Soludarity Hemispherically, the Americas constitute an economic unity which can operate independently of war-crazy Europe. But in peacetime the Old world's rich nations dangle tempting trade offers before the tiny lands of Central and South America, wooing them away from the more logical north-and-south commercial channels. When war again engulfs Europe, the rich sultors forget their temporary New world friends, who invariably turn once more to the U. S. for leadership. No exception to this rule is the

Europe can no longer supply the needs of South America, nor can America supply the needs of Europe under-neutrality restrictions. But every-one would be happy to open up new markets in the other Americas.

Fully stolen by Europe's war is the news spotlight which Washing-ton's election-bound investigation committees hoped to enjoy this summer. But early September brought one witness before Rep. WNU Service, National Pre WASHINGTON.—In these days when the menace of a world-destroying war hangs perilously overhead, it is heartening to read something or hear something that gives consideration to the problems of America and Americans. While international broadcasts were filling the air with facts and alleged facts and just plain propaganda the other night, it struck me as most signif-icant that an official of the treasury should take time out and talk, by radio, on the general subject of tax-ation and the country's needs in this regard.

regard. Undersecretary John W. Hanes, then serving as secretary of the treasury because of the absence of

then serving as secretary of the treasury because of the absence of Secretary Morgenthau, made what a good many described as a dry speech. Certainly, most editors so regarded it, or else they thought that the European backyard fence with its mess of tomcats squalling at each other was more important. There can be no debate, of course, that the war situation requires the closest scrutify and the calmest of nerves; but the point is that all of us hope our nation is going on over the horizon of the future, and attehtion needs to be given—and must be given—to our internal affairs as well as our relations with those across the seas who insist upon quarreling over the line fence. So it was that, when Mr. Hanes made a statement concerning the need for a general reallocation of taxes, a great many people felt it to be a very hopeful sign. Now, it is always a healthy indication when an official of the federal government looks facts in the face. We have not seen a great deal of that in recent years. But if such things are significant and valuable, how much more important it is to see an official come out of the heart of the New Deal and say, in effect, that the treasury wants to hear what business has to say about the present taxes. Mr. Hanes went further: He said the

wants to hear what business has to say about the present taxes. Mr. Hanes went further: He said the treasury wanted to hear these things in private, not in a public demon-stration where the individual who has grievances about unfair taxes could be held up to public scorn. You will remember, of course, how some of the New Dealers staged a vandeville show a year ago; how it vaudeville show a year ago; how it picked out cases of taxpayers who had avoided taxes by taking advan-tage of the provisions of law, and how each of these was marked as unpatriotic citizen.

Many of the Taxes That Had Been Tried Failed Miserably

Been Tried Failed Miserably If I read the speech by Mr. Hanes correctly, what he had to say was that a good many of the taxes that had been tried by the sputtering type of New Dealers have failed miserably. Of course, Mr. Hanes could not say it just that way, but he told of repeal of a group of taxes and revision of others, and in almost the same breath, he predicted the changes would aid business recov-

is versed in politics. He told of the situation in a rather simple and understandable way, and when it is summarized what he said was: We have to have more tax receipts but on an equitable basis. It will remain to be seen whether congressional leaders will have the guts to place the taxes on a sound basis. One can look over present tax laws and find so many instances where tax burdens byeak the back of one line of business and fail absolutely to touch another. The demagogues will tear their hair and moan about taxing the poor, and proceed to lay taxes that are hidden in a hundred articles that wage workers must have. And that is the menace of the present tax situation: hidden must have. And that is the menace of the present tax situation: hidden taxes. I wonder how many political leaders would be able to hold on to their jobs if they would tell the truth about the taxes they have con-cealed. The public administration clear-ing house, an institution designed to aid state governments by dissemi-nation of information regarding the various states, released a statement a few days ago that was guite li-

a few days ago that was quite ila few days ago that was quite il-luminating as to the steps being taken in tax matters. It showed that four additional states—Massa-chusetts, New Hampshire, Rhode Island and New York—had enacted new taxes on cligarettes in 1639. That makes a total of 25 states now using this source of taxes. There are eight cities that have special taxes on cligarettes, in addition to state levies.

