cactus that would give him cover. From the front of the house came rattler Morg Norris," Ransom said. "I've a notion if we picked off that the occasional crack of a gun. This was good news, since it told him the slit-eyed cabron, and maybe one or two more, the rest of the lads attackers were not rushing the would drag it." Gray was of another opinion. By house yet, but were waiting for the rock-rolling brigade to drive out the doomed men. He was close to the top when a sound brought him to rigid stillness. this time the whole village would know what was going on, and the attackers would be recruited if nec-

A man was standing on the crest just above him. He was striking a match to light a cigarette. For a moment the flare of light showed Jeff a face he did not recognize, yet one that seemed oddly familiar. In an instant the man would look down and see him. The marshal did not wait for discovery. "Gimme a hand, pardner," he

drawled.

The match went out. "Who in hades are you?" a heavy voice rasped "Bud Taylor," Jeff said evenly.

"Sherm sent me with a message. The man above lent a hand to pull the climber over the edge.

Looking at the iron-gray hair, the scarred cheek, the shifty eyes, Jeff remembered where he had seen that face before. It had been in a sheriff's office in Texas, on a photo graph beneath which had been written the caption, "Clint Doke, Wanted for the robbery of the Texas and Southern Flyer."

A fraction of a second later the light of recognition began to dawn on the hairy face of the outlaw. He had seen this man once in San Antonio, had had him pointed out as the famous man-hunter, Jefferson Gray.

Doke opened his mouth to let out a cry. Already Gray's fist was traveling in a powerful short-arm jolt toward the drooping chin. The cry materialized as a strangled groan, and the outlaw pitched down as if he had been hit with the back of an axe.

Jeff did not dare to leave him to recover in a minute or two. He pistol - whipped the fallen man across the temple. His gun he kept for immediate use. Someone called, "Come here,

Clint." Clint." Jeff stepped behind a boulder. He could see three men grouped to-gether against the skyline. With Doke's gun he fired three times rap-

idly above their heads. One of the men gave a yell of consternation. He started to run. Another fired in the direction of the marshal. Jeff pumped lead at him. "Let's get out, Mile High," the third man should shrilly. "We're being bushwhacked."

It might be true. Mile High did not wait to find out. In another moment it might be too late to es-

cape. He flung one last defiant shot and followed his companions into the darkness Jeff started to descend the rim-

rock. It was time for him to get back to Ransom. As soon as Morg Norris learned of the fiasco above, he would rush the cabin. At the foot of the rimrock Jeff broke into a jog-trot, reckless of being seen by the watcher at the back. Abruptly he stopped. Four or five figures came into the open, as if from the creek bed, and ran toward the cabin. He heard shouting, but could not make out the words. There was the crack of a gun. The figures vanished into the

house. From inside it came the crash of revolvers. Jeff Gray's heart died within him.

He knew that Ransom had been killed. The old soldier had come to His Strength. JUNIOR TOPIC-How Strong Was Samhis death after he, had apparently deserted him. If he had stayed in NOT THE PARTY AND SENIOR TOPIC-Who is Strong? YOUNG PEOPLE AND ADULT TOPIC-Physical Strength and Moral Weakness. the cabin, they might have driven back the attack. In any case he could have gone down fighting with his friend. among the sons of men than the one who entered upon life with

Sick with despair, Jeff turned to the left, reached the foot of the slope, and dropped down into the creek. He could neither see nor hear anybody. Through the brush he made a circuit and reached the cottonwood grove. Occasionally he could hear the spitting of guns.

The best thing he could do was to get down to the Alamo corral and force Reynolds at the point of a gun to lend him a horse. If possible, he must ride back to the L C and get the reinforcements Lee Chiswick had promised. He knew that Lee could stir up some of the other cattlemen and that a large fighting force could be organized.