25 States Make Users Of Tobacco Pay a Tax

25 States Make Users Of Tobacco Pay a Tax
Now, I am not here to plead the same of the cigarette. The tobacco industry and the tobacco farmer, I assume, are able to take care of their own problems. But how many people have stopped to think that 25 states are making the users of tobacco pay a tax ranging from one cent to five cents on a pack of cig-arettes, and that the federal govern-ment takes six cents a pack (of pop-ular priced brands) before the pack reaches the retailer in your town!
The political demagogue will harangue at length, slap his hips and wipe motion picture tears from eyes about a sales tax that "takes as much from the poor as from the rich," and vote glibly for a tax on cigarettes. Nor does he mention ever that such a tax as the one just cited—and there are many oth-ers that could be mentioned—pro-motes something akin to bootleg-ging. He will avoid saying that per-sons living near a state boundary will, and do, cross over into the next state and buy cigarettes and tobac-cos if that neighboring state does not have such a tax. He probably at itax on a "luxury" article, which makes a point of the statement by Mr. Hanes that "new conditions re-quire new methods."

Not any one can, or ought, to say hat tobacco ought to be free from taxes. I have seen no sign from the industry or organizations of to-bacco farmers making such a con-tention. Yet, from an unbiased viewpoint, the basis established by Mr. Hanes, it seems to me there should be attention given to this type of taxation, whether on tobacco or any one of a thousand other com-modities. It is a type of taxation that, for the most part, is concealed.

Betty, Miss Kirby's senior by only one year, is recognized as one of the finest players in feminine ranks.

This was the second time the two finalists had met. Two years ago, in the southern championship, the pride and joy of Atlanta beat Miss Jameson 3 and 2. The slender Geor-gia girl was just too good. Actuality

Aside from Poland's retreat, aside from German apathy on the western front, the War of 1939 followed tra-dition. On the propaganda front, Berlin issued a "white book" reply-ing to Britain's "white paper," re-counting pre-war Anglo-German re-lations and placing responsibility on England. Faced with coatinued merchant marine warfare, both France and Britain established im-port control systems to conserve foreign exchange and provide ship-ping space for war necessities. Most vital, however, was the time-tested plan whereby the United Kingdom hopes to starve Germany into submission. Thrown around western exits of the Baltic sea was the impregnable naval blockade which only Britain could muster. Aside from Poland's retreat, aside

fectively there would be no place for the Communist party. Biggest news, however, was some-thing which might—if substantiated —make the Republican party blush. In 1936, said the witness, a man named "Davidson" had approached named Davidson had approached him as representing seven wealthy Republicans who were willing to give the Communist party \$250,000 to nominate President Roosevelt as its presidential candidate.

The thing that is important to me a this situation is that Mr. Hanes had the courage to take a definite position for reallocation of taxes on an equitable basis-for I do not bean equitable basis—for 1 do not be-lieve anyone can justify the silly structure that now is used to keep the federal government going. It can be said, moreover, that Mr. Hanes recognizes what confronts the nation in the way of revenue needs. None of us have heard very much from top flight officials lately as to how this \$45,000,000,000 debt is ever going to be paid. The boys who spent the money, and had a good time doing it, are slinking to cover. They don't want to face the facts. Whatever their attitude may be, however, taxes are going to come higher, 59-cent dollar or no 59-cent dollar, and Mr. Hanes apparently was willing to tell the country the story of taxes up to this time.

Might Be Smart Politics To Undertake Tax Revision

It is much too early for any one to hazard a guess as to what will be done. Next year is a year for general elections, from the Presi-dent on down the line. It is rather unusual for a congress to undertake tax revision (especially upward) in advance of a campaign, but some-how I believe it might be pretty smart politics to do so next year. There is nothing to indicate that Mr. Hanes had any politics in his mind; indeed, I think the contrary is true, because Mr. Hanes has been a busi-ness man and it is unlikely that he It is much too early for any one