That excitement in the village had reached a high point he could see. Many men were in the street, most of them farther uptown in the little business center. He had to wait for a chance to get across the road unobserved. More than once someone appeared just as he was about to start.

sleep the night before" (Wilbur M. He took the street at a run, and Smith). The life story of Samson brings us the picture of God's patient and swarmed over the same wall he had gone over on the night of his adventure with Frank Chiswick. He gracious dealing with such a failure, passed the blackened site of the sta-ble that had been burned, crossed reveals the inexorable law of cause and effect in the moral realm as well as the certainty that the wages the creek, and moved down along its bank. of sin not repented of and forsaken

Another burst of gunfire filled the night. Jeff could not understand this, unless the victors were setting off fireworks in celebration of their victory. The officer's jaw set grim-Samson had the distinction (given to only one other Old Testament character) of having his birth an-nounced beforehand. He was to be a Nazarite and was to "begin to ly. They had better wait until they had finished the job. He intended to make them pay for what they had done to Hank Ransom, if they did not get him before he could slip

out of town. There were too many people afoot. As he made a circle around the Presnall boarding-house, three men carrying rifles walked toward him. He did the only thing possihim for carrying out the Lord's work. The fact that he is named ble, dodged into the same door he had entered some hours earlier when he had been looking for Curly. The men stopped to talk for a moment at the door. One of them was coming into the house, Jeff gathered from what he said. Gray went gingerly up the stairway. He heard a crisp "See you later," and knew that the man was coming up-

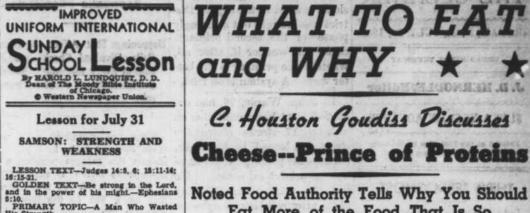

stairs too. Jeff had no time to pick and choose. He whipped open the first door he saw, walked into a room, and closed the door behind him. On the table there was a lighted lamp. At the window a woman stood, clean-limbed and slender. She turned toward him a haggard face, eyes shadowed and fear-filled. For an instant she looked at him incredulously. Her amazement was no greater than his own. The woman was Ruth Chiswick.

A dressing - gown, open at the throat, was wrapped tightly around her lithe long body. Beneath the edge of it here bare feet peeped pression of his uncontrolled sensual nature. Read the entire chapter out. Jeff was aware, without giv-ing the matter any weight, that Nelly lay asleep in the bed. "You!" she cried. "I thought-I as afraid-"

Eat More of the Food That Is So

**Rich in Protective Elements.** By C. HOUSTON GOUDISS

FOR many years, men with an inventive turn of mind have dreamed of creating a product that would concentrate all the important food elements in a small tablet or capsule. They have been inspired by a desire to simplify meal preparation without sacrificing nutritive values.

No one has ever succeeded ? in making a synthetic food that would both satisfy hunger and properly nourish the body. But all the while, the researchers have overlooked the magnificent possibilities of cheese, one of the most concentrated, nourishing, satisfying and versatile of foods.

Cheese-The Body Builder Cheese is the most concentrated source of protein known. More-

over, the protein is of such high type that if it were the only body - building food in the diet, given in sufficient quantities, it would be adequate not only to maintain life, but to support normal growth. One-half pound of American Cheddar

cheese will supply all the protein required by an adult for an entire day.

## Cheese-The Energy Food

In addition to its rich store of protein, cheese is also a fine

source of energy. A cube of Cheddar cheese one-and-one-eighth inches square provides 100 calories or the equ lent in energy value of the lean meat of one lamb chop or one medium-sized potato. One-half pound of Cheddar cheese furnishes 1,000 calories, about half the daily requirement of an adult leading a sedentary life.

**Cheese for Mineral Salts** 

Because milk is rich in miner-als, it follows that cheese, which

is made from milk, contains these precious substances in highly concentrated form. It is an excellent source of calcium, the mineral which is responsible for building strong bones and sound teeth, and for keeping the heart beating normally. A one-and-one-fourth inch cube of American Cheddar cheese contains as much calcium

as an 8-ounce glass of milk. The individual who does not care for milk as a beverage can easily obtain the necessary cal-cium from cheese. But it is pracamounts of this mineral without either milk or cheese.

In rennet cheese, phosphorus, as well as calcium, is present in the same proportions as in milk, but is much more highly concen-trated. As in milk, these minerals are in a form that is most nearly perfect for easy assimi-lation. Rennet-curd cheese is al-ways high in sulphur and fairly

Improve Health With this Free **Bulletin on Planning** a Correct Summer Diet SEND for the free bulletin on "Keeping Cool with Food," offered by C. Houston Goudiss. are also found in whole mill

With this wealth of food values, one would expect to find cheese appearing on the menu in some form every day. But though annual production of cheese in the United States exceeds 700,000,000 pounds, it should be much greater. The annual per capita consump tion is only 5½ pounds-a woe fully small figure when we con sider the wide benefits that would

result from its greater use. The failure of American homemakers to use cheese in the amounts that they should is, I believe, due to three factors: first, a lack of knowledge concerning its splendid food values; second, a belief in the old superstition that cheese is not easy to digest; and third, failure to take advantage of the many ways in which it can be served.

Digestibility of Cheese The foregoing outline of its many food values should give a new conception of its place in the diet. As to its digestibility, stud-ies by the United States Depart-ment of Agriculture have entirely disproved the fallacy that it is not completely digestible.

completely digestible. It was found that on an average about 95 per cent of the protein and over 95 per cent of the fat of cheese were digested and ab-sorbed. The various kinds of cheese tested were found to comelum from cheese. But it is prac- there is the were function of the set adequate pare favorably in digestibility tically impossible to get adequate with the food of an average mixed diet. It was also demonstrated ex-perimentally "that there was practically no difference between cheese and meat with respect to ease of digestion, at least in such quantities as are commonly eaten."

> There was also a notion that because it is so high in food value, cheese should only be eaten in small quantities. But scientific tests have proven that cheese may be eaten by normal individuals in large quantities, as the principal source of protein, with entir beneficial effects upon health. entirely

"I certainly picked me a top hand for a partner this trip," he said

"Gimme a hand, pardner!"

lightly. "They're beginning to close in on us. I better discourage that." He took aim at a dodging figure and fired.

scraping the dirt out of the hole he

across the room to his loophole in the rear. "Where did those fellows go?"

asked after a time. "No sign of them back here." "That's funny. They headed to-ward the rimrock. Four or five of them. Must be figuring to work back of us, don't you reckon?"

"Get him?" asked Ransom

No. Some of them are moving up the hill. Going to take us in the rear, I reckon." The rifle of the blacksmith boomed. Hank gave a yell. "One of 'em won't take us in front or rear. He's down."

A bullet tore through the window

he drawled.

"No. Some of them are moving

Ransom dragged his wounded leg

dow. The men outside were about
sixty yards from the house. Jeff
put a hand on the shoulder of his
friend. "We've got to play our cards
the way they are dealt us, old-
timer. I'm going out with my
hands up. You stay under cover.
After they have me they won't both-
er you."

Gray unbolted the door and whipped it open. He stepped into moonlight and lifted a hand, the palm out.

There was a yell of rage. A bullet knocked a dirt chip from the adobe wall back of the officer. Another dusted his hat. The roar of a rifle deafened him. From just back of him Ransom had fired.

Lead spattered against the building. Hank lurched against his shoulder and fell.

"I'm hit!" he cried, and caught at his right leg. Jeff snatched the rifle from him.

"Crawl back into the house," he ordered

"Come on, boys, we've got him!" a voice shouted.

The line of attackers moved for-ward. The marshal fired and missed -fired again and hit. A running man cried out and stopped abruptly. The others faltered. Their guns barked angrily. Gray stepped back into the house and slammed the door. "Get any of 'em?" his companion

"One." The officer was at the wir dow. "For right now they've had enough and are hunting cover. I've sure got you in a fine jam, Hank. You hurt bad?"

"Love of Moses!" the old sol-dier cried. "They're going to crash boulders down on us."

The marshal knew at once that Ransom was right. The cabin lay in the path of an old slide. At the edge of the rimrock, a hundred feet above them, lay hundreds of loose boulders large and small. A half ton of rock, hurtling down that pre-cipitous slope, would crash through the soft adobe wall as if it were

paper.

"I've got to stop that, Hank," the younger man said. "The firing down here is a bluff to keep our minds busy. They won't charge the cabin till those above have smashed it. I'm going up to stop their game if you don't mind sticking it out here alone."

"They'll pick you off before you've gone a dozen yards, boy," the blacksmith told him.

"Maybe not. The moon is under a cloud now. For one thing they won't be expecting me up there." "They must have someone watch-

ing the back door.' "Not near enough to see in this darkness. See you later, old-timer." Jeff tore down the planking with which he had reinforced the back

door. Ransom said "Sure," and did not believe that either of them would be alive an hour from then.

"Bolt the door after me. I may come back on the jump. Be ready to let me in prontito." The marshal opened the door and slipped out.

"My leg is plugged. It's not bleed-ing bad. I reckon the bullet missed an artery." "Look after you in a minute," Clouds were scudding across the sky. Jeff lay behind a woodpile, have been sent to make sure the ing the bullet missed an artery." by rings on timber used in repart those of that state. Few tropical countries anywhere in the world can rival Costa Rica in the variety of its orchids and ferns.

"Got away?" (TO BE CONTINUED)

## Drouth Is Seen as Cause of Ancient Indian Exodus From Northern Arizona

A drouth producing the same re- | scarce and men and animals could sults as the modern dust bowl of the Middle West may have driven not live on the scanty vegetation. Corncobs in the bottom of trash piles at the beginning of the drouth were very large, while at the end of the period, the ears had become a cultured race of Indians from the region of northern Arizona more than 700 years ago, according to Dr. very small, according to Doctor Ralph L. Beals, instructor of anthropology at the University of Cali-fornia at Los Angeles, says the Los Beals. The people migrated from the district in much the same man-

Angeles Times. The cliff dweller ancestors of the Hopi and Zuni Indian tribes began building their huge commu homes around the year 1250.

southern exposure was apparently as desirable for the home at that time as it is at present, since only huge cliff caves opening to the south were used for building. The cliff home was used only during the winter time, the tribe moving to the valleys for summer.

Suddenly, around the year 1300 the dwellings were abandoned, probably all at the same time, according to Doctor Beals. The of the evacuation was established by rings on timber used in repair-

For the Lord shall be thy confidence, and shall keep thy foot from being taken.-Prov. 3:25,26. high in iron. Furthermore, the fron is in the most readily assimilated form.

Cheese and Vitamins

Cheese is a splendid source of vitamin A, which promotes growth and increases resistance to dis-ease. It is especially important for eye health and is necessary to prevent the affliction known as night blindness. The amount of vitamin A varies with the type of cheese, but both American Ched-dar and Parmesan cheese are extremely rich in this substance, and cream cheese is an outstand

The bulletin gives concrete suggestions for combatting suggestions for comparing faulty elimination through cor-rect eating and proper habits of hygiene. It gives a list of laxa-tive foods and contains a full week's sample menus. A post-card is sufficient to carry your remnark

Place of Cheese in the Diet

There is a case on record of a young man who lived for two years on a daily diet consisting of one-half pound of cheese, a onepound loaf of whole wheat bread and two pounds of fruit. While this limited diet might prove monotonous to some people, it is pos-sible to utilize cheese as the easiest method of providing important food value, varying the diet, and simplifying meal preparation. For there are more than 200 distinctive varieties of cheese listed by the department of agriculture, ranging from the smooth, delicate ly flavored cream cheese, which may be given to very young children, to the sharp tangy cheese which is especially popular with men. Fortunately, almost every type can be purchased in pack aged form, in sizes that are con-venient for large and small fami-

lies, making it possible to enjoy

a wide variety. Cheese can be used as a main dish; in salads or sandwiches; as a sauce for vegetables; as a des-sert. It is desirable at the same time to serve bulky foods, such as time to serve bulky foods, such as fruits and vegetables. Cheese may also be combined advantageously with carbohydrate foods. This is because the balanced diet requires more carbohydrates than protein. And cheese is essentially a pro-tein food, interchangeable with meats and fish. @ WNU-C. Houston Goudha-1935-41
